The last two decades have seen a marked growth in comparative research within the field of housing studies. This reflects the increasing globalisation of housing finance and therefore the interconnectedness of housing markets, growing interest among researchers and policy makers in learning from developments in other countries and the availability of more funding and better comparative data to support their endeavours. Concurrently, comparative housing research has become more sophisticated, as research training has improved, the number of journals publishing this research has increased and researchers have become what one might call more methodologically aware. However, despite these developments, there is no single volume book that deals with the distinct challenges that arise from comparative housing research, compared to other fields of comparative policy analysis. These challenges relate to spatial fixity of housing, its dual role as a consumption and investment good, and as the "wobbly pillar" of the welfare state, which is delivered using a complex mix of government and market supports. This volume reflects on the significant methodological strides made in the comparative housing research field during this period. The book also considers the considerable challenges that remain if comparative housing research is to match the methodological and theoretical sophistication evident in other comparative social science fields and maps a route for this journey. This book was published as a special issue of the International Journal of Housing Policy. E-Infrastructures for Data Publishing in Biodiversity Science PenSoft Publishers LTD It is difficult to turn on the television or read a news story today without learning about how green and sustainable practices are being implemented throughout society. Libraries are not exempt from these broader trends. In some cases, libraries and librarians have been at the forefront of these efforts. Greening Libraries provides library professionals with a collection of articles and papers that serve as a portal to understanding a wide range of green and sustainable practices within libraries and the library profession. The book's articles come from a variety of perspectives on a wide range of topics related to green practices, sustainability and the library profession. Greening Libraries offers an overview of important aspects of the growing green library movement, including, but not limited to, green buildings, alternative energy resources, conservation, green library services and practices, operations, programming, and outreach.

Recently, research in the Humanities is showing an increasing interest in exactly how language and other semiotic resources support each other. The eighteen articles of this book focus on the interplay between spoken language and other modalities and address a spectrum of cross-modal resources and their functions. They also discuss how multimodal resources are exploited to increase communicative effectiveness and broaden accessibility to knowledge. This is illustrated with examples from discourse types including dramatic, literary and audiovisual texts, Facebook communication and chats, comics and audio-guides. The volume will be of interest to scholars of linguistics, translation studies, museology and education, and for readers interested in the wide array of possibilities that multimodal texts open up for meaning-making.

Master's Thesis from the year 2011 in the subject English - Literature, Works, grade: 1,5, University of Hildesheim (Institut für englische Sprache und Literatur), language: English, abstract: American superhero-comics have been around for over 70 years now. In that period not only the genre and its medium matured but also the social, cultural and political environment changed. This paper hypothesizes that superhero comics change over time to stay relevant and that the observant reader can make conclusions about the time during which a comic was written by analyzing it. The first part of this paper gives a short summary of the history of superhero comics from the creation of Superman in 1939 to the Modern Age of Comics. It explains how the superhero comic originated in the late 1930s, blossomed in the 1940s, struggled in the 1950s and reinvented itself in the 1960s. Events like the introduction of the Comic Book Code and the death of Gwen Stacy will be presented and it will be explained why they had an immense impact on the comic-book culture. Also, the definition of the term superhero will be discussed. Afterwards, the essay focuses on the different kinds of comic-book revisionism and the different reasons for it. This and the chapters before help to understand how the comic book industry works and how innovations in comic books are introduced and why they happen. The main part of the essay continues to prove the hypothesis on the example of three superheroes that have all existed since the Golden Age of Comics: Wonder Woman, Captain America and Batman. Each of those superheroes will provide an example for a different kind of social change: With the help of Wonder Woman, the change of the women's role and the change of feminism will be examined. Captain America is a great example of a superhero created out of a social and political need and of the struggle that arises when this need is fulfilled. He also poses as an example for how comics comment on political changes. Finally, the Batman comics are used to illustrate the power Dr. Frederic Wertham's book Seduction of the Innocent had over society and over comics itself. That chapter also discusses what the changes, made to Batman comics in reaction to the accusation of homosexuality, say about the reputation of homosexuals in the 1950s. The last part of this essay gives an example for the possibilities to use this topic in school, in English as a foreign language or history classes.

