Over the last 50 years, literally millions of GM cars and trucks have been built with Turbo 400 automatic transmissions. While these transmissions are respected for their durability and versatility, there always comes a

point where the old transmission shows signs of wear. At some point, even the best transmissions need to be rebuilt. Respected automotive technical author Cliff Ruggles takes readers through the complex rebuild procedure of GMs most popular rear-wheel drive automatic transmission in this great new book. Enthusiasts have embraced the reliable GM Turbo Hydra-Matic 400 three-speed automatics for years, and the popularity of these transmissions is not slowing down. With his proven style, Ruggles walks through the step-by-step rebuild and performance upgrade procedures in a series of full-color photos for each of these models. Time saving tips are part of every buildup. This is a welcome addition to your automotive library. Amateurs and professionals alike will appreciate the advice and guidance offered on every page. Even if you end up deciding to have a professional take care of your transmission repair and performance needs, this information is crucial to understanding how the power gets from the engine to the road.

This book tells the story of the cars which used the 3.2-litre and 3.4-litre editions of Ferrari's twin-overhead-camshaft V8 engine. Basically there were three ranges, the GTB/GTS models, their tb/ts replacements and the four-seater Mondial. The GT models appeared in the mid-seventies, re-engined in 1985 and continued until 1988. The 348 tb targa-top cars replaced them. The Mondial was equipped with the V8 in 1985 which it retained until 1989 when it was re-engineered to take the 3.4-litre engine. This is a book of contemporary road and comparison tests, specification and technical data, driver's impressions, model introductions and background. Models covered include: 328 GTS, 3.2 Mondial, 328 GTB, 3.2 QV Mondial, 348tb, Mondial t, Cabriolet, 348ts, F40.

Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part

TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas.

The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.

definitive truth, or get much closer to it. New time-controls involve competitive games being played to a finish in one session, so it is especially important that chess-players understand the key endgame principles. This book provides comprehensive assistance for any players wishing to study the endgame. In addition to a feast of detailed analysis, the authors emphasize the practical side of endgame play, describing rules of thumb, principles, and thinking methods. *Fundamental Chess Endings* is both the ideal endgame reference work, and a book that can profitably and enjoyably be read from start to finish. 174 pages with 145 illustrations, diagrams and charts, size 6-5/8 x 10-1/4 inches. This is a publication for those Ferrari enthusiasts that are tired of oversized and often overpriced coffee table books filled with page after page of photos of red Ferrari's and not much else. This book contains all the technical data and statistics for the majority of the 1948 to 1958 Ferrari road and race cars. It was compiled by a knowledgeable author who lived in Modena at the time that these cars were being constructed, who was personally acquainted with Enzo Ferrari and had access to the factory documents during that time period. It includes the author's road test experiences, technical specifications, tune up, adjustments, maintenance and repair information, detailed technical drawings, exploded views, wiring diagrams and lubrication charts. This book is a 'must have' for any Ferrari enthusiast or lucky owner of one of these early cars and should be in the library of any true Ferraristi. Originally published by Floyd Clymer in 1960 under the similar title of 'The Ferrari Owner's Handbook', its description left much to be desired. For example, of the 174 pages there are 90 pages that are much closer to a repair and maintenance manual. Consequently, it's more of a technical manual than a handbook. There are seven sections that cover both the road and race

---

cars constructed by Ferrari from 1948 to 1958. Section 1 - The authors driving experiences of the Type 166, Type 342 and 340 America and Type 375 America. Section 2 - Specifications for 41 road and race cars constructed by Ferrari from 1948 to 1958. Section 3 - Repair, Maintenance and tune up information. Section 5 - Valve Timing and Carburetor data. Section 6 - Acceleration times. Section 7 - Detailed component drawings, exploded views, Wiring Diagrams, Lube charts etc.

140 pages and more than 120 illustrations and charts, size 8.25 x 10.75 inches. This manual is a 2024 revised and expanded edition of Jim Riff's personal notes for the service and maintenance of the Ferrari 250 series. It includes repair data applicable to the 250GT, 250GTE, 250GTL, 250SWB and other similar models. After publishing Jim's original '250/GT Service & Maintenance' notes in 2006, we began to search for additional documentation relating to this series of Ferraris and we were fortunate enough to acquire copies of the factory 'Laycock Overdrive Service Manual for the 250GTE/330GT', plus additional Weber and Marelli documentation appropriate to the 250

series. This information has now been appended to Jim's 2006 publication to produce this revised and expanded 2024 edition. In addition, we were also able to obtain copies of the factory 250GT 'Directions for the Use and Upkeep' (owner's workshop manual) a 250GT 'Spare Parts Catalog' plus a copy of the 250GTE 'Operating, Maintenance and Service Handbook'. We have now compiled these three items into a single publication under ISBN 9781588502940. Obviously, while there will be some cross-duplication of the information contained in Jim Riff's manual, this additional compilation of three factory publications can be considered to be an extension of Jim's work and, when used in conjunction with each other, they create the most comprehensive service, maintenance and overhaul manual available for the Ferrari 250 series of automobiles. Owners and enthusiasts of these early Ferrari automobiles may also find ISBN 9781588502728 a 'Ferrari Handbook' to be of interest. This publication contains technical data and statistics for the majority of the 1948 to 1958 Ferrari road and race cars. It also includes 60 pages of component drawings, wiring diagrams, lubrication and brake schematics, exploded views etc. for those early models.

In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh

---

“ Boom ” Trenchard of Great Britain and William “ Billy ” Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet ’ s central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.
