What happened when America's richest car company, producing many thousands of cars per year, went head-to-head with Ferrari of Italy in the mid '60s? This is the story of an unstoppable force coming up against the stubbornness of an immovable object – that is, Ford against Ferrari. Enzo Ferrari, whose company produced fewer than four hundred cars per year in 1963, wasn't going to bow to Ford after he had turned down its offer to buy his company. The only place left to duke it out was on the racetracks of the world ... and one in particular: Le Mans '66.

"Ferrari is simply the world's best known and most desirable pure bred sports car. Everyone knows Ferrari as the ultimate exotic, yet they may not know the individual models and details behind them. This is the first book of its kind to showcase every Ferrari road car since 1947, complete with technical specs, options and production numbers, all in full color. This reference sorts out the various engine families from the original 4 cylinders through the quintessential V-12s, plus model naming and numbering, special models, and unique facts. Standard Catalog of Ferrari: 1947-2003 includes an exclusive 6 condition price guide from the editors of Old Cars Price Guide."

Alfa Romeo 916 GTV and Spider traces the complete story of the Alfa Romeo GTV and Spider models produced between 1994 - 2005, commonly known to enthusiasts by the manufacturer's project code as the 916 series. The 916 models would always be controversial - they replaced the iconic Spider, the best-selling Alfa Romeo sports model of all time, and the brand-establishing Alfetta GTV. Sharing components and a platform with a

humble Fiat hatchback, would the cars ever be considered 'real' Alfa Romeos? The cars were critically acclaimed, and, though they faced tough competition in the late 1990s from the likes of the Audi TT, they remained in production for over a decade. Topics covered include: Full history of the 916 series GTV and Spider models; Design, development and evolution of the models from 1994 - 2005; Participation of the GTV in motorsport; Model variations in depth through all three facelifts; Previously unpublished production figures, and chassis numbers for the desirable, limited-edition GTV Cup model. Comprehensively researched guide to the entire lifespan of the 916 series. Will appeal to Alfa Romeo and automotive enthusiasts. The history and design process are examined along with an in-depth guide to each of the model variants produced. The cars' current position in the classic car market is considered. Superbly illustrated with 240 colour photographs. Robert Foskett is a life-long Italian car enthusiast with a special interest in Alfa Romeo.

Ferraris are best known for their sleek, stunning, and curvaceous design, eye-watering price tag, and standard rosso corsa (race red) paintwork. From the very first Ferrari – the 1947 Tipo 125 S racing sports car – through to the more recent 2013 LaFerrari mild hybrid limited edition road car, Ferrari have continued to astound enthusiasts and critics alike with their evolutionary performance road vehicles and unrivalled Formula 1 racing pedigree. Yet, motoring history might have been so different – Enzo Ferrari was a reluctant manufacturer. He initially built and sold production vehicles purely to fund his Scuderia Ferrari racing team. For every success on the track, though, came a wave of innovation to be applied to their production cars. The F1 gearbox was one of the most important technological transfers from racing car to grand tourer and was quickly followed by traction control. The next generation of Ferraris is set to be turbocharged, as strict consumption and emission regulations will affect the future of engineering and there are even electric cars in Ferrari ' s sights too. The agenda includes more special editions, tailor-made varieties, and one-off models, although their core business will still lie in the GT road car market. It is a boyhood dream of many youngsters and grown men to own, or at least drive, a Ferrari. Unfortunately, the majority do not go on to achieve this ambition but this book might go some way to filling the void and keeping the dream alive...

Ferrari means red. It means racing. Excellence, luxury, and performance. Less well-known is the man behind the brand. For nearly seventy years, Enzo Ferrari dominated a motor-sports empire that defined the world of high-performance cars. Next to the Pope, Ferrari was the most revered man in Italy. But was he the benign padrone portrayed by an adoring world press at the time, or was he a ruthless despot, who drove his staff to the edge of madness, and his racing drivers even further? Brock Yates's definitive biography penetrated Ferrari's elaborately constructed veneer and uncovered the truth behind Ferrari's bizarre relationships, his work with Mussolini's fascists, and his fanatical obsession with speed.

