for the role of writing centres in engaging with students, staff and institutional structures in understanding issues of access from a social perspective ... This is a specialist book for those working in writing centres and for academics of all disciplines. It is based on research and provides an important set of theoretical arguments, developed through reflection on writing centre practices, about student writing and the work of the university. Professor Sioux McKenna Centre for Higher Education Research, Teaching and Learning, Rhodes University How do we select and train tutors? How do we work with faculty? How do we combat the image that we are remedial, a 'fix-it' shop? How do we prove our worth? How do we show that we improve retention? ... Changing Spaces demonstrates the flexibility of writing centers and the unique roles they play in South Africa. Writing centers everywhere represent institutional responses to the learning needs of their students, and they do so because writing centers adapt easily to different contexts and

situations. They meet students where they are, as a group and individually. Professor Leigh Ryan Writing Center Director, University of Maryland, USA

From the renowned psychologist who introduced the world to “growth mindset” comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement.

“Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and

which paths we take in life.” —Bill Gates, GatesNotes “It’s not always the people who start out the smartest who end up the smartest.” After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than

---

those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate

those you lead, teach, and love—to transform their lives and your own. The Standardisation of African Languages Arihant Publications India limited

Translating for Children is not a book on translations of children's literature, but a book on translating for children. It concentrates on human action in translation and focuses on the translator, the translation process, and translating for children, in particular. Translators bring to the translation their cultural heritage, their reading experience, and in the case of children's books, their image of childhood and their own child image. In so

doing, they enter into a dialogic relationship that ultimately involves readers, the author, the illustrator, the translator, and the publisher. What makes Translating for Children unique is the special attention it pays to issues like the illustrations of stories, the performance (like reading aloud) of the books in translation, and the problem of adaptation. It demonstrates how translation and its context takes precedence can take over efforts to discover and reproduce the original author's intentions. Rather than the authority of the author, the book concentrates on the intentions of the readers of a book in translation, both the translator and the target-language readers.
