Social media is a new technology that not only allows for another channel of broadcasting messages to the public, but also allows for two way communication between emergency managers and major stakeholder groups. Increasingly the public is turning to social media technologies to obtain up to date information during emergencies and to share data about the disaster in the form of geo data, text, pictures, video, or a combination of these media. Social media also can allow for greater situational awareness for emergency responders. While social media allows for many opportunities to engage in an effective conversation with stakeholders, it also holds many challenges for emergency managers. The purpose of this course is to provide the participants with best practices including tools, techniques and a basic roadmap to build capabilities in the use of social media technologies in their own emergency management organizations

(State, local, Tribal) in order to further their emergency response missions. By the end of this course, participants will be able to: Explain why social media is important for emergency management Describe the major functions and features of common social media sites currently used in emergency management Describe the opportunities and challenges of using social media applications during the 5 phases of emergency management Describe better practices for using social media applications during the 5 phases of emergency management Describe the process for building the capabilities and to sustain the use of social media in an emergency management organization (State, local, tribal, territorial)"

Read a fascinating interview with editor Tener Goodwin Veenema! Tener Veenema Interview Disaster planning and emergency

preparedness have never been more critical to the nurses who serve as our front-line response. Today's pandemic threats of global terrorism, disease, and natural disasters make this comprehensive handbook of best practices a necessity--meeting the need for a nursing workforce that is adequately prepared to respond to any disaster or public health emergency. In addition to a thorough update based on the most recent recommendations, this second edition contains six new chapters: Emergency Health Services (EMS and other first responders) Burn Assessment and Management Explosive & Traumatic Terrorism Caring for High-Risk, High-Vulnerability Patients Emerging Infectious Disease (avian and other flu pandemics) Chemical Decontamination All content

reflects the guidelines provided in the Federal Disaster Response Plan and the National Incident Management System (NIMS) and therapeutic recommendations from the national Centers for Disease Control and Prevention. Disaster Nursing will prepare any nurse or EMS team to provide health care under a variety of disaster conditions.

Geodetic Leveling Instruments National Association for Search & Rescue Textbook covering wilderness first aid techniques.

Wilderness First Aid Cengage Learning Santo, the largest island in the South Pacific nation of Vanuatu, is an extraordinary geographical and cultural microcosm, combining reefs, caves, mountains, and satellite isles--with human history that dates back 3,000 years. Collecting contributions from more than

one hundred authors, *The Natural History of Santo* is the result of a 2006 Santo expedition, which brought together scientists, volunteers, and students from twenty-five countries. This lavishly illustrated book pays homage to the biodiversity of this "planet-island" and bridges the gaps between scientific knowledge, conservation, and education.

An essential introduction to modern defense policy *The U.S. military* is one of the largest and most complex organizations in the world. How it spends its money, chooses tactics, and allocates its resources have enormous implications for national defense and the

economy. *The Science of War* is the only comprehensive textbook on how to analyze and understand these and other essential problems in modern defense policy. Michael O'Hanlon provides undergraduate and graduate students with an accessible yet rigorous introduction to the subject. Drawing on a broad range of sources and his own considerable expertise as a defense analyst and teacher, he describes the analytic techniques the military uses in every crucial area of military science. O'Hanlon explains how the military budget works, how the military assesses

and deploys new technology, develops strategy and fights wars, handles the logistics of stationing and moving troops and equipment around the world, and models and evaluates battlefield outcomes. His modeling techniques have been tested in Iraq and Afghanistan, including the methods he used to predict higher-than-anticipated troop fatalities in Iraq—controversial predictions that have since been vindicated. *The Science of War* is the definitive resource on warfare in the twenty-first century. Gives the best introduction to defense analysis available

Covers defense budgeting Shows how to model and predict outcomes in war Explains military logistics, including overseas basing Examines key issues in military technology, including missile defense, space warfare, and nuclear-weapons testing Based on the author's graduate-level courses at Princeton, Columbia, and Georgetown universities *Toxicological Profile for Pyrethrins and Pyrethroids* Princeton University Press This book reviews the causes and effects of power outages and establishes treatment system plans that are reliable and resistant to

vulnerabilities, in order that water and wastewater utilities can properly respond to these events. Financial and public health risks are addressed to assist facility planners and operators when considering the multi-faceted issues that pertain to standby power options. By providing a basis for the planning that ensures safety and reliability, the book is intended to provide education on the need, costs, and options related to standby power supply. During public health emergencies such as terrorist attacks or

influenza outbreaks, the public health system's ability to save lives could depend on dispensing medical countermeasures such as antibiotics, antiviral medications, and vaccines to a large number of people in a short amount of time. The IOM's Forum on Medical and Public Health Preparedness for Catastrophic Events held a workshop on November 18, 2009, to provide an overview of current threats, recent progress made in the public health system for distributing and dispensing countermeasures, and remaining vulnerabilities. *Emergency Power Source Planning for Water and Wastewater* Springer Publishing Company

