Baja SAE is an intercollegiate competition to design, fabricate, and race a small, single passenger, off-road vehicle powered by a 10 HP Briggs Stratton 4-Stroke gasoline engine. Since the off-road vehicle is powered by a small capacity engine, the weight of the structure is

very critical and must be optimized to improve the performance of the vehicle.

Advanced Search. The chassis is one of the main components of the vehicle, which provides not only support and stiffness but also gives the vehicle its shape. Its design is a challenge for the mechanical engineer: to achieve an optimum resistance-weight ratio which can ensure the safety of the pilot. To optimize its design, engineers can rely on the Finite Element Analysis (FEA) an ideal method to predict the behavior of the chassis to the different loads (Mechanical Effort, fatigue ...

In the 2-session workshop, participants will

receive a hands-on, interactive introduction to nonlinear Finite Element Analysis (FEA) and Computational Fluid Dynamics (CFD), the two analysis types commonly used for Enduro Student India and Baja SAE student design competitions. All participants will learn how to leverage the free, cloud-based SimScale platform for their own projects and designs.

ANSYS Tutorials & Projects for BAJA-SAE. For proper analysis of your vehicle you need to conduct structural analysis of your cage for side, roll, front, rear & torsional impacts. The primary aim in your analysis should be to reduce weight of the vehicle and to test for failure. The un-sprung weight, rotating mass and roll cage are primary weight reduction areas and you should try to reduce the weight of your car to 300 kg with higher stiffness of the roll cage to help your car achieve the ...

Modeling and Simulation Study of BAJA SAEINDIA All Terrain Vehicle (ATV) Using Integrated MBD-FEA Approach. 2015-26-0219. Suspension and chassis play a vital role in the structural performance of an off-road vehicle. The paper focuses on Computer Aided Engineering (CAE) modeling and simulation study of an All Terrain Vehicle (ATV) structure to analyze its static and dynamic behavior.
