The Stratocaster. The Telecaster. During the quarter-century following World War II, Fender guitars didn't just make music. They made musical history. Those spectacular years are remembered and celebrated in this definitive new book, which tells the story of the Fender company and the wondrous instruments it created. Featuring 250 photographs of Fender guitars-including some extremely rare guitars in private collections-as well as the largest collection of Fender advertising ever assembled, this gorgeously designed volume is a comprehensive account of Fender's golden age. It will be irresistible to anyone interested in guitars, rock 'n' roll, or mid-century American collectibles and ephemera. Like the guitars it documents, the book simply brings down the house.

(Book). The world's most famous guitar had a golden anniversary in 2004, and this official, authorized book/CD package offers the best photos, quotes, facts and sounds to properly celebrate this achievement. From Buddy Holly to Jimi Hendrix to today's hottest players, the Fender Stratocaster defines rock'n'roll for generations of fans and players. Special features include exclusive photos from the world's greatest guitar collection, as well as a CD with musical examples of famous Strat sounds and styles hilariously performed by Greg Koch even spoken excerpts from the author's interviews with the Strat's beloved inventor, Leo Fender. This book also recognizes that the Stratocaster's deeper significance lies in the music that guitarists have created with it. You'll hear what Strat players have to say about their instrument, their music and each other. The Fender Stratocaster both reflects and influences popular culture worldwide. The Stratocaster Chronicles focuses on the people who brought it into the world, the designers and builders who refined it, and the players who have taken it from there.

Audio Production Tips: Getting the Sound Right at the Source provides practical and accessible information detailing the production processes for recording today ' s bands. By demonstrating how to "get the sound right at the source," author Peter Dowsett lays the appropriate framework to discuss the technical requirements of optimizing the sound of a source. Through its coverage of critical listening, pre-production, arrangement, drum tuning, gain staging and many other areas of music production, Audio

Production Tips allows you to build the wide array of skills that apply to the creative process of music production. Broken into two parts, the book first presents foundational concepts followed by more specific production advice on a range of instruments. Key features: Important in-depth coverage of music theory, arrangement and its applications. Real life examples with key references to the author ' s music production background. Presents concepts alongside the production of a track captured specifically for the book. A detailed companion website, including audio, video, Pro Tools session files of the track recording process, and videos including accompanying audio that can be examined in the reader ' s DAW. Please visit the accompanying companion website, available at [www.audioproductiontips.com](http://www.audioproductiontips.com), for resources that further support the book ' s practical approach.

Backing up SAP software environments is increasingly challenging in today's 24x7 enterprises. Even more challenging is restoring these environments. Applications and databases grow ever larger, putting increasing strain on the management infrastructure. Using hardware-assisted copy mechanisms to perform fast backups and restores is one way to address these issues. Tivoli Storage Manager, along with

associated products, allows you to leverage FlashCopy to perform fast backups, almost "instant" restores, as well as database cloning for testing and other purposes. These applications are fully integrated with SAP software in DB2 UDB and Oracle environments, providing reliable, intelligent techniques for data protection. This IBM Redbooks publication will help you plan, configure, and run IBM Tivoli Storage Manager for Advanced Copy Services and associated applications in your SAP software environments.

Over the last few years, IBM® IMSTM and IMS tools have been modernizing the interfaces to IMS and the IMS tools to bring them more in line with the current interface designs. As the mainframe software products are becoming more integrated with the Windows and mobile environments, a common approach to interfaces is becoming more relevant. The traditional 3270 interface with ISPF as the main interface is no longer the only way to do some of these processes. There is also a need to provide more of a common looking interface so the tools do not have a product-specific interface. This allows more cross product integration. Eclipse and web-based interfaces being used in a development environment, tooling using those environments provides productivity improvements in that the interfaces are common and familiar. IMS and IMS tools developers are making use of those environments to provide tooling that will perform some of the standard DBA functions. This book will take some selected processes and show how this new tooling can be used.

This will provide some productivity improvements and also provide a more familiar environment for new generations DBAs. Some of the functions normally done by DBA or console operators can now be done in this eclipse-based environment by the application developers. This means that the need to request these services from others can be eliminated. This IBM

Redbooks® publication examines specific IMS DBA processes and highlights the new IMS and IMS tools features, which show an alternative way to accomplish those processes. Each chapter highlights a different area of the DBA processes like: PSB creation Starting/stopping a database in an IMS system Recovering a database Cloning a set of databases

This IBM Redpaper publication is a comprehensive guide covering the IBM Power 520 server, machine type model 8203-E4A. The goal of this paper is to introduce this innovative server that includes IBM System i and IBM System p and new hardware technologies. The major hardware offerings include: - The POWER6 processor, available at frequencies of 4.2 GHz and 4.7 GHz. - Specialized POWER6 DDR2 memory that provides greater bandwidth, capacity, and reliability. - The 1 Gb or 10 Gb Integrated Virtual Ethernet adapter that brings native hardware virtualization to this server. - EnergyScale technology that provides features such as power trending, power-saving, capping of power, and thermal measurement. - PowerVM virtualization technology. - Mainframe continuous availability brought to the entry server environment. This Redpaper expands the current set of IBM Power System documentation by providing a desktop reference that offers a detailed technical description of the Power 520 system. This Redpaper does not replace the latest marketing materials and tools. It is intended as an additional source of information that, together with existing sources, can be used to enhance your knowledge of IBM server solutions.