In recent years there has been a considerable effort in some transnational organizations and institutions to confront a crisis of legitimacy by promising more accountability and openness. This volume takes as its central focus the role of accountability in

democratic governance, and attempts to position a broad understanding of the notion of accountability within the overall context of the evolving political system of governance in Europe and in particular of the European Union. Bringing together new work by some of the leading scholars in the field, this volume considers the relationship between accountability and a wide range of other themes in European governance such as problems of representation, transparency, bureaucracy, and transnational relations. The volume also deals with the role of accountability in multi-level governance, and its relationship to both direct democracy and civil society. This book was published as a special issue of West European Politics. SocInfo 2014 International Workshops, Barcelona, Spain, November 11, 2014, Revised Selected Papers Routledge The India Policy Forum (IPF) is organized by the National Council of Applied Economic Research (NCAER) in New Delhi in partnership with the Brookings Institution, Washington, D.C. It aims to examine India's economic reforms and its economic transition using policy-relevant empirical research. The IPF comprises an annual international conference in July in New Delhi and the IPF Volume that brings together the conference papers. These papers undergo detailed revisions after the conference based on discussants' comments at the IPF and the guidance provided by the editors. The IPF is guided by distinguished international advisory and research panels. The first paper in this 2013 IPF Volume evaluates the impact of laws governing the operation of India's labour market within the organized industrial sector. The next paper analyzes India's role in the rapid development of international production networks. The third paper examines the conduct of Indian monetary policy since the onset of the global financial crisis, focusing on the persistent high rates of inflation in India. The fourth paper provides an overview of fiscal and monetary policies in the years after the financial crisis. The volume concludes with an assessment of the value of social audits, widely advocated as a tool for improving public accountability, in the MGNREGA program in Andhra Pradesh. The annual IPF Volume is globally the most cited collection of articles on India and should be useful to researchers and policy-makers in economics and political economy.

A Companion to Steven Spielberg provides an authoritative collection of essays exploring the achievements and legacy of one of the most influential film directors of the modern era. Offers comprehensive coverage of Spielberg's directorial output, from early works including Duel, The Sugarland Express, and Jaws, to recent films Explores Spielberg's contribution to the development of visual effects and computer games, as well as the critical and popular reception of his films Topics include in-depth analyses of Spielberg's themes, style, and filming techniques; commercial and cultural significance of the Spielberg 'brand' and his parallel career as a producer; and collaborative projects with artists and composers Brings together an international team of renowned scholars and emergent voices, balancing multiple perspectives and critical approaches Creates a timely and illuminating resource which acknowledges the ambiguity and complexity of Spielberg's work, and reflects its increasing importance to film scholarship Written in Phonography Hearken, O Ye People The Historical Setting of Joseph Smith's Ohio Revelations

