## **Nero & Other Plays** Penguin

Prejudice, the intricacies of Mediterranean politics, and Machiavellian strategy abound in this masterpiece of Elizabethan theater, in which the main character schemes to cling to his wealth, his status, and his daughter.

**Star Trek: First Contact** Routledge

This collection of seven papers studies important aspects of the syntax of Albanian, Bulgarian, Greek, and Rumanian from a comparative perspective based on current linguistic frameworks, including the Minimalist Program. Topics addressed include control, raising, and obviation, negation, noun phrase structure, clitic pronouns, and verb movement.

**Damage Tolerance in Aircraft Structures**  
Springer Science & Business Media

This is a biographical book. I had been careful, on my arrival in Bologna, to take up my quarters at a small inn, so as not to attract any notice, and as soon as I had dispatched my letters to Therese and the French officer, I thought of purchasing some linen, as it was at least doubtful whether I should ever get my trunk. I deemed it expedient to order some clothes likewise. I was thus ruminating, when it suddenly struck me that I was not likely now to succeed in the Church, but feeling great uncertainty as to the profession I ought to adopt, I took a fancy to transform myself into an officer, as it was evident that I had not to account to anyone for my actions.

**Structure and Biophysics - New Technologies for Current Challenges in Biology and Beyond** CRC Press

Encounters between agents of the state and religious

---

organizations have been increasing throughout the world, thus the need to understand the relationships between religion and other major domains of life is increasingly important. In this comprehensive reader on church-state relations, scholars examine the connections between religion and political life from a comparative perspective.

**In the Room with Milton H. Erickson,  
M. D. BRILL**

A guide to Sharia'ah-compliant fund systems for students, industry professionals and investors What's the difference between conventional and Islamic asset management? This book reviews the Islamic asset management industry in detail, including the types of funds offered and their operational procedures, and finds that the differences are surprisingly minimal.

Sharia'ah-compliant funds are therefore an attractive alternative for Muslim and non-Muslim investors alike.

**Church-state Relations** Cambridge University Press  
Shelving Guide: Business and Management / Strategic Planning / Leadership / Operations Culture, Strategy, Execution. These three components forge the path to realized potential. The Blendification® System breaks down and rebuilds these core concepts within your company's DNA, setting the foundation for an energizing, engaging, and impactful organization. It is based on the belief that many organizations fail to maximize their potential because they simply do not comprehend the magnitude of their personal and collective untapped capabilities. Many workplaces are stuck

in "second gear," not quite embracing and pursuing their full potential. Corporate missions are based on market dominance and incremental profit growth, leaving a massive blind spot in terms of the connection between employees, customers, and communities. This short-sightedness may provide a clear focal point, but it leaves the company, its leadership, and its employees with limited sustained motivation to realize potential. The Blendification® System embraces the connection between culture, strategy, and execution using the Strategy Whiteboard and integrating emotional and system intelligence into the following three-step model: Strategic

---

Analysis including Culture Strategic Focus, Strategic Outcomes, and Strategic Actions Strategic Execution The Blendification® System connects culture, strategy, and execution in a meaningful way that fosters an inspired, exceptional workforce. By focusing on the unifying purpose within each organization, the platform promotes alignment between leadership and employees setting a clear, strong foundation in which every individual can thrive. With this foundation in place, organizations activate their employee's potential who then take care of their customers. By fully engaging those with whom organizations directly interact, these individuals then become the spark

that ignites community-wide advancement. This is not a theory-based, philosophical book. This is an in-depth operating system by which organizations reshape their infrastructure to realize potential. The methodology outlined in The Blendification® System creates agile and efficient action, maximizing success in periods of economic expansion and times of uncertainty such as the COVID-19 outbreak, the Great Recession, and 9/11. By following the structure outlined in The Blendification® System and using the Strategy Whiteboard, organizations will move beyond financial success to uplifting employees, customers, and entire

---

communities.

*The Blendification System Perfection Learning*

"Examining how four writers from Botswana, South Africa, and Zimbabwe address the ethics of abortion and reproductive choice, this book focuses on texts from the late 1970s to the 1990s which document both changing attitudes to terminations of pregnancy and dramatic environmental, medical, and socio-political developments during southern Africa's liberation struggles.

Viewing recent fiction through the lens of new materialist theory ? which challenges conventional, individual-based notions of human rights by asserting that all matter holds agency ? this book argues that southern African women writers anticipate and exceed current feminist revivals of materialist thought. Not only do the authors question contemporary discourse framing abortion as either a confirmation of a woman's 'right to choose' or an unethical termination of human life, but they challenge conventional understandings of development, growth, and time. Through close readings of both literal gestation in the selected texts and the metaphorical reproduction

---

of the post/colonial nation, this study advances the concept of reproductive agency, creating a range of queer ecocritical alternatives to tropes such as those of 'the Mother Country', 'Mother Africa', or 'the birth of a nation'. This study situates abortion narratives by Wilma Stockenström (translated by J. M. COetzee), Zo ?Wicomb, Yvonne Vera, and Bessie Head alongside contemporary postcolonial feminist theories, melding traditional beliefs with materialist views to reconsider the future of reproductive health matters in Southern Africa. Merging queer ecocritical perspectives from materialism and postcolonialism, this study will appeal to students and researchers in

the medical humanities, new materialisms, and postcolonial studies."--

### **Principles of Space Anthropology**

Legare Street Press

Inorganic Bioelectrochemistry provides a thorough overview of the state of the art in this crucial area of research. In addition, the book helps readers understand where the field is heading and what new developments are on the horizon. Eight chapters written by leading international experts cover crucial topics such as electron and proton transfer in metalloprotein systems, electrochemistry and electrocatalysis of redox enzymes, and electrochemistry of DNA-based

---

molecules.

