This open access book explores commentaries on an influential text of pre-Copernican astronomy in Europe.

It features essays that take a close look at key intellectuals and how they engaged with the main ideas of this qualitative introduction to geocentric cosmology. Johannes de Sacrobosco compiled his *Tractatus de sphaera* during the thirteenth century in the frame of his teaching activities at the then recently founded University of Paris. It soon became a mandatory text all over Europe. As a result, a tradition of commentaries to the text was soon established and flourished until the second half of the 17th century. Here, readers will find an informative overview of these commentaries complete with a rich context. The essays explore the educational and social backgrounds of the writers. They also detail how their careers developed after the publication of their commentaries, the institutions and patrons they were affiliated with, what their agenda was, and whether and how they actually accomplished it. The editor of this collection considers these scientific commentaries as genuine scientific works. The contributors investigate them here not only in reference to the work on which it comments but also, and especially, as independent scientific contributions that are socially, institutionally, and intellectually contextualized around their authors.

When Does it

Pay to be Green? JHU Press
Firstborn of Venice explores issues that are political in the broadest sense: legal institutions and administrative practices, fiscal politics, the consolidation of elites, ecclesiastical management, and the contrasting governing ideologies of ruler and subjects.

The McLaren MP4/4 is the iconic Honda V6 turbo-powered F1 car built by McLaren for the 1988 grand prix season, driven by Ayrton Senna and Alain Prost. Remarkably, the car won all but one race during 1988, and took McLaren's then-

new recruit Senna to his first Drivers ' World Championship after a season-long battle with team-mate Prost. McLaren achieved an astonishing 10 one – two finishes with the car, and suffered only two car-related retirements during the season. The MP4/4 is still statistically the most dominant F1 car ever built. Ironically, the fact that McLaren was already an enormously successful and well-resourced team prior to 1988 has led to the assumption that producing another winning car in the form of the

MP4/4 was simply business as usual. The truth is rather different, with many challenges along the way, mistakes to resolve and, as ever in motor racing, an element of luck, all playing a part in the MP4/4 ' s extraordinary success. A wealth of previously unpublished archive material, including original technical drawings and team documentation, provides fascinating new insight into the design and build of the MP4/4. Produced with the full cooperation of McLaren, and unique access to a race-winning MP4/4 chassis, this manual tells for the

first time the accurate story of the design, engineering and operation of one of F1 ' s most iconic cars, featuring extensive and often candid input from the designers, engineers and drivers involved. The McLaren story: Brief history of McLaren prior to the MP4/4 and subsequent history to the present day. Design and build of the MP4/4: The full story of how a completely new car, along with a one-off Honda engine, were designed and built for the 1988 season. The MP4/4 in action: A race-by-race account of the MP4/4 ' s performance in the

1988 World Championship. The anatomy of the MP4/4: Chassis, aerodynamics, suspension, steering, brakes, Honda engine, transmission, wheels and tyres, cockpit and electrics. The drivers: Insight from Alain Prost and test-driver Emanuele Pirro, plus a profile of Ayrton Senna with thoughts from his former teammates. Appendices: Specifications, race results and statistics and full chassis histories. Peugeot 306 Service and Repair Manual Haynes Publishing

In deciding which models to choose for inclusion in this book selected from Fiat's huge inventory, the author concentrated on three criteria - greatness, size and emotion. Where size is an easy parameter to qualify, greatness is more complicated because it is a combination of both the manufacturer's and the public's opinion. A car that is highly regarded by the public may not have been a commercial success and vice versa. A truly great car is one that works well for both parties. Emotion may be considered to be an element of greatness in that the public's 'love' for a car is a fantastic benefit for a manufacturer and must be treasured. Fiat have made the mistake of 'improving' an icon on several occasions only to find that public opinion went against them. Fortunately Fiat has been magnanimous enough to respond by giving the car buying public more of what it wants. As long as they continue to do so then Fiat's reputation as the world's greatest small car manufacturer is set to continue. The author chose the Topolino as the starting point as the car fulfils all the criteria and it was the first Fiat built in the late 1930s to satisfy the Italian

public's new-found desire for mobilisation. The old conventions of car production were turned upside down with the arrival of the 600 which revolutionised car production techniques and maximised on passenger space and performance at minimal cost. These principals continued via a succession of models which include the 500, 850, 126, 127 through to more recent models like the Cinquecento and Seicento. Running in parallel with these 'cheeky' Fiats, this book covers a range of slightly larger cars that were built in

huge numbers. Though rather staid in appearance, the 1950s Millecento was family transport for millions of Italians covering three decades, four when the Indian-built cars are included. Similarly the 128, Panda and Uno were 'the' Italian small cars of the '70s, '80s and '90s. Nuova Panda carries the banner to the present day. The Fiat 500 in New Zealand Fiat Cinquecento Owner's Workshop Manual A maintenance & repair manual for the DIY mechanic. Fiat Cinquecento Service and Repair Manual - Author Stephen Bayley considers the car as the greatest

cultural and design phenomenon of the 20th century - Includes 60 of his popular monthly articles for Octane the leading classic car magazine The automobile is the ultimate analog machine and mankind's most ingenious, seductive and damaging invention. For over a century, cars have provided reference points for our notions of style, status and desire. In design terms, the Age of Combustion was as rich and varied as architecture's Baroque - and far more popular. And now it is coming to an end, as the internal-combustion engine is superseded by the battery and cars become wheeled computers, running

on AI not oil.
Together with a wide-ranging introduction, this book reproduces 60 of Stephen Bayley's popular monthly columns for Octane, the outstanding classic car magazine where, for more than 10 years, he has provided the most consistent and insightful commentary on car culture, often based on privileged access to industry insiders.
Fiat Cinquecento Owner's Workshop Manual Haynes Manuals N. America, Incorporated
The anatomy theater is where students of the human body learn to isolate

structures in decaying remains, scrutinize their parts, and assess their importance.
Taking a new look at the history of anatomy, the author places public dissections alongside private ones to show how the anatomical theater was both a space of philosophical learning and a place where students learned to behave in a civil manner towards their teachers, their peers, and the corpse.
