In 1940, the strategically vital island of Malta was Britain's last toehold in the central Mediterranean, wreaking havoc among Axis shipping. Launching an air campaign to knock Malta out of the war, first Italy and then Germany sought to force a surrender or reduce the defences enough to allow an invasion. Drawing on original documents, multilingual aviation analyst Ryan Noppen explains how technical and tactical problems caused the original Italian air campaign of 1940–41 to fail, and then how the German intervention came close to knocking Malta out of the war. Using stunning full colour artwork, this fascinating book explains why the attempt by the Axis powers to take the British colony of Malta ultimately failed.

The Big Book of Tiny Cars presents entertaining profiles of automotive history’s most famous—and infamous—microcars and subcompacts from 1901 to today. Illustrated with photos and period ads.

Guinness Book of World Records Veloce Publishing Ltd

Available again after a long absence! Always big on character and charm, Fiat ’ s little cars played an important international roll in providing affordable and practical private transport for millions who had previously thought their dream impossible. With particular emphasis on the now classic 600 and Nuova 500 cars, this book tells the full story of these ‘ baby ’ Fiats. Built, and exported to, many countries outside of the marque ’ s native Italy, over 6.5 million Topolinos, 600s and Nuova 500s were sold, and an amazing number survive to this today. Also covered are the wonderful models built on these cars ’ tiny chassis by Italy ’ s leading coachbuilders, and the motorsport success achieved by the Abarth versions of the little cars that everybody loves.

In the 1950s and early '60s Modena was at the center of the Italian sports car and GP universe, as were Ferrari, Maserati, OSCA & others. Relive the period of the decline and rebirth of Italy's racing prowess in Modena Racing Memories. Author Graham Gauld was in Modena during that era. The relationships he established, photos he produced, and the insight he acquired allow him to deliver this account of the exciting cars and racing luminaries of that legendary era.

The Motor Ship Bantam Books

In deciding which models to choose for inclusion in this book selected from Fiat's huge inventory, the author concentrated on three criteria - greatness, size and emotion. Where size is an easy parameter to qualify, greatness is more complicated because it is a combination of of both the manufacturer's and the public's opinion. A car that is highly regarded by the public may not have been a commercial success and vice verse. A truly great car is one that works well for both parties. Emotion may be considered to be an element of greatness in that the public's 'love' for a car is a fantastic benefit for a manufacturer and must be treasured. Fiat have made the mistake of 'improving' an icon on several occasions only to find that public opinion went against them. Fortunately Fiat has been magnanimous enough to respond by giving the car buying public more of what it wants. As long as they continue to do so then Fiat's reputation as the world's greatest small car manufacturer is set to continue. The author chose the Topolino as the starting point as the car fulfils all the criteria and it was the first Fiat built in the late 1930s to satisfy the Italian public's new-found desire for mobilisation. The old conventions of car production were turned upside down with the arrival of the 600 which revolutionised car production techniques and maximised on passenger space and performance at minimal cost. These principals continued via a succession of models which include the 500, 850, 126, 127

through to more recent models like the Cinquecento and Seicento. Running in parallel with these 'cheeky' Fiats, this book covers a range of slightly larger cars that were built in huge numbers. Though rather staid in appearance, the 1950s Millecento was family transport for millions of Italians covering three decades, four when the Indian-built cars are included. Similarly the 128, Panda and Uno were 'the' Italian small cars of the '70s, '80s and '90s. Nuova Panda carries the banner to the present day.

After the Second World War Europe was in economic crisis and manufacturing lay in ruins. Materials were in short supply, and factories were forbidden from building aircraft. There was a need for cheap, economical transport, but acquiring a new car was difficult, and secondhand cars were not as readily available as they are today. By the 1950s, a myriad of economy cars had appeared on the market to fill this vacuum. Former aircraft companies – and even a refrigerator manufacturer – turned their hand to producing tiny cars that were often quirky and eccentric. Many of these little cars earned the nickname ‘ bubblecars' due to their bulbous shape. The 1960s brought with it new levels of affluence, and these microcars almost faded from view. But today, they are enjoying a resurgence of popularity, with many becoming highly-prized collectors items. Increased traffic levels and fuel prices, and a greater awareness of environmental issues, have also created demand for a new generation of microcars, and car makers have responded accordingly with exciting new designs. Illustrated with over 70 colour photographs, this book celebrates the best of these weird and wonderful motoring marvels.
