"The artists represented in this book reflect the region's hybrid culture and offer competing ideas about Caribbean identity in a variety of works done in the last six years in a wide range of media. Two introductory essays by contemporary-art historians survey the themes treated by the artists and offer insights into the different traditions and contemporary-art scenes in the region. The book contains 200 colour illustrations, including a colorplate section complemented by commentaries that place the individual works in the context of each artist's oeuvre. Artist biographies and a selected bibliography complete the volume."--BOOK JACKET.

Back from 44 - The Sacrifice and Courage of a Few. Nick Bentas, Staff Sergeant US Army Air Force, finds himself in a severely crippled B-26 Marauder, trying to return to base, he remembers the different times in his life that led him up to this point. From enlistment to basic training to saying goodbye to his new wife, he remembers his deadly missions around France, Germany and the wider Mediterranean. Experience how it was first hand to encounter enemy flak and fighter attacks, while dealing with the emotional impact of losing close friends. Back From 44 is an in-depth look into the bravery and sacrifice of ordinary men who did extraordinary things during WWII.

How do we learn to risk, to trust, to pursue wholeness and excellence—to run with the horses and live life at its best? In a series of profound reflections on the life of Jeremiah the prophet,

Eugene Peterson explores the heart of what it means to be fully and genuinely human. This special commemorative edition includes a new preface from Peterson's son.

### Christian Chaplains & Coaching IOS Press

Course Overview On February 28, 2003, President Bush issued Homeland Security Presidential Directive-5. HSPD-5 directed the Secretary of Homeland Security to develop and administer a National Incident Management System (NIMS). NIMS provides a consistent nationwide template to enable all government, private-sector, and nongovernmental organizations to work together during domestic incidents. You can also find information about NIMS at <http://www.fema.gov/nims/> This course introduces NIMS and takes approximately three hours to complete. It explains the purpose, principles, key components and benefits of NIMS. The course also contains "Planning Activity" screens giving you an opportunity to complete some planning tasks during this course. The planning activity screens are printable so that you can use them after you complete the course. What will I be able to do when I finish this course? \* Describe the key concepts and principles underlying NIMS. \* Identify the benefits of using ICS as the national incident management model. \* Describe when it is appropriate to institute an Area Command. \* Describe when it is appropriate to institute a Multiagency Coordination System. \* Describe the benefits of using a Joint Information System (JIS) for public information. \* Identify the ways in which NIMS affects preparedness. \* Describe how NIMS affects how resources are managed. \* Describe the advantages of common communication and information management systems. \* Explain how NIMS influences technology and technology systems. \* Describe the purpose of the NIMS Integration Center CEUs: 0.3

Equine Pharmacology combines highly practical therapeutic guidance with reliable scientific background information to provide a clinically relevant resource. Taking a body systems approach to the subject, the book offers the equine clinician fast access to drug options for a given disease, with additional information available for reference as needed. Logically organized to lead the reader through the clinical decision-making process, Equine Pharmacology is a user-friendly reference for pharmacological information on the horse. The book begins with a general review section presenting the principles of antimicrobials, anesthesia, analgesics, anti-parasitics, foals, fluid therapy, and drug and medication control programs. The remainder of the book is devoted to a body systems approach to therapeutics, allowing the reader to search by affected system or specific disease to find detailed advice on drug therapy. Equine Pharmacology is an invaluable addition to the practice library for any clinician treating equine patients.

Dits and Dahs American Radio Relay League (ARRL)

The purpose of this manual is the prevention of injury, suffering, or death that may occur as a result of poor planning or preventable incidents at public events. This manual is intended to provide guidance for the management of risks associated with conducting events that involve mass gatherings of people and assist planners and organizers in making such events safe and successful. Details of the development of the manual and other related matters are noted in the Background section of the Introduction. The manual was sponsored, edited, and published by the Department of Homeland Security (DHS)/Federal Emergency Management Agency (FEMA). FEMA has prepared this manual for use by anyone planning or conducting a special event or mass gathering. This manual is intended to enable its users to ensure that adequate measures and systems are in place to prevent, reduce, and provide care for injuries, illness, and suffering that may occur. Many people, in addition to health personnel, contribute significantly to the success of a public event. Therefore, FEMA anticipates that this manual will be distributed to event promoters, managers, public and private organizations, emergency service personnel, government bodies, and any individual or organization that contributes to the planning of events. Wide distribution is encouraged, providing that individuals understand that the detailed contents of the manual are directed principally at managing the health and safety aspects of the event for all participants, officials, and spectators. The manual is not intended to override any existing legislation or local emergency management procedures. Further, it does not seek to address the preparation of emergency response plans, but rather identifies the elements that should be considered by those responsible for planning and conducting events that attract large numbers of people. Local governments and emergency services should be approached for more detailed advice on other aspects of planning and for the necessary permits and licenses required.

