This book recounts the journey of English midwives over six centuries and their battle for survival as a discrete profession, caring safely for childbearing women. With a particular focus on sixteenth and twentieth century midwifery practice, it includes new research which provides evidence of the identity, social status, lives, families and practice of contemporary midwives, and argues that the excellent care given by ecclesiastically licensed midwives in Tudor England was not bettered until the twentieth century. Relying on a wide variety of archived and personally collected material, this history illuminates

the lives, words, professional experiences and outcomes of midwives. It explores the place of women in society, the development of midwifery education and regulation, the seventeenth century arrival of the accoucheurs and the continuing drive by obstetricians to medicalise birth. A fascinating and compelling read, it highlights the politics and challenges that have shaped midwifery practice today and encourages readers to be confident in midwifery-led care and giving women choices in childbirth. It is an important read for all those interested in childbirth.

Management accounting education has long revolved around large-scale traditional manufacturing industries. We know that this is no longer the operating environment for many businesses and yet many textbooks have not undergone the changes that these organisations have. Management Accounting in the Contemporary Business World recognises the changes that have taken place, such as the shift from manufacturing to services, globalization and the increased role of technology, and addresses the issue of how management accounting should be undertaken in modern operating environments. The book provides a comprehensive discussion about the nature of the changes involved and their implications for all aspects of management accounting in the operational, tactical and strategic spheres. The content of the book is enhanced by the use of many practical case studies.
