ideal for courses and exams run by other awarding bodies. This revised edition overhauls the coverage of general skills and advanced diagnostic techniques. It also includes a new chapter about electric and hybrid vehicles and advanced driver-assistance systems, along with new online learning activities. Unlike current textbooks on the market, this takes a blended-learning approach, using interactive features that make learning more enjoyable and effective. It is ideal to use on its own but when linked with IMI eLearning online resources, it provides a comprehensive package that includes activities, video

footage, assessments and further reading. Information and activities are set out in sequence to meet teacher and learner needs, as well as qualification requirements. Advanced Automotive Fault Diagnosis is the

only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition

is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle

Vintage U.S.-made cars on the streets of Havana provide a common representation of Cuba. Journalist Richard Schweid, who traveled throughout the island to research the

story of motor vehicles in Cuba today and yesterday, gets behind the wheel and behind the stereotype in this colorful chronicle of cars, buses, and trucks. In his captivating, sometimes gritty, voice, Schweid blends previously untapped historical sources with his personal experiences, spinning a car-centered history of life on the island over the past century. Packard, Studebaker,

Edsel, De Soto: cars long extinct in the United States can be seen at work every day on Cuba's streets. Havana and Santiago de Cuba today are home to some 60,000 North American cars, all dating back to at least 1959, the year the Cuban Revolution prevailed. Though hardly a new part has arrived in Cuba since 1960, the cars are still on the road, held together with

mechanical ingenuity and willpower. Visiting car mechanics, tracking down records in dusty archives, and talking with car-crazy Cubans of all types, Schweid juxtaposes historic moments (Fidel Castro riding to the Bay of Pigs in an Oldsmobile) with the quotidian (a weary mother's two-cent bus ride home after a long day) and composes a rich, engaging picture of the Cuban people and their history. The

narrative is complemented by fifty-two historic black-and-white photographs and eight color photographs by contemporary Cuban photographer Adalberto Roque.
