Designed to suit new regulations, after ground-effect cars were banned at the end of 1982, the BT52 was very distinctive, with short, angular sidepods and a dart-shaped profile. During the 1983 season, the innovative Brabham team, with now F1 supremo Bernie Ecclestone at the helm, introduced the first high-pressure fuel rig seen in F1, to speed up refuelling stops, and used 'ovens' to pre-heat tyres prior to pitstops. This manual provides a fascinating insight into the design, evolution, operation and maintenance of the Brabham BT52.

Conceived by Colin Chapman, the Lotus 72 is one of the most successful Formula 1 cars ever made. This innovative car - with its wedge-shaped profile, side-mounted radiators and inboard front brakes - was driven during 1970 by Jochen Rindt, Formula 1's posthumous World Champion, and also gave Emerson Fittipaldi the World Champion's crown in 1972. Here, in this new Haynes Manual, is a unique perspective on what it takes to restore, maintain and race a Lotus 72, as well as an insight into the design and engineering of this legendary racing car.

What is innovation? The dictionary defines it as "renewal through the use of new processes and technologies." In advertising, everything is an innovation. But what is truly innovative? Since 1930, the Pininfarina design firm of Turin, Italy, has been answering that question. This is where the Cistalia 202 was developed, the first vehicle to be added to MoMA's permanent collection. The list goes on: the interior of the new stadium for Juventus Turin, the Nash Healey Spider seen in Billy Wilder's *Sabrina*, and the legendary Ferrari Dino 246 and Ferrari Testarossa. However, Pininfarina is not resting on its laurels, but blasting full speed ahead into the future with an expanded portfolio while honoring its heritage. Whether it's a solution for sustainable mobility, interior designs, or household gadgets, all Pininfarina projects bear an unmistakable signature. To visually celebrate the history and influence of Pininfarina, there is no one better suited than a man who has made his own unmistakable mark on automotive photography. Gunther Raupp has spent 30 years photographing cars for Ferrari's official calendars, which enjoy a cult following among the experts. He has two successful books with teNeues, the most recent being *The Ferrari Book*. As a star photographer and connoisseur of industrial design, Raupp showcases a company that embodies true Italianità.

The Jaguar XJR-9 is the Group C sports racing car built by Jaguar for the 1988 racing season, winning on its debut at the Daytona 24 Hours, and going on to take victory at the Le Mans 24 Hours (Jaguar's first win at the French classic since 1957). The car also took Jaguar to victory in the 1988 Teams' World Championship, and Drivers' World Championship with Martin Brundle. Works cars ran in the American IMSA Championship (running in Castrol livery), as well as the World Sports Car Championship. The XJR-9 is one of the most evocative sports-racing cars of the 1980s, thanks to its success, instantly recognizable Silk Cut livery, and unforgettable V12 engine note. This Manual tells the complete design and engineering story of the XJR series of sports-racing cars, focusing on the XJR-9, and featuring extensive input from many of the engineers and drivers involved.