Points of Distribution . Points of Distribution are centralized locations where the public picks up life sustaining commodities following a disaster or emergency . Commodities usually include shelf stable food and water

What are Points of Distribution or PODs? During a disaster, one method of issuing supplies may not be enough. A Local Emergency Management Agency (LEMA) could use other distribution systems or use all of them at once. All three complement each other and provide expanded distribution coverage. For this Guide, we will focus on Points of Distribution or PODs. PODs can accommodate vehicle traffic (drive-thru), pedestrian traffic (walk thru), and mass transit traffic (bus or rail). Each person or vehicle receives a set amount of supplies. The recommended amount is for each

person/vehicle to receive enough for a household of three. The amount of supplies provided will differ depending on the type of transportation used. For instance, more supplies are provided to someone in a car than to a pedestrian who must hand carry items."

Experience new dimensions of the Holy Spirit's power! Do you desire to know what the Holy Spirit is really like? Many Christians hunger for deeper and more powerful encounters with the Holy Spirit, but where

can these experiences be found? The answer lies in the pages of Scripture. In this groundbreaking work, author and healing evangelist David Hernandez takes you on an unforgettable journey to discover and experience the Spirit's powerful presence throughout the entire Bible from Genesis to Revelation. Scripture offers so much more to be discovered than merely a theology of the Holy Spirit and still more to be experienced! Trade dry theory for a dynamic relationship as you encounter the third Person of the Trinity in the pages of every book of

the Bible. Know the Holy Spirit in a greater depth than ever before. This book will help you discover Hidden Mysteries. Even in Old Testament books where there is no direct reference to the Holy Spirit, learn to see His presence moving. A Fresh Revelation. The different revelations of the Spirit in Scripture reveal His unique characteristics and how He wants to move in your life. Your Supernatural Identity. Learn what it really means to have the same Spirit that raised Christ from the dead dwelling in you. Kingdom Power. Discover what it means to partner with the Spirit

to release the miracles that Jesus promised. Within the pages of Scripture, untapped reserves of Holy Spirit power are waiting to be released. Will you discover them today?

Risk Estimates for Radiation Protection Disha Publications Course Overview On February 28, 2003, President Bush issued Homeland Security Presidential Directive-5. HSPD-5 directed the Secretary of Homeland Security to develop and administer a National Incident Management System (NIMS). NIMS provides a consistent nationwide

template to enable all government, private-sector, and nongovernmental organizations to work together during domestic incidents. You can also find information about NIMS at <http://www.fema.gov/nims/> This course introduces NIMS and takes approximately three hours to complete. It explains the purpose, principles, key components and benefits of NIMS. The course also contains "Planning Activity" screens giving you an opportunity to complete some planning tasks during this course. The

planning activity screens are printable so that you can use them after you complete the course. What will I be able to do when I finish this course?

- * Describe the key concepts and principles underlying NIMS.
- * Identify the benefits of using ICS as the national incident management model.
- * Describe when it is appropriate to institute an Area Command.
- * Describe when it is appropriate to institute a Multiagency Coordination System.
- * Describe the benefits of using a Joint Information System (JIS) for

public information. * Identify policies for dealing with the ways in which NIMS affects dangerous goods incidents on preparedness. * Describe how board aircraft. It contains NIMS affects how resources are general information on the managed. * Describe the factors that may need to be advantages of common considered when dealing with any communication and information dangerous goods incident and management systems. * Explain provides specific emergency response drill codes for each how NIMS influences technology item listed in the Technical and technology systems. * Instructions for the Safe Describe the purpose of the Transport of Dangerous Goods by NIMS Integration Center CEUs: Air

faced with the challenge of responding swiftly and effectively to hazardous materials and terrorism incidents. Easy-to-read and perfect for use in HazMat awareness, operations, and technician-level training courses, this "Operations Plus" book begins by acquainting readers with current laws and regulations, including those governing emergency planning and workplace safety. Subsequent chapters provide in-depth information about personal protective equipment and its limitations; protective actions ranging from site management and rescue through evacuation and decontamination; product control including the use of carbon monoxide detectors; responses to

terrorism and terrorist groups; law enforcement activities such as SWAT operations and evidence collection; and more! A key resource for every fire, police, EMS, and industrial responder, Hazardous Materials Incidents is one of the few books available today that is modeled on current ways of thinking about HazMat and terrorism responses and operations.

Is-26 Guide to Points of Distribution

This publication provides a summary and general guidelines for business continuity planning (BCP). While governments, not-for-profit institutions, and non-governmental organizations also

deliver critical services,
private organizations must
continuously deliver products
and services to satisfy
shareholders and to survive.
Although they differ in goals
and functions, BCP can be
applied by all organizations.
