- Author Stephen Bayley considers the car as the greatest cultural and design phenomenon of the 20th century - Includes 60 of his popular monthly articles for Octane the leading classic car magazine

The automobile is the ultimate analog machine and mankind's most ingenious, seductive and damaging invention. For over a century, cars have provided reference points for our notions of style, status and desire. In design terms, the Age of Combustion was as rich and varied as architecture's Baroque - and far more popular. And now it is coming to an end, as the internal-combustion engine is superseded by the battery and cars become wheeled computers, running on AI not oil. Together with a wide-ranging introduction, this book reproduces 60 of Stephen Bayley's popular monthly columns for Octane, the outstanding classic car magazine where, for more than 10 years, he has provided the most

consistent and insightful commentary on car culture, often based on privileged access to industry insiders.

Minute for Murder Cambridge University Press

gazan's Annual Manual for Bartenders will be the go-to book for professional bartenders worldwide.

The Joy of Mixology, regan's groundbreaking 2003 work, has become required reading for staff members at many of today's top cocktail lounges, and this new book is, in many ways, a sequel to that book. The

---

Annual Manual is directed specifically at working bartenders, not consumers, and this not only makes it stand apart from every other book in this genre, it also adds appeal directly to the men and women who actually hold forth from behind the mahogany. The Annual Manual is a book that bartenders can call their own. Besides covering mixology and methodology essentials, regan also provides readers with in-depth lessons in bar philosophy in a section called The Mindful Bartender; he salutes a dozen "Fabulous Bartenders," details eight "Fabulous Innovators" in the industry, and provides recipes and commentary on the "101 Best New Cocktails" from bartenders all over the world. Add to this the first part of regan's serialized autobiography, giving you a glimpse into the first 17 years of his life (yes, he has a story about the day he was born!), and you have a veritable compendium of a book, put together with love and kisses by a bartender, for bartenders. If you're a bartender, your library isn't complete with this book.

Controversy (1564 – 1733) Porter Pub Limited  
This open access book explores commentaries on an influential text of pre-Copernican astronomy in Europe. It features essays that take a close look at key intellectuals and how they engaged with the main ideas of this qualitative introduction to geocentric cosmology. Johannes de Sacrobosco compiled his *Tractatus de sphaera* during the thirteenth century in the frame of his teaching activities at the then recently founded University of Paris. It soon became a mandatory text all over Europe. As a result, a tradition of commentaries to the text was soon established and flourished until the second half of the 17th century. Here, readers will find an informative overview of these commentaries complete with a rich context. The essays explore the educational and social backgrounds of the writers. They also detail how their careers developed after the publication of

---

their commentaries, the institutions and patrons they were affiliated with, what their agenda was, and whether and how they actually accomplished it. The editor of this collection considers these scientific commentaries as genuine scientific works. The contributors investigate them here not only in reference to the work on which it comments but also, and especially, as independent scientific contributions that are socially, institutionally, and intellectually contextualized around their authors.

What is the feminine genius, and what does it look like? Is it meant for each and every woman?

2002 to 2005 Grupo Planeta (GBS)

The McLaren MP4/4 is the iconic Honda V6 turbo-powered F1 car built by McLaren for the 1988 grand prix season, driven by Ayrton Senna and Alain Prost. Remarkably, the car won all but one race during 1988, and took McLaren 's then-new recruit Senna to his first Drivers ' World Championship after a season-long battle with team-mate Prost.

McLaren achieved an astonishing 10 one – two finishes with the car, and suffered only two car-related retirements during the season. The MP4/4 is still statistically the most dominant F1 car ever built. Ironically, the fact that McLaren was already an enormously

---

successful and well-resourced team prior to 1988 has led to the assumption that producing another winning car in the form of the MP4/4 was simply business as usual. The truth is rather different, with many challenges along the way, mistakes to resolve and, as ever in motor racing, an element of luck, all playing a part in the MP4/4 ' s extraordinary success. A wealth of previously unpublished archive material, including original technical drawings and team documentation, provides fascinating new insight into the design and build of the MP4/4. Produced with the full cooperation of McLaren, and unique access to a race-winning MP4/4 chassis, this manual tells for the first time the accurate story of the design, engineering and operation of one of F1 ' s most iconic cars, featuring extensive and often candid input from the designers, engineers and drivers involved. The McLaren story: Brief history of McLaren prior to the MP4/4 and subsequent history to the present day. Design and build of the MP4/4: The full story of how a completely new car, along with a one-off Honda engine, were designed and built for the 1988 season. The MP4/4 in action: A race-by-race account of the MP4/4 ' s performance in the 1988 World Championship. The anatomy of the MP4/4: Chassis, aerodynamics, suspension, steering, brakes, Honda engine, transmission, wheels and tyres, cockpit and electrics. The drivers: Insight from Alain Prost and test-driver Emanuele Pirro, plus a profile of Ayrton Senna with thoughts from his former teammates. Appendices: Specifications, race results and statistics and
