Transactions of the Section on Pediatrics of the American Medical Association at the 49th-86th Annual Session ... 1898-1935

The potential threat posed by Leonid meteoroids to orbiting spacecraft over the next several years calls for new dynamic mitigation strategies to assist the satellite community in reducing the danger to its vehicles. This book offers deliberate dynamic mitigation strategies to complement the traditional shielding strategies, providing mission operators additional ways to decrease the danger. Five different attitude control and orbit maneuvering

options are examined in detail. The information is presented in algorithmic form to allow technically competent, but meteoroid inexperienced, operators to easily understand the phenomena, assess the danger, and implement procedures. Although general in scope, the book emphasizes the Leonid meteor events of the 1998-2002 timeframe.

The Almanac of Office Equipment

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular

Science and our readers share: *Association*
