16-year-old super-studier Nagi Umino, second-year student at the Meguro River Academy high school, was switched at birth. On his way to a dinner to meet his birth parents, he accidentally meets the brash, outspoken, Erika Amano, who is determined to make Nagi her fake boyfriend as she never wants to actually marry. But once Nagi makes it to dinner, he finds his parents have decided to resolve the hospital switch by conveniently having him marry the daughter his birth parents raised...who turns out to be none other than Erika herself! Nagi ' s crush Hiro has found out about his engagement to Erika! Hiro can ' t hide her surprise, but after she tells Erika about her own engagement, they form the “ engagement alliance. ” Meanwhile, Sachi is starting to feel suspicious of Hiro... And when the gang heads off to a study camp, their love square heads past the point of no return!

Antistatic sprays from several  
different manufacturers are  
examined. The sprays are examined  
for contamination potential (i.e.,  
outgassing and nonvolatile  
residue), corrosiveness on an  
aluminum mirror surface, and  
electrostatic effectiveness. In  
addition, the chemical composition  
of the antistatic sprays is  
determined by infrared  
spectrophotometry, mass  
spectrometry, and ultraviolet  
spectrophotometry. The results

---

show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this

document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

Il Sud, le sue donne, i suoi uomini, l'incoerenza di una natura dall'avvenenza feroce, in una vicenda che racconta la piccola borghesia calabrese, personificata dagli abitanti di un condominio di Palmi, cittadina affacciata sul mare della Costa Viola. La morte di un'inquilina ridà vita a un piccolo universo in cui le persone, per ossequio alle convenzioni sociali, svelano sfaccettature e meschinità del

genere umano. La notte di Natale viene spezzata da quattro colpi di pistola. Le reazioni alla morte di una vittima insospettabile si condensano in una curiosità pettegola, della quale il microcosmo del condominio è specchio fedele. Fondamentale il ruolo dei personaggi femminili, sono le donne a prendere le decisioni, a stanare ipocondrie e a strappare risate, spostando le tracce della storia verso direzioni impensabili. Destini spesso insopportabili vengono alleggeriti da una narrazione ironica che tratteggia disincantata la grettezza, l'empatia, l'amore e i tormenti.

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are

---

exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and

De debuutroman van Siska Mulder, nu in een voordelige editie An Woud vindt zichzelf opnieuw uit. Met succes. Ze wordt copywriter bij een bekend reclamebureau, met een hippe vriendenkring en een mooie minnaar. Het leven lijkt An toe te lachen, maar al snel komen er barsten in het fundament. Waarom heeft ze geen contact meer met haar familie? Hoe zit het met de zus die ze moedwillig verzwijgt? Langzamerhand wordt duidelijk waarom ze radicaal heeft gebroken met haar verleden. Het is maar de vraag of An Woud de zelfverzekerde, zorgeloze vrouw is voor wie ze zich uitgeeft. Zus is

een meeslepende roman, geschreven in een snelle stijl. Zijn mensen in staat om werkelijk te veranderen? Is het mogelijk om te ontsnappen aan je eigen verleden? Zus grijpt je bij de keel en laat je niet meer los.

The concept of imitatio - the imitation of classical and vernacular texts - was the dominant critical and creative principle in Italian Renaissance literature. Linked to modern notions of intertextuality, imitation has been much discussed recently, but this is the first book to offer a comprehensive survey of Italian Renaissance ideas on imitation, covering both

---

theory and practice, and both Latin and vernacular works. Martin McLaughlin charts the emergence of the idea, in vague terms in Dante, then in Petrarch's more precise reconstruction of classical imitatio, before concentrating on the major writers of the Quattrocento. Some chapters deal with key humanists, such as Lorenzo Valla and Pico della Mirandola, while others discuss each of the major vernacular figures in the debate, including Leonardo Bruni, Leon Battista Alberti, Angelo Poliziano, and Pietro Bembo. For the first time scholars and students have an up-to-date account of the development of Ciceronianism in both Latin and the vernacular before 1530, and the book provides fresh insights into some of the canonical works of Italian literature from Dante to Bembo.

The book investigates how, and which, forgiving road environments (FOR) and self-explaining road measures (SER) will contribute to increasing road safety and also increase network efficiency on the road. It presents both the general approach and the methodology for generating the possible FOR and SER measures. The book further discusses the prioritization and the testing methodologies, as well as the designing VMS methodology.

The next parts of the book present a few important examples: lane departure warning systems; intelligent speed adaptation systems and perception enhancement studies; designs of European pictorial signs, e.g. for VMS but also examples of designs of European road wordings; and finally how personalization can take place of VMS signs and wordings for the individual driver. The last part shows the final evaluation of FOR and SER, and detailed Multiple Criterion Analysis and Cost Benefit Analyses are performed on a number of FOR and SER measures. This results in the development of a set of guidelines, conclusions and recommendations for the future.
