Celebrate of the history and significance of both the Fender Telecaster and Stratocaster for the company's 75th anniversary in this combined edition of Dave Hunter's two best-selling books! The Fender Telecaster, created in Les Fender's Fullerton, California, workshop and introduced in 1950, is a working-class hero and the ultimate blue-collar guitar. It wasn't meant to be elegant, pretty, or sophisticated. Designed to be a utilitarian musical instrument, it has lived up to that destiny. In the hands of players from Muddy Waters to James Burton, Bruce Springsteen to Joe Strummer, the Telecaster has made the music of working people—country, blues, punk, rock 'n' roll, and even jazz. Fender's Stratocaster is arguably the number-one instrument icon of the guitar world. When introduced in 1954, its offset space-age lines, contoured body, and three-pickup configuration set the music world on its ear—it was truly unlike any guitar that had come before. In the hands of the world's most beloved players, such as Buddy Holly, Eric Clapton, Ike Turner, and, yes, Jimi Hendrix, the Stratocaster has since become a popular instrument of choice among rock, blues, jazz, and country players and, not coincidentally, is also one of the most copied electric guitars of all time. In this authoritatively written, painstakingly curated, and gloriously presented combined edition to celebrate Fender's 75th anniversary, author Dave Hunter covers both of the guitar's histories from concept, design, and model launch through its numerous variations and right up to the present. The story is richly illustrated with archival images, musicians in action, studio shots, memorabilia, and profiles of over 50 Tele and Strat slingers through the ages. With its unprecedented level of detail and stunning visuals, Fender Telecaster and Stratocaster is the only book tribute worthy of the world's two greatest guitars.

Excerpt: The Jazz Bass (or J Bass) was the second model of electric bass created by Leo Fender. The bass is distinct from the Precision Bass in that its tone is brighter and richer in the midrange and treble with less emphasis on the fundamental harmonic. Because of this, many bass players who want to be more "forward" in the mix (including smaller bands such as power trios) prefer the Jazz Bass. The sound of the Fender Jazz Bass has been fundamental in the development of signature sounds in certain musical genres, such as funk, disco, reggae, blues, heavy metal and jazz fusion. First introduced in 1960 as the Deluxe Model, it was marketed as a stablemate to the Jazzmaster guitar which was also marketed as a Deluxe Model in its own right. It was renamed the Jazz Bass as Fender felt that its redesigned neck - narrower and more rounded than that of the Precision Bass - would appeal more to jazz musicians. The Jazz Bass has two single coil pickups with two pole pieces per string. This gave the bass a stronger treble sound to compete with the Rickenbacker bass, which had been introduced in 1957 and was famously "bright." As well as having a slightly different, less symmetrical and more...
