Few arguments in biomedical experimentation have stirred such heated debate in recent years as those raised by animal research. In this comprehensive analysis of the social, political, and ethical conflicts surrounding the use of animals in scientific experiments, Barbara Orlans judges both ends of the spectrum in this debate -- unconditional approval or rejection of animal experimentation -- to be untenable. Instead of arguing for either view, she thoughtfully explores the ground between the extremes, and convincingly makes the case for public policy reforms that serve to improve the welfare of laboratory animals without jeopardizing scientific endeavor. This book presents controversial issues in a balanced manner based on careful historical analysis and original research. Different mechanisms of oversight for animal experiments are compared and those that have worked well are identified. This compelling work will be of interest to biomedical scientists, ethicists, animal welfare advocates and other readers concerned with this critical issue.

And love is definitely out of the question while she works her way through college to earn her occupational therapist certification. Besides, her mother's string of failed relationships and broken promises prove romance is not worth risking her heart--even when she begins to care deeply for single dad Ryan O'Keefe. Four years after his girlfriend, Shana, became

pregnant, Ryan still can't believe he's a father...and can't imagine being anything else. His daughter is the light of his life. Now if only Shana could embrace motherhood and the three become a real family.... Then Ryan receives shocking news about Shana, and his world is torn apart as he faces losing his daughter. Suddenly old feelings for Grace resurface, but is a whirlwind marriage of convenience the answer?

How does language comprise the implicit or explicit curriculum of teaching and learning in multicultural science settings? Building on a growing interest in the ways in which language and literacy practices interact with science teaching and learning to facilitate or obstruct successful student outcomes, this book contributes to scholarship on the role of language in developing classroom scientific communities of practice, expands that work by highlighting the challenges faced specifically by ethnic- and linguistic-"minority" students and their teachers in joining those communities, and showcases exemplary teaching and research initiatives for helping to meet these challenges. Offering teacher practitioners and researchers in the fields of science education and multicultural education lenses through which they can critically consider the myriad of classroom settings, instructional approaches, curricular materials, and scientific topics involved in what it means to teach science while pointedly addressing concerns about equity of educational opportunity, this volume serves as a powerful resource for linking theory and practice. End-of-chapter reflection questions and engagement activities facilitate discussion round these issues and provide rich opportunities for the reader to consider the implications of each chapter for science instruction and research and to apply insights developed in a real-world science teaching and learning contexts.

EdPsych Modules uses an innovative modular approach and case studies based on real-life classroom situations to address the challenge of effectively connecting theory and research to practice. Succinct, stand-alone modules are organized into themed units and offer instructors the flexibility to tailor the book's contents to the needs of their course. The units begin with a set of case studies written for early childhood, elementary, middle, and secondary classrooms, providing readers with direct insight into the dynamics influencing the future students they plan to teach. All 25 modules highlight diversity, emphasizing how psychological factors adapt and change based on external influences such as sex, gender, race, language, disability status, and socioeconomic background. The Fourth Edition includes over three hundred new references across all 25 modules, and expanded coverage of diversity in new diversity-related research.