We ' re told that the future will be brighter. But what if human happiness really lies in the past? Hobart, 2022: a city with a declining population, in the grip of a dark recession. A rusty ship sails into the harbour and begins to unload its cargo on the site of the once famous but now abandoned Gallery of Future Art, known to the world as GoFA. One day the city ' s residents are awoken by a high-pitched sound no one has heard for two generations: a factory whistle. GoFA ' s owner, world-famous billionaire Dundas Faussett, is creating his most ambitious installation yet. He ' s going to defeat technology ' s dominance over our lives by establishing a new Year Zero: 1948. Those whose jobs have been destroyed by Amazon and Uber and Airbnb are invited to fight back in the only way that can possibly succeed: by living as if the internet had never been invented. The hold of Bezos, Musk, Zuckerberg and their ilk starts to loosen as the revolutionary example of Factory 19 spreads. Can nostalgia really defeat the future? Can the little people win back the world? We are about to find out. ' Like Orwell, of whom he has written so brilliantly, Dennis Glover ' s work is charged with courage, intelligence and purpose. He is the complete writer, and one made for our times. ' —Don Watson ' Savagely hilarious and unlike anything else you ' ll read this year. It boils with the anger of the present moment. The story of the 1957 Pescara Grand Prix - the last race of the heroic age of motor racing There has been much talk of how Grand Prix motor racing has become rather dull with big name, big brand winners ousting out all competition. But it wasn't always so. Once a romantic sport, motor sport produced heroes whose where individual skill and daring were paramount. The 1957 Pescara Grand Prix marked the end of an era in motor racing. Sixteen cars and drivers raced over public roads on the Adriatic coast in a three-hour race of frightening speed and constant danger. Stirling Moss won the race, beating the great Juan Manuel Fangio (in his final full season) and ending years of supremacy by the Italian teams of Ferrari and Maserati. Richard Williams brings this pivotal race back to life, reminding us of how far the sport has changed in the intervening fifty years. The narrative includes testaments from the four surviving drivers who competed - Stirling Moss, Tony Brooks, Roy Salvadori and Jack Brabham.

This book is the first to provide balanced examination of both pediatric liver disease and liver transplantation – two topics that are inherently related, given that most chronic liver disorders eventually require organ replacement. The different forms of liver disease encountered in the pediatric age group are first discussed in a series of disease-specific chapters that have a reader-friendly, uniform structure covering pathophysiology, diagnostic and treatment algorithms, clinical cases, and transition to adult

care. Key topics in the field of liver transplantation are then addressed. Examples include indications and contraindications, surgical techniques and complications, immunosuppression, in pediatric liver transplantation, acute and chronic rejection and allograft dysfunction, and CMV and EBV infection in transplant recipients, long-term graft injury and tolerance. A section on pediatric hepatology across the world includes chapters presenting the features and management of pediatric liver disease in South-America, Africa and Asia. A closing section considers what the future holds for pediatric liver disease and its management, including novel genetic testing, cell therapy and gene therapy. Pediatric Hepatology and Liver Transplantation will be of value for a range of practitioners, from residents making their first approach to pediatric liver disease through to specialists working in transplantation centers.

This document, assembled from the lived experience of Ferrari 458 owners, serves as a comprehensive guide for prospective 458 purchasers. The checklist is inclusive of critical and minor flaws observed among 458s and will assist you in making an informed decision. I want to empower your selection process with knowledge gleaned from my ownership, help you understand price differentials within the marketplace, and raise awareness of maintenance concerns associated with 458s. Although I feel this guide is exhaustive, some items may be missing or difficult to check prior to purchase. This is a living document that will be updated periodically to reflect my experience of ownership and DIY maintenance. All future updates are included with the purchase of this document. It's tempting to save money by using this guide in lieu of a Pre Purchase Inspection (PPI) provided by a professional mechanic. For most older Ferrari purchases, I believe a PPI is critical but on the more modern Ferraris, I've found them to be less helpful and sometimes a waste of money. Please do your own due diligence and determine what the PPI will include before you agree to have the service done. If you are unsure about whether or not the PPI is worth the money, you can contact me to set up consulting time and I can review the PPI. Finally, do not discount your emotional experience throughout your considerations. It can feel exhilarating to purchase a 458, but that state of mind can interrupt better judgement. This guide can help you maintain objectivity while evaluating a car you have cultivated bias for. Please bear in mind that Ferraris are still just cars, machines that can and will wear and break. However, like any ordinary car, a Ferrari can be thoughtfully maintained to provide many years and miles of use. You should scale your expectations based on your desire for perfection. If you are in search of an immaculate 458, then you'll want to ensure most items on this list are in excellent repair. If you are looking for a driver's car, then your threshold of tolerance for minor functional or aesthetic flaws may be higher. Bear in mind, lower miles can mean more problems. Cars that have sat unmoved for long periods of time tend to have more issues than those that have been driven and maintained properly. This guide will help expose these issues and let you decide if they are deal-breakers, negotiation points, or simply items to resolve (or even just accept as is) after purchase. People ask me all the time, "Should I buy this Ferrari?" That is a question I cannot answer for you. I can only help inform your decision with knowledge gleaned from my own experience. The decision is ultimately yours to make, but in most cases, I don't think you'll regret it.

The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.

Ferrari 308, 328 and 348 traces the complete story of the four models of Ferrari's V8-powered sports cars between 1973 and 1995 - the cars that broke Ferrari out of the V6 and V12 moulds, with the V8 becoming Ferrari's most popular engine choice in the final decade of the twentieth century. The book covers the history and development of Ferrari's new V8 engine, and the 308's daunting role as successor to the popular Dino. There are specification tables and production figures for the model variants, along with details of concept cars and other related models, and a review of competition exploits. The book also considers the cars' current position in the classic car market and offers insight into the rewarding ownership experience each of the models now represents. The book covers: design processes and styling by Bertone and Pininfarina; concept cars and rivals; the cars in competition; owning and running the cars today. With a guide through the entire lifespan of these exciting V8-powered sports cars and superbly illustrated with 295 colour photographs, this is essential reading for the Ferrari aficionado.
