The World Investment Report 2013 (WIR13) presents the latest data and analysis of trends in foreign direct investment (FDI) and related policies. The Report analyzes the sharp decline in global FDI flows in 2012, which was particularly marked among developed countries. As a consequence, developing economies received more FDI than developed countries for the first time ever. Moreover, developing countries were the source of almost one third of global FDI flows. Over the

period 2013-2014, FDI flows are projected to rise moderately. However, a number of potentially destabilizing factors may add to the uncertain outlook for the global economy and thus constrain the pace of FDI recovery. When magic and superpowers emerge in the masses, Wendy Deere is contracted by the government to bag and snag supervillains in Hugo Award-winning author Charles Stross' Dead Lies

Dreaming: A Laundry Files Novel. As Wendy hunts down Imp—the cyberpunk head of a band calling themselves “The Lost Boys” — she is dragged into the schemes of louche billionaire Rupert de Montfort Bigge. Rupert has discovered that the sole surviving copy of the long-lost concordance to the one true Necronomicon is up for underground auction in London. He hires Imp’s sister, Eve, to procure it by any means

necessary, and inapplied. the process, he encounters Wendy Deere. In a tale of corruption, assassination, thievery, and magic, Wendy Deere must navigate rotting mansions that lead to distant pasts, evil tycoons, corrupt government officials, lethal curses, and her own moral qualms in order to make it out of this chase alive. Government Reports Announcements & Index Tor Books The most complete and authoritative guide to Gen Z, describing how leaders must adapt their employment, sales and marketing, product, and growth strategies to attract and keep this important new generation of customers, employees and trendsetters. Gen Z changes everything. Today's businesses are not built to sell and market the way Gen Z shops and buys, or to recruit and employ Gen Z the way they find and keep jobs. Leaders

need answers now as gen Z is the fastest growing generation of employees and the most important group of consumer trendsetters. The companies that quickly and comprehensively adapt to Gen Z thinking will be the winners for the next twenty years. Those that don't will be the losers or become extinct. Zconomy is the comprehensive survival guide on how leaders must understand and embrace Generation Z. Researched and written by Dr. Denise Villa and Jason Dorsey from The Center for Generational Kinetics, the insights in Zconomy are based on their extensive research, they've led more than 60

generational studies, and their work with more than 500 companies around the world. In Zconomy, Dr. Villa and Dorsey answer: Who is Gen Z? What do employers, marketers, and sales leaders need to know? And, most importantly, what should leaders do now? This is the critical moment for leaders to understand and adapt to Gen Z or become irrelevant. Gen Z is already reshaping the world of business and this change is only going to accelerate. Zconomy is the definitive manual that will prepare any executive, manager, entrepreneur, HR or marketing professional to successfully unlock the powerful potential of this emerging

generation at this pivotal time.

Since CAFE standards were established 25 years ago, there have been significant changes in motor vehicle technology, globalization of the industry, the mix and characteristics of vehicle sales, production capacity, and other factors. This volume evaluates the implications of these changes as well as changes anticipated in the next few years, on the need for CAFE, as well as the stringency and/or structure of the CAFE program in future years.

Multinational Enterprises and the Global Economy
has become a classic in international business. . . Yet , the book s second edition is even better than the first, in part because of Professor Dunning s wise decision to choose Dr Lundan as his co-author and to draw upon her deep knowledge of various strands of research on business government relations and the societal effects of firm behaviour. . .

In addition to being a remarkably useful reference book,
Multinational Enterprises and the Global Economy is the first book any IB doctoral student should read to understand the significance and richness of IB scholarship as it has developed over the past 50 years. Alain Verbeke, Journal of International Business Studies
The second edition of Multinational Enterprises and the Global Economy provides unparalleled coverage not only of the literature

relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. Journal of International Business Studies

This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK

The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational

business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and

its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have

become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a

Criminal Liability for Serious Traffic Offences

Product Safety & Liability Reporter

The criminal law on serious traffic offenses presents legislators with numerous controversial issues. One such issue is when severe consequences are matched with low moral culpability. How should the law deal with a driver who kills someone because she failed to see the person when looking? Another

controversial issue concerns highly culpable behavior that remains without serious consequences. How should the law cope with a driver who nearly kills someone when overtaking recklessly? The traffic context generates many hard cases that call the outermost boundaries of general doctrinal concepts like intent, negligence, or causation into question. This book contains an international collection of essays on criminal liability for serious traffic offenses.

With a focus on England/Wales, the Netherlands, France, Germany, and Spain, the book reveals that there are enormous differences in both drafting and interpretation of serious traffic offenses. Additionally, it elaborates on the role of culpability and harm in sentencing, traffic-psychological insights relevant to accident causation, and the concept of conditional intent in relation to extremely dangerous traffic behavior. [Subject: Criminal Law, Traffic Law, Comparative Law] **The New York Times Index** Webonomics, "n: the study of the production, distribution, and consumption of goods, services, and ideas over the World Wide Web. With tens of millions of people now on-line and Web sites springing up at the rate of one per minute, the World Wide Web has become a strategic tool for successfully growing a business. But while the new digital economy

mirrors the traditional economy in some ways, it exhibits unique properties of its own, and it can cost a business thousands, even millions, of dollars if used ineffectively. In "Webonomics," Evan I. Schwartz defines the principles and strategies for maximizing the Web's potential and illustrates these lessons with numerous case studies of both successes and failures, from Web-based start-ups such as Firefly and Virtual Vineyards to large

corporations such as IBM and Federal Express. At a time when only the most agile and adaptable businesses can survive, "Webonomics is an essential handbook for thriving amidst the accelerating changes of the Information Age. **How Asia Works** "A good read for anyone who wants to understand what actually determines whether a developing Web-economy will succeed." —Bill Gates, "Top 5 Books of the Year" An

Economist Best Book of the Year from a reporter who has spent two decades in the region, and who the Financial Times said "should be named chief myth-buster for Asian business." In *How Asia Works*, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks

Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With

manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need "export discipline," a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the

explosive growth at a Korean steel mill. "Provocative . . . How Asia Works is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic." —The Economist

The bestselling author of No Logo shows how the global "free market" has exploited crises and shock for three decades, from Chile to Iraq

In her groundbreaking reporting, Naomi Klein introduced the term "disaster

capitalism."
Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton

Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the

privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.