Principles of Remote Sensing Learning Express (NY)

In this new book, Bill Kramer examines the complexities of disaster planning and control, covering the concepts of disaster management, development of

disaster and emergency operation plans, and much more. Through examples and case studies, the book is designed to allow the fire officer to study how the fire service has been involved with responding to various disasters and, by learning from the past and understanding the concepts presented, make a difference in the overall outcome of future events. Disaster Planning and Control will be an invaluable resource for anyone involved in disaster response--from the frontline worker to the highest elected official. This book is written to the FESHE model curriculum for the Disaster Planning and Recovery course.

Infectious Diseases of the Horse Gwasg y Bwthyn

**Course Overview**This course describes the role, design, and functions of Emergency Operations Centers and their relationships as components of a multi-agency coordination system. The course contains disaster-related examples, activities and case studies that relate to EOC's and multi-agency coordination systems at the local, state and federal levels of government.**Course Objectives:**At the end of the course, students should be able to: \*Relate EOC operations to National Incident Management System (NIMS) requirements.\*Describe the role that EOCs play in overall multiagency coordination.\*Describe the relationship between the EOC and the on-scene Incident Command System (ICS) structure.\*Identify staffing, information, systems, and equipment needs at the EOC.\*Determine whether participants' EOC organizations are conducive to effective coordination.\*Identify potential alternate locations suitable for EOC operations should the primary EOC facility become damaged or inoperable.\*Create a test, training and exercise plan for critical EOC operations.\*Develop a strategy and schedule for reviewing EOC resource requirements and technology needs.

Appendices A and D

In an age where Christianity is losing influence, chaplaincy has been re-defined to mean something that it never used to mean. At Christian Chaplains @ Coaching we are returning the ministry of Chaplaincy to its Gospel centrality. Learn how to become a truly Christian Chaplain and make a difference for Christ.

IS-775: EOC Management and Operations

An inspiring and revelatory guide to starting and scaling a small business, from powerhouse duo Stacey Abrams and Lara Hodgson Like many business owners, renowned politician and activist Stacey Abrams didn't start a business because she dreamed of calling herself an entrepreneur. Her part-time post (and its \$17,310 annual salary) as a member of the Georgia House of Representatives necessitated striking out on her own as a consultant—her first small business. Then, Stacey and her friend Lara Hodgson launched an infrastructure advisory

firm—named Insomnia Consulting because they did their best thinking at 3:00 a.m.—and then another business, and then another. Fifteen years into their entrepreneurial journey together, they have tackled the obstacles that many business owners face: how to grow sustainably, hire thoughtfully, and keep up with the Goliaths in your industry. Now, for the first time, Stacey and Lara share their inspiring and relatable personal story and lessons learned the hard way to show how every business owner can confront the forces that conspire to keep small businesses small. Lauded for her “resilient, visionary leadership” (Barack Obama) and celebrated as a “passionate advocate of democracy” (Madeleine Albright), Stacey now brings her fierce sense of justice to the challenges that America's business owners face. Level Up arms readers with the confidence, know-how, and savvy to overcome the obstacles that hold their businesses back.

TOEFL Exam Essentials

In the early 1990s, a small group of individuals recognized how virtual reality (VR) could transform medicine by immersing physicians, students and patients in data more completely. Technical obstacles delayed progress but VR is now enjoying a renaissance, with breakthrough applications available for healthcare. This book presents papers from the Medicine Meets Virtual Reality 22 conference, held in Los Angeles, California, USA, in April 2016. Engineers, physicians, scientists, educators, students, industry, military, and futurists participated in its creative mix of unorthodox thinking and validated investigation. The topics covered include medical simulation and modeling, imaging and visualization, robotics, haptics, sensors, physical and mental rehabilitation tools, and more. Providing an overview of the state-of-the-art, this book will interest all those involved in medical VR and in innovative healthcare, generally.

Is-26 Guide to Points of Distribution

Points of Distribution . Points of Distribution are centralized locations where the public picks up life sustaining commodities following a disaster or emergency . Commodities usually include shelf stable food and water What are Points of Distribution or PODs? During a disaster, one method of issuing supplies may not be enough. A Local Emergency Management Agency (LEMA) could use other distribution systems or use all of them at once. All three complement each other and provide expanded distribution coverage. For this Guide, we will focus on Points of Distribution or PODs. PODs can accommodate vehicle traffic (drive-thru), pedestrian traffic (walk thru), and mass transit traffic (bus or rail). Each person or vehicle receives a set amount of supplies. The

---

recommended amount is for each person/vehicle to receive enough for a household of three. The amount of supplies provided will differ depending on the type of transportation used. For instance, more supplies are provided to someone in a car than to a pedestrian who must hand carry items."