Focusing on geoscience, this book applies a uniquely cross-disciplinary perspective to its examination of the relationship between scientific research and teaching at universities. Contributions show how the use of technology and innovative pedagogical design allows students at different stages of their university studies to develop skills and experience in geoscience research. The book offers wide-ranging insight from academics in geoscience, science education and higher education policy and pedagogy, as well as from students and industry experts. The opening section sets the context, with a chapter on teaching and research in the contemporary university by a world-leading academic in higher education, and an essay by the editor on the case of moving from research-implicit to research-enhanced teaching. Part Two addresses the research-teaching nexus in geoscience, offering chapters entitled The Challenge of Combining Research and Teaching: A Young Geoscientist's Perspective; Teaching on the High Seas: How Field Research Enhances Teaching at All Levels; Curricula and Departmental Strategies to Link Teaching and Geoscience Research; and Geoscience Internships in the Oil and Gas Industry, among others. In Part Three, the use of technology is discussed in chapters such as Using Interactive Virtual Field Guides and Linked Data in Geoscience Teaching and Learning; and Towards Technology- and Research-enhanced Education (TREE): Electronic Feedback as a Teaching Tool in Geoscience. The Program Design section includes chapters on Introducing University Students to Authentic, Hands-on Undergraduate Geoscience Research, and the opportunity to link research and teaching in students' final projects and more. Geoscience Research and Education: Teaching at Universities is a useful resource for understanding the research-teaching nexus and how it has been implemented in different types of universities and in different countries. Science academics seeking to integrate research into teaching will find the book highly relevant to their work. The emphasis on using technology as a means to link research and teaching will be of great interest and practical benefit to learning technologists, science educators and university policymakers. Together with the companion volume Geoscience Research and Outreach: Schools and Public Engagement, this book showcases the key role that geoscience research plays in a wide spectrum of educational settings. This volume of leading scholarly articles addresses the international dynamics of emergency policy and practice. In a world of increasing technological, economic and political interdependency, it is no longer feasible for states to ignore the pervasive influence of globalisation. The crises wrought by industrial disasters,

catastrophic weather events, pandemics, financial implosion and cyber intrusion now transcend and challenge national interests with increasing frequency. The case-studies collected here explore these global dimensions of crisis and the state through the lenses of planning and prevention, acute responses, recovery and reconstruction, and learning about crisis. This collection is essential reading for academics, policy officials and practitioners with an interest in emergency management, risk management and issues of national/global security. In original introductory and concluding chapters to the volume, Legrand and McConnell provide a critical perspective on the challenges that globalisation presents to policymakers under crisis conditions and signposts some of the emerging challenges to the state and international community.

What is the case for adding the unconventional balance sheet policies used by major central banks since 2007 to the standard policy toolkit? The record so far suggests that the new liquidity providing policies in support of financial stability generally warrant inclusion. As the balance sheet policies aimed at macroeconomic stability were used only by a small number of highly credible central banks facing a lower bound constraint on conventional interest rate policy, they are not relevant for most central banks or states of the world. Best practices of these policies are documented in this paper.

The thoroughly revised & updated 3rd edition of 'CDS 12 Years Mathematics, English & General Knowledge Topic-wise Solved Papers (2007 Feb - 2018 Feb)' consists of last 12 years (both Feb and November papers) from 2007 Paper 1 - 2018 Paper 1 solved papers of Elementary Mathematics, English and General Knowledge distributed into 42 topics. In all there are 23 Question papers from 2007 to 2018 - I which have been divided into the above discussed 42 topics. Practicing these questions, aspirants will come to know about the pattern and toughness of the questions asked in the examination. All the papers are divided into following sections: Section I - Mathematics which is distributed into 25 topics Section II - English is divided into 8 topics Section III - General Knowledge is divided into 9 topics The book contains 6460+ MILESTONE MCQ's from the above 23 Question papers. The strength of the book lies in the originality of its question papers and Errorless Solutions. The solution of each and every question is provided in detail (step-by-step) so as to provide 100% concept clarity to the students.

America is a corporatized society defined by a culture of consumerism, and the youth market is one of the groups that corporations target most. By marketing directly to children, through television, movies, radio, video games, toys, books, and fast food, advertisers have produced a 'kinderculture'. In this eye-opening book, editor Shirley R. Steinberg reveals the profound impact that our purchasing-obsessed culture has on our children and argues that the experience of childhood has been reshaped into something that is prefabricated. Analyzing the pervasive influence of these corporate productions, top experts in the fields of education, sociology, communications, and cultural studies contribute incisive essays that students, parents, educators, and general readers will find insightful and entertaining. Including seven new chapters, this third edition is thoroughly updated with examinations of the icons that shape the values and consciousness of today's children, including Twilight, True Blood, and vampires, hip hop, Hannah Montana, Disney, and others.

