The Rough Guide to Brazil European Society of Cardiology

- A supplementary guide for students who are learning how to evaluate reports of empirical research published in academic journals.
- Your students will learn the practical aspects of evaluating research, not just how to apply a laundry list of technical terms from their

textbooks.

- Each chapter is organized around evaluation questions. For each question, there is a concise explanation of how to apply it in the evaluation of research reports.
- Numerous examples from journals in the social and behavioral sciences illustrate the application of the evaluation questions. Students see actual examples of strong and weak features of published reports.
- Commonsense models for

evaluation combined with a lack of jargon make it possible for students to start evaluating research articles the first week of class. • The structure of this book enables students to work with confidence while evaluating articles for homework. • Avoids oversimplification in the evaluation process by describing the nuances that may make an article publishable even though it has serious methodological flaws. Students learn when and

why certain types of flaws may be tolerated. They learn why evaluation should not be performed mechanically. • This book received very high student evaluations when field-tested with students just beginning their study of research methods. • Contains more than 60 new examples from recently published research. In addition, minor changes have been made throughout for consistency with the latest edition of the Publication Manual of the

American Psychological Association.

There are a million cat stories in the naked city. This is one of them . . .
There are days when everything seems to go wrong—days that can crack even the hardest New Yorker: your cab breaks down, an address that Google Maps assures you exists is nowhere to be found, nobody you ask for directions has any idea what you're talking about, you lose your cell phone, it starts to rain and you can't find your

umbrella . . . Throw in adventures and trying to get three fussy felines to their first appointment with a new vet on time, and that's the day Gwen Cooper is having. As she treks the streets of Manhattan with her three cranky (and surprisingly heavy!) cats in tow, the real question isn't if she'll make it to the vet's office on schedule—it's whether her sanity will still be intact by the time she gets there. A hilarious account of one long day's wacky

misadventures, "Cat Carrier Tango" is the fourth installment in the Curl Up with a Cat Tale monthly story series from Gwen Cooper, author of the smash hit Homer's Odyssey: A Fearless Feline Tale. Meant to be read in a warm bubble bath, or with a glass of wine in hand, it's sure to keep you laughing from start to finish!