Throughout the mining and processing of minerals, the mined ore undergoes a number of crushing, grinding, cleaning, drying, and product sizing operations as it is processed into a marketable commodity. These operations are highly mechanized, and both individually and collectively these processes can generate large amounts of dust. If control technologies are inadequate, hazardous levels of respirable dust may be liberated into the work environment, potentially exposing workers. Accordingly, federal regulations are in place to limit the respirable dust exposure of mine workers. Engineering controls are implemented in mining operations in an effort to reduce dust generation and limit worker exposure.

In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals, we must invest in research, encourage innovation, and grow a strong and talented science and technology workforce. *Expanding Underrepresented Minority Participation* explores the role of diversity in the science, technology, engineering and mathematics (STEM) workforce and its value in keeping America innovative and competitive. According to the book, the U.S. labor market is projected to grow faster in science and engineering than in any other sector in the coming years, making minority participation in STEM education at all levels a national priority. *Expanding Underrepresented Minority Participation* analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce. Although minorities are the fastest growing segment of the population, they are underrepresented in the fields of science and engineering. Historically, there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy. *Expanding Underrepresented Minority Participation* suggests that the federal government, industry, and post-secondary institutions work collaboratively with K-12 schools and school systems to increase minority access to and demand for post-secondary STEM education and technical training. The book also identifies best practices and offers a comprehensive road map for increasing involvement of

underrepresented minorities and improving the quality of their education. It offers recommendations that focus on academic and social support, institutional roles, teacher preparation, affordability and program development.

IBM DB2 Recovery Expert for Multiplatforms provides an enhanced data recovery solution that enables more precise recovery operations while reducing disruption during the recovery process. DB2 Recovery Expert creates and maintains additional recovery assets that you can use for intelligent analysis of both DB2 and DB2 Recovery Expert assets to find the most efficient recovery path. DB2 Recovery Expert facilitates the process of rebuilding your database assets, such as tables, indexes, and data, to a specified point-in-time, often without taking the database or the business operations offline. This IBM Redbooks publication shows you how to install and implement DB Recovery Expert and the Fast Backup and Grouper components. It also describes the DB2 Recovery Expert assets and how to manage these assets. In addition, this book explains the summary and detail reports of Log Analysis, including the DPF environment. It shows, in detailed examples, point-in-time recovery and cloning of tables, table spaces, and databases. Please note that the additional material referenced in the text is not available from IBM.

In *Race and Excellence*, Ezra Griffith, also an African American professor of psychiatry, engages Pierce in a dialogue with the goal of clarifying the interconnection between the personal and the professional in the lives of both black scholars. The text melds the story of Pierce's life and his achievements, with particular attention to his theories about the predictable nature of racist behavior and the responses of oppressed groups. Having earned his doctorate a generation after Pierce, Griffith approaches his conversation with Pierce as a face-to-face meeting between mentor and student. -- Provided by publisher.

This IBM® Redbooks® publication examines the IBM Tivoli® Directory Server for z/OS®. IBM Tivoli Directory Server is a powerful Lightweight Directory Access Protocol (LDAP) infrastructure that provides a foundation for deploying comprehensive identity management applications and advanced software architectures. This publication provides an introduction to the IBM Tivoli Directory Server for z/OS that provides a brief summary of its features and an examination of the possible deployment topologies. It discusses planning a deployment of IBM Tivoli Directory Server for z/OS, which includes prerequisites, planning considerations, and data stores, and provides a brief overview of the configuration process. Additional chapters provide a detailed discussion of the IBM Tivoli Directory Server for z/OS architecture that examines the supported back ends, discusses in what scenarios they are best used, and provides usage examples for each back end. The discussion of schemas breaks down the schema and provides guidance on extending it. A broad discussion of authentication, authorization, and security examines the various access protections, bind mechanisms, and transport security available with IBM Tivoli Directory Server for z/OS. This chapter also provides an examination of the new Password Policy feature. Basic and advanced replication topologies are also covered. A discussion on plug-ins provides details on the various types of plug-ins, the plug-in architecture, and creating a plug-in, and provides an example plug-in. Integration of IBM Tivoli Directory Server for z/OS into the IBM Workload Manager environment is also covered. This publication also provides detailed information about the configuration of IBM Tivoli Directory Server for z/OS. It discusses deploying IBM Tivoli Directory Server for z/OS on a single system, with examples of configuring the available back

ends. Configuration examples are also provided for deploying the server in a Sysplex, and for both basic and advanced replication topologies. Finally it provides guidance on monitoring and debugging IBM Tivoli Directory Server for z/OS.