Models are fundamental for estimating the possible costs and effectiveness of different policies for reducing greenhouse gas (GHG) emissions. There is a wide array of models to perform such analysis, differing in the level of technological detail, treatment of technological progress, spatial and sector details, and representation of the interaction of the energy sector to the overall economy and environment. These differences impact model results, including cost estimates. More fundamentally, these

models differ as to how they represent fundamental processes that have a large impact on policy analysis--such as how different models represent technological learning and cost reductions that come through increasing production volumes, or how different models represent baseline conditions. Reliable estimates of the costs and potential impacts on the United States economy of various emissions reduction and other mitigation strategies are critical to the development of the federal climate change research and development portfolio. At the request of the U.S. Department of Energy (DOE), the National Academies organized a workshop, summarized in this volume, to consider some of these types of modeling issues.

For over three decades, the capability approach proposed and developed by Amartya Sen and Martha Nussbaum has had a distinct impact on development theories and approaches because it goes beyond an economic conception of development and engages with the normative aspects of development. This book explores the new frontiers of the capability approach and its links to human development in three main areas. First, it delves into the philosophical foundations of the approach, re-examining its links to concepts of common good, collective agency and epistemic diversity. Secondly, it addresses its 'operational frontier', aiming to give inclusive explanations of some of the most advanced methods available for capability researchers. Thirdly, it offers a wide range of the applications of this approach, as carried out by a mix of renowned capability scholars and researchers from different disciplines. This broad interdisciplinary range includes the areas of human and sustainable development, inequalities, labour markets, education, special needs, cities, urban planning, housing, social capital and happiness studies, among others.

This collection of articles, developed in association with the EU funded VIBRANT project, illustrates how advances to research infrastructures are reciprocally changing the practice of taxonomy. A detailed review of data issues in the life sciences (Thessen and Patterson 2011) sets the tone for subsequent articles in this special issue, whose contributions broadly fall into three categories. They initial articles consider some of the major infrastructure platforms that support the production and management of biodiversity data. These include the EDIT Platform for Cybertaxonomy, Wiki-based approaches including BioWikiFarm and the Scratchpads Virtual Research Environment. Later articles provide deeper coverage of specialist areas of interest to taxonomic and biodiversity researchers. The topics covered include the mark-up (Penev et al. 2011) and management (King et al. 2011) of taxonomic literature, geospatial assessment of species distributions (Bachman et al. 2011) and licensing issues specific to life science data (Hagedorn et al. 2011). Finally, the special issue closes with a series of research and review papers that provide detailed use cases illustrating how these research infrastructures are being put into practice. Highlights from this section include citizen science approaches to collecting species information by the COMBER Marine observation network (Arvanitidis et al. 2011) and the Australian Bush Blitz programme (Lambkin and Bartlett 2011); use of new tools for data publishing like the Global Biodiversity Information Facility (GBIF) Integrated Publishing Toolkit (IPT) and the DRYAD Data Repository; new forms of publication via ?data papers? that allow checklists and identification keys to be formally published as structured datasets (e.g., Narwade et al. 2011); and finally new taxonomic revisions and species descriptions constructed from within the collaborative systems like XPER2 and Scratchpads.

The second edition of this book is designed for beginning and experienced authors, for nurses who want to write articles about their practice, and for graduate students in nursing to guide their preparation of papers for both courses and publication. Developing the ability to communicate in writing is an essential outcome of nursing programs, particularly at the graduate level. This book is a widely used resource on all aspects of: writing EBP papers, reporting research for use in practice, disseminating the findings of clinical projects and innovations, and preparing manuscripts for publication. The text includes new content that focuses on the dissemination of information in Evidence-Based Practice (EBP). Varied models of EBP are presented with an emphasis on how to disseminate evidence to different audiences, including how to prepare critical appraisals of research studies with implications for practice, literature reviews and syntheses, and other types of written reports that contribute to EBP.
