Fear and regret—of what I've done, of whom I've become, and of what I've let go—are dragging me into a hole, and I can't claw my way out. The deeper I sink, the farther I push her away. The farther she goes, the more my mind spirals. Down into a black abyss. It's dark here. So damn dark. She needs to know what I've done. I have to tell her. It sounds like the beginning of one of those Hallmark movies I used to watch over the holidays with my mom. Except those movies always have a happy ending, and mine... probably won't. My storybook life collapsed five years ago, and now, I'm just trying to stay one step ahead of my past. It's exhausting. And lonely. I'm sick of running. I'm sick of hiding. So when my grateful passenger offers me a quaint place to wait out the storm and the chance to experience a real Christmas again, I accept. Because who am I to turn down a gift from fate?

This casebook provides a set of cases that reveal the current complexity of medical decision-making, ethical reasoning, and communication at the end of life for hospitalized patients and those who care for and about them. End-of-life issues are a controversial part of medical practice and of everyday life. Working through these cases illuminates both the practical and philosophical challenges presented by the moral problems that surface in contemporary end-of-life care. Each case involved real people, with varying goals and constraints, who tried to make the best decisions possible under demanding conditions. Though there were no easy solutions, nor ones that satisfied all stakeholders, there are important lessons to be learned about the ways end-of-life care can continue to improve. This advanced casebook is a must-read for medical and nursing students, students in the allied health professions, health communication scholars, bioethicists, those studying hospital and public administration, as well as for practicing physicians and educators.

*The Smear* St. Martin's Griffin

New York Times Bestseller Ever wonder how politics turned into a take-no-prisoners blood sport? The New York Times bestselling author of *Stonewalled* pulls back the curtain on the shady world of opposition research and reveals the dirty tricks those in power use to influence your opinions. Behind most major political stories in the modern era, there is an agenda; an effort by opposition researchers, spin doctors, and outside interests to destroy an idea or a person. The tactic they use is the Smear. Every day, Americans are influenced by the Smear without knowing it. Paid forces cleverly shape virtually every image you cross. Maybe you read that Donald Trump is a racist misogynist, or saw someone on the news mocking the Bernie Sanders campaign. The trick of the Smear is that it is often based on some shred of

truth, but these media-driven "hit pieces" are designed to obscure the truth. Success hinges on the Smear artist's ability to remain invisible; to make it seem as if their work is neither calculated nor scripted. It must appear to be precisely what it is not. Veteran journalist Sharyl Attkisson has witnessed this practice firsthand. After years of being pitched hit jobs and puff pieces, she's an expert at detecting Smear campaigns. Now, the hard-hitting investigative reporter shares her inside knowledge, revealing how the Smear takes shape and who its perpetrators are—including Clinton confidant Sidney Blumenthal and, most influential of all, "right-wing assassin turned left-wing assassin" (National Review) political operative David Brock and his Media Matters for America empire. Attkisson exposes the diabolical tactics of Smear artists, and their outrageous access to the biggest names in political media—operatives who are corrupting the political process, and discouraging widespread citizen involvement in our democracy.

"Collecting essays by fourteen expert contributors into a trans-oceanic celebration and critique, Mamadou Diouf and Ifeoma Kiddoe Nwankwo show how music, dance, and popular culture turn ways of remembering Africa into African ways of remembering. With a mix of Nuyorican, Cuban, Haitian, Kenyan, Senegalese, Trinidagonian, and Brazilian beats, *Rhythms of the Afro-Atlantic World* proves that the pleasures of poly-rhythm belong to the realm of the discursive as well as the sonic and the kinesthetic." ---Joseph Roach, Sterling Professor of Theater, Yale University "As necessary as it is brilliant, *Rhythms of the Afro-Atlantic World* dances across, beyond, and within the Black Atlantic Diaspora with the aplomb and skill befitting its editors and contributors." ---Mark Anthony Neal, author of *Soul Babies: Black Popular Culture and the Post-Soul Aesthetic* Along with linked modes of religiosity, music and dance have long occupied a central position in the ways in which Atlantic peoples have enacted, made sense of, and responded to their encounters with each other. This unique collection of essays connects nations from across the Atlantic---Senegal, Kenya, Trinidad, Cuba, Brazil, and the United States, among others---highlighting contemporary popular, folkloric, and religious music and dance. By tracking the continuous reframing, revision, and erasure of aural, oral, and corporeal traces, the contributors to *Rhythms of the Afro-Atlantic World* collectively argue that music and dance are the living evidence of a constant (re)composition and (re)mixing of local sounds and gestures. *Rhythms of the Afro-Atlantic World* distinguishes itself as a collection focusing on the circulation of cultural forms across the Atlantic world, tracing the paths trod by a range of music and dance forms within, across, or beyond the variety of locales that constitute the Atlantic world. The editors and contributors do so, however, without assuming that these paths have been either always in line with national, regional, or continental boundaries or always transnational, transgressive, and perfectly hybrid/syncretic. This collection seeks to reorient the discourse on cultural forms moving in the Atlantic world by being attentive to the specifics of the forms---their specific geneses, the specific uses to which they are put by their creators and consumers, and the specific ways in which they travel or churn in place. #### **Golden Gulag** Vi Keeland

Since 1980, the number of people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called "the biggest prison building project in the history of the world." *Golden Gulag* provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local, conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban perspectives to explain how the expansion developed from surpluses of finance capital, labor, land, and state capacity. Detailing crises that hit California's economy with particular ferocity, she argues that defeats of radical struggles,

weakening of labor, and shifting patterns of capital investment have been key conditions for prison growth. The results—a vast and expensive prison system, a huge number of incarcerated young people of color, and the increase in punitive justice such as the "three strikes" law—pose profound and troubling questions for the future of California, the United States, and the world. *Golden Gulag* provides a rich context for this complex dilemma, and at the same time challenges many cherished assumptions about who benefits and who suffers from the state's commitment to prison expansion.

#### *Sometimes Never* Routledge

Vaccinate children against deadly pneumococcal disease, or pay for cardiac patients to undergo lifesaving surgery? Cover the costs of dialysis for kidney patients, or channel the money toward preventing the conditions that lead to renal failure in the first place? Policymakers dealing with the realities of limited health care budgets face tough decisions like these regularly. And for many individuals, their personal health care choices are equally stark: paying for medical treatment could push them into poverty. Many low- and middle-income countries now aspire to universal health coverage, where governments ensure that all people have access to the quality health services they need without risk of impoverishment. But for universal health coverage to become reality, the health services offered must be consistent with the funds available—and this implies tough everyday choices for policymakers that could be the difference between life and death for those affected by any given condition or disease. The situation is particularly acute in low- and middle income countries where public spending on health is on the rise but still extremely low, and where demand for expanded services is growing rapidly. *What's In, What's Out: Designing Benefits for Universal Health Coverage* argues that the creation of an explicit health benefits plan—a defined list of services that are and are not available—is an essential element in creating a sustainable system of universal health coverage. With contributions from leading health economists and policy experts, the book considers the many dimensions of governance, institutions, methods, political economy, and ethics that are needed to decide what's in and what's out in a way that is fair, evidence-based, and sustainable over time.
