This book provides practical information about web archives, offers inspiring examples for web archivists, raises new challenges, and shares recent research results about access methods to explore information from the past preserved by web archives. The book is structured in six parts. Part 1 advocates for the importance of web archives to preserve our collective memory in the digital era, demonstrates the problem of web ephemera and shows how web archiving activities have been trying to address this challenge. Part 2 then focuses on different strategies for selecting web content to be preserved and on the media types that different web archives host. It provides an overview of efforts to address the preservation of web content as well as smaller-scale but high-quality collections of social media or audiovisual content. Next, Part 3 presents examples of initiatives to improve access to archived web information and provides an overview of access mechanisms for web archives designed to be used by humans or automatically accessed by machines. Part 4 presents research use cases for web archives. It also discusses how to engage more researchers in exploiting web archives and provides inspiring research studies performed using the exploration of web archives. Subsequently, Part 5 demonstrates that web archives

should become crucial infrastructures for modern connected societies. It makes the case for developing web archives as research infrastructures and presents several inspiring examples of added-value services built on web archives. Lastly, Part 6 reflects on the evolution of the web and the sustainability of web archiving activities. It debates the requirements and challenges for web archives if they are to assume the responsibility of being societal infrastructures that enable the preservation of memory. This book targets academics and advanced professionals in a broad range of research areas such as digital humanities, social sciences, history, media studies and information or computer science. It also aims to fill the need for a scholarly overview to support lecturers who would like to introduce web archiving into their courses by offering an initial reference for students.

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to

light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. - Presents the latest requirements and challenges for personal transport applications - Gives an insight into the technical advances and research going on in the IC Engines field - Provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

I AM ZLATAN - the explosive, critically-acclaimed memoir of Zlatan Ibrahimovich, one of the world's most gifted and controversial footballers 'Guardiola has no balls. He drove me like a Fiat . . . I'm a Ferrari' Zlatan Ibrahimovic - professional football's most mercurial player, Swedish national hero, tabloid fixture, fashion icon, modern-day philosopher and black belt in Taekwondo. Born to a Muslim father from Bosnia, and a Catholic mother from Croatia, Zlatan recounts his extraordinary life story, from his poverty-stricken upbringing as an outsider in Malmö, Sweden, to becoming one of the world's most sought-after and expensive players, gracing Europe's finest clubs, from Ajax to Juventus, Internazionale to Barcelona, Milan to Paris Saint-Germain. I AM ZLATAN reveals a rare and ferocious intelligence, willpower and God-given talent most recently exhibited when Zlatan scored all 4 goals for Sweden in a 4-2 victory against England. His fourth goal, a 30-yard overhead kick with his back to goal is widely regarded as one of the greatest goals of all time. The BBC described it as a goal that 'combined unfathomable imagination and expert technique'. For fans of The Secret Footballer and Football Manager Stole My Life this no holds barred football memoir is every bit as dramatic and revealing as Roy Keane's classic autobiography. 'The best footballer's autobiography of recent years is probably I Am Zlatan Ibrahimovic . . .' Simon Kuper, author of Why England Always Lose 'Eagerly awaited, not least because Ibra seems to be spoiling for a fight on every other page. 'Dynamite' said one Swedish reporter' Daily Mail on I AM ZLATAN

This book investigates how Erasmus viewed non-Christians and different races, including Muslims, Jews, the indigenous people of the Americas, and Africans. Nathan Ron argues that Erasmus was devoted to Christian Eurocentrism and not as tolerant as he is often portrayed. Erasmus' thought is situated vis-à-vis the thought of contemporaries such as the cosmographer and humanist Aeneas Sylvius Piccolomini who became Pope Pius II; the philosopher, scholar, and Cardinal, Nicholas of Cusa; and the Dominican missionary and famous defender of the Native Americans, Bartolomé Las Casas. Additionally, the relatively moderate attitude toward Islam which was demonstrated by Michael Servetus, Sebastian Franck, and Sebastian Castellio is analyzed in comparison with Erasmus' harsh attitude toward Islam/Turks.

First published in 2004. Athanasius Kircher (1602-1680) -- German Jesuit, occultist, polymath - was one of the most curious figures in the history of science. He dabbled in all the mysteries of his time: the heavenly bodies, sound amplification, museology, botany, Asian languages, the pyramids of Egypt -- almost anything incompletely understood. Kircher coined the term electromagnetism, printed Sanskrit for the first time in a Western book, and built a famous museum collection. His wild, beautifully illustrated books are sometimes visionary, frequently wrong, and yet compelling documents in the history of ideas. They are being rediscovered in our own time. This volume contains new essays on Kircher and his world by leading historians and historians of science, including Stephen Jay Gould, Ingrid Rowland, Anthony Grafton, Daniel Stoltzenberg, Paula Findlen, and Barbara Stafford.-

As environmental legislation grows more stringent in response to the escalating climate crisis, some of the world's largest corporations have adopted fraudulent mechanisms to keep their margins of profit, and achieve improper competitive advantage. Such mechanisms can lead to problems in the supply chain, a decrease in market value, diminished trust in brands, increased surveillance of companies, as well as damage to the environment. This book offers a holistic view of the nature and consequences of environmental fraud, bringing together practical examples, empirical research data, and management theory. It will be of interest to academics working in the fields of sustainability management, business ethics, and corporate social and environmental responsibility.

A volume devoted to Giugiaro and Italdesign could hardly not be included in the Masterpieces of style series. Giugiaro is one of the most prestigious names in the history of automotive design, synonymous with iconic cars such as the Alfa Romeo Giulia Sprint GT and Alfetta, the Volkswagen

Golf, the Audi 80, the Fiat Panda, Uno and Punto, the Lancia Delta, Thema and Prisma and the Maserati Bora, Ghibli and Merak, to mention but a few of the most successful designs to carry the Giugiaro name. Born in 1938 at Garesio in the province of Turin, Giugiaro honed his professional skills at Bertone and then at Ghia before setting up on his own when founding Giugiaro Italdesign in 1968. Today the firm is as active as ever and has been responsible for concept cars such as the Caimano, the Iguana and the Canguro, all based on Alfa Romeo mechanicals, and the Asso di Picche and the Quadri on respectively Audi and BMW chassis. This monograph covers this long technical and stylistic history, drawing on a clear, comprehensive text and hundreds of photographs, many of which previously unpublished. The series, includes books on Zagato (2017) Touring (2017), Pininfarina (2018) and, to be published soon, Bertone, Vignale and Ghia.