**Fundamentals of Adhesion and Interfaces** Wentworth Press

This is a collection of conference papers on small hydro renewable energy, covering such topics as: resource assessment and planning; design and construction; and plant and equipment.

**Islamic Asset Management** Springer Nature

This book shows how anthropology can provide an innovative perspective on the human movement into space. It examines adaptation to space on timescales of generations, rather than merely months or years, and uses evolutionary adaptation as a guiding theme. Employing the lessons of

evolutionary adaptation, *Principles of Extraterrestrial Anthropology* recommends evolutionarily-sound strategies of space settlement, covering genetics at the organismal and population levels. The author organizes the concept of cultural adaptation to environments beyond Earth according to observed patterns in human adaptation on Earth. He uses original artwork and tables to help convey complex information in a form accessible to undergraduate and graduate students. Though primarily written to engage students interested in space settlement and exploration, who will eventually build a full anthropology of space settlement, *Principles of Extraterrestrial Anthropology* is engaging to anthropologists across sub-disciplines, as well as scholars interested in

---

the human dimensions of space exploration and settlement. Just as the term exobiology was invented only a few decades ago to shape the field of space life studies, exoanthropology is outlined to assist in the perpetuation of Earth life through human space settlement.

### **Little Red Riding Hood** ASTM International

We need new analytical tools to understand the turbulent times in which we live, and identify the directions in which international politics will evolve. This volume discusses how engaging with Emanuel Adler's social theory of cognitive evolution could potentially achieve these objectives. Eminent scholars of International Relations explore various aspects of Adler's theory, evaluating its

potential contributions to the study of world orders and IR theory more generally. Each chapter focuses on a different aspect of the social theory of cognitive evolution, such as power, morality, materiality, narratives, and practices, and identifies new theoretical vistas that help break new ground in International Relations. In the concluding chapter, Adler responds, engaging in a rich dialogue with the contributors. This volume will appeal to scholars and advanced students of International Relations theory, especially evolutionary and constructivist approaches.

Micro to MACRO Mathematical Modelling in Soil Mechanics Walter de Gruyter GmbH & Co KG

The ideology of Islamic fundamentalists is of central importance in the modern world, but it is often distorted or misunderstood by the

---

international media. This insightful study provides a detailed analysis of the Palestinian Hamas movement's world-view, and shows how the theoretical framework developed by thinkers such as Hassan al-Banna, Sayyis Qutb and al-Mawdudi is applied to a specific political, social and economic context. Nusse explains the fundamentalist position on recent events, such as the Gulf War, the Madrid peace negotiations and the Hebron massacre, and helps to dissipate myths surrounding modern fundamentalist movements and their overwhelming success as opposition movements in the modern world.

### **Bioinorganic Electrochemistry**

Routledge

Focusing on writers such as Phillis Wheatley, Benjamin Franklin, Samson Occum, Charles Brockden Brown, and others, *Transformable Race* tells the story

of how early Americans imagined, contributed to, and challenged the ways that one's racial identity could be formed in the time of the nation's founding.

### *Abortion Ecologies in Southern African Fiction* Springer Science & Business Media

How should we design our economic systems? Should we tax the rich at a higher rate than the poor? Should we have a minimum wage? Should the state provide healthcare for all? These and many related questions are the subject of distributive justice, and different theories of distributive justice provide different ways to think about and answer such questions. This book provides a thorough introduction to the

---

main theories of distributive justice and reveals the underlying sources of our disagreements about economic policy. It argues that the universe of theories of distributive justice is surprisingly simple, yet complicated. It is simple in that the main theories of distributive justice are just four in number, and in that these theories each offer a distinct, well-defined theoretical approach to distributive justice; yet it is complicated in that the main theories disagree at several distinct, fundamental levels, and in that it is possible to spin innumerable new theories from the elements of the four main theories. Key Features: Covers the four major theories of distributive justice and their leading philosophers, elucidating the attractions and drawbacks of each: Friedrich A. von Hayek and right-liberalism; John Rawls and left-liberalism; Robert Nozick and libertarianism; Gerald A. Cohen and socialism. Explains why these four theories have come to dominate most philosophical discussions on distributive justice, highlighting the essential answer provided in each that is lacking in other theories. Written for any reader interested in the topic, with an annotated reading list at the end of each chapter and helpful glossary at the back of the book.
