Carl Theodor Dreyer was a visionary director whose films were based less on his screenplays than on his preconceptions, his complete formal, aesthetic cinematic projections of the films he deputized actors, cinematographers, and crew to produce. Drawing together many stories from the archives of difficult events and volatile histories, *Archiving Loss: Holding Places for Difficult Memories* asks how we might cut and walk a path for memory, loss, and silence in the archive. The difficult events discussed in this book include state responses to refugees, events of genocide, alongside other less documented pockets of trauma, violence, and loss. This book

describes the archives whose language and logic have shaped our ways we remember and respond to difficult events and the ways in which we expect memory and loss to be coherent, credible, and lead to clear conclusions. In asking what is missing and what is found in the archives of difficult events this book argues for the necessity of looking more closely at other ways of remembering loss and archiving memory. This book summarizes the international evidence on methodological issues in standard setting in education. By critically discussing the standard-setting practices implemented in the Nordic countries and by presenting new methodological approaches, it offers fresh perspectives on the current research. Standard setting targets crucial societal objectives by defining educational

benchmarks at different achievement levels, and provides feedback to policy makers, schools and teachers about the strengths and weaknesses of a school system. Given that the consequences of standard setting can be dramatic, the quality of standard setting is a prime concern. If it fails, repercussions can be expected in terms of arbitrary evaluations of educational policy, wrong turns in school or teacher development or misplacement of individual students. Standard setting therefore needs to be accurate, reliable, valid, useful, and defensible. However, specific evidence on the benefits and limits of different approaches to standard setting is rare and scattered, and there is a particular lack with respect to standard setting in the Nordic countries, where the number of national tests is increasing and there are concerns about the time and effort spent on testing at schools without feedback being provided. Addressing this gap, the book offers a discussion on standard setting by respected experts as well as profound and innovative insights into fundamental aspects of standard setting including conclusions for

future methodological and policy-related research.

Democratic Representation in Europe: Diversity, Change and convergence explores representation as a core element of democracies in the modern era. Over the past 150 years parliamentary representation has developed into a main link between polity and society, and parliamentary representatives have come to form the nucleus of political elites. The twenty authors of the 16 chapters follow a comparative and empirical approach by exploiting the unique longitudinal database of the EURELITE project, which has gathered standardized evidence about the structures of parliamentary representation in 11 European countries and their development over time; in many countries over 160 years. Following on from an earlier book by the same editors (*Parliamentary Representatives in Europe 1848-2000*.) which focused on trends in single European countries, *Democratic Representation in Europe* pursues a trans-national approach by comparing the mechanisms and modes of parliamentary recruitment and career formation between the main party families and various categories of the population in European societies. Such cross-national analyses, which include a longitudinal account of female representation throughout modern European parliamentary history, have not been attempted before. The book concludes with longitudinal in-depth analyses of cleavage representation in European parliamentary history and of the impact of the institutional factor on

political elites' transformations.

Democratic Representation in Europe contributes to a better understanding of relations between social and political change, and of the importance of institutional factors in shaping the political elites of European democracies. In so doing it can help substantiate theoretical debates in the social and political sciences on issues such as historical institutionalism and path dependency.

This cutting-edge edited collection brings together 17 scholarly essays on two of cinema and television's most enduring and powerful themes: law and crime. With contributions by many of the most prominent scholars in law, sociology, criminology, and film, Framing Law and Crime offers a

critical survey of a variety of genres and media, integrating descriptions of technique with critical analysis, and incorporating historical and socio-political critique. The first set of essays brings together accounts of the history of the Law and Cinema Movement; the groundbreaking genre of “ post-apocalyptic fiction; ” and the policy-setting genesis of a Canadian documentary. The second section of the book turns to the examination of a range of international or global films, with an eye to assessing the strengths, frailties, and possible functions of law, as depicted in fictional cinema. After an international focus in the second section, the third section focuses on law and crime in American film and television, inclusive of both fictional and documentary modes of narration. This section ’ s expansion beyond film narratives to include television series attempts to broaden the scope of the edited collection, in terms of media discussed; it is also a nod to how the big screen, although still a dominant force in American popular culture, now has to compete, to some extent, with the small screen, for influence over the collective American popular cultural imaginary. The fourth section, titled brings together various chapters that attempt to instantiate how a “ Gothic Criminology ” could be useful, as an interpretative framework in analyzing depictions of law and crime in film and television.

The fifth and final section covers issues of pedagogy, epistemology, and ethics in relation to moving images of law and crime. Merging wide-ranging analyses with nuanced scholarly interpretations, Framing Law and Crime examines key concepts and showcases original research reflecting the latest interdisciplinary trends in the scholarship of the moving image. It addresses, not only scholars, but also fans, and will heighten the appreciation of connoisseurs and newcomers to these topics alike.
