‘ For me, being in a paddock means anything is possible . . . ’ Country girl and bestselling novelist Rachael Treasure had worked hard to build a long-dreamed-of lifestyle on her own patch of dirt in Tasmania ’ s rugged and beautiful wilderness. But through the breakdown of her marriage, Rachael lost her family farm and, in her words, lost her way in life. Discovering an all-new compass to live by, she took her two kids and her dogs and left the beaten path. Intensive farming, men on the land and women in the home – everywhere Rachael looked she saw ongoing harm to the soil and the foodchain. By going down the dirt roads and getting back to grassroots, she discovered another set of stories about country life in Australia, and a different way to live on

the land. From her rebel granny to pioneering farmers and passionate animal handlers, Rachael became inspired by fresh ways to do things. Down the Dirt Roads starts as a heartfelt and moving insight into the life of a single mother displaced from her home, and becomes a groundbreaking and powerful book about healing, health and hope. Nourishing and sustaining, it presents a practical and positive vision of what life on our land could become. Fifty Bales of Hay BoD - Books on Demand

At a time when food is becoming
increasingly scarce in many
parts of the world and food
prices are skyrocketing, no
industry is more important than
agriculture. Humans have been
farming for thousands of years,
and yet agriculture has
undergone more fundamental

changes in the past 80 years
than in the previous several
centuries. In 1900, 30 million
American farmers tilled the soil
or tended livestock; today there
are fewer than 4.5 million
farmers who feed a population
four times larger than it was at
the beginning of the century.
Fifty years ago, the planet
could not have sustained a
population of 6.5 billion; now,
commercial and industrial
agriculture ensure that millions
will not die from starvation.
Farmers are able to feed an
exponentially growing planet
because the greatest industrial
revolution in history has

occurred in agriculture since 1929, with U.S. farmers leading the way. Productivity on American farms has increased tenfold, even as most small farmers and tenants have been forced to find other work. Today, only 300,000 farms produce approximately ninety percent of the total output, and overproduction, largely subsidized by government programs and policies, has become the hallmark of modern agriculture. A Revolution Down on the Farm: The Transformation of American Agriculture since 1929 charts the profound changes in farming that have occurred during author Paul K. Conkin's lifetime. His personal experiences growing up on a small Tennessee farm complement compelling statistical data as he explores America's vast agricultural transformation and considers its social, political, and economic consequences. He examines the history of American agriculture, showing how New Deal innovations evolved into convoluted commodity programs following World War II. Conkin assesses the skills, new technologies, and government policies that helped transform farming in America and suggests how new legislation might affect

farming in decades to come. Although the increased production and mechanization of farming has been an economic success story for Americans, the costs are becoming increasingly apparent. Small farmers are put out of business when they cannot compete with giant, non-diversified corporate farms. Caged chickens and hogs in factory-like facilities or confined dairy cattle require massive amounts of chemicals and hormones ultimately ingested by consumers. Fertilizers, new organic chemicals, manure disposal, and genetically modified seeds have introduced

environmental problems that are still being discovered. A Revolution Down on the Farm concludes with an evaluation of farming in the twenty-first century and a distinctive meditation on alternatives to our present large scale, mechanized, subsidized, and fossil fuel and chemically dependent system.

A Revolution Down on the Farm Farrar, Straus and Giroux

Since My Life was first published it has

been regarded as a unique political, literary and human document. Written in the first year of Trotsky's exile in Turkey, it contains the earliest authoritative account of the rise of Stalinism and the expulsion of the Left Opposition, who heroically fought for the ideas and traditions of Lenin. Trotsky's exile is the culmination of a narrative which moves from his childhood, his education in the "universities" of Tsarist prisons, Siberia and then foreign exile - to his involvement in the European revolutionary movement and his central role in the tempestuous 1905 revolution and the Bolshevik victory in October 1917 and the civil war which followed. The work concludes with his deportation

and exile. With an introduction by Alan Woods and a preface by Trotsky's grandson, Vsievod Volkov.

In his passionate, luminous novels, David James Duncan has won the devotion of countless critics and readers, earning comparisons to Harper Lee, Tom Robbins, and J.D. Salinger, to name just a few. Now Duncan distills his remarkable powers of observation into this unique collection of short stories and essays. At the heart of Duncan's tales are characters undergoing the complex and violent process of transformation, with results both painful and wondrous. Equally affecting are his nonfiction reminiscences, the "river teeth" of the title. He likens his memories to the remains of old-growth trees that fall into Northwestern rivers and are sculpted by time and water. These experiences—shaped by his own river of

time—are related with the art and grace of a master storyteller. In *River Teeth*, a uniquely gifted American writer blends two forms, taking us into the rivers of truth and make-believe, and all that lies in between.
