Although the size of the fetus
pig is smaller than that of the
human body the organization
of the major organs and the
functions of such organs are still
the same. This pig dissection is
designed to visually show
students the different systems
inside a pig and, indirectly, their
own bodies. Upon dissection

they see the heart, the major organ in the circulatory system that pumps the oxygenated blood around the body; the lungs, the major organ in the respiratory system that provides oxygen to ...
