Accounting Theory 5th edition is the new edition of the market leading theory textbook. The 5th edition has been updated to enhance student understanding of the role of accounting theory and the application of accounting theory in the professional environment. The new edition goes further to align the study of accounting theory to the professional

environment domestically and internationally. To achieve this, the new edition includes a "International View" vignette in each chapter to profile the international response or thinking on relevant issues, ?Theory in Action? boxes illustrate the chapter material by way of presenting professional examples to build understanding and end of chapter case studies have develop and apply student understanding of the material. Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design.

Libby/Libby/Short is the only financial accounting text to successfully implement a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to

the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting. Intermediate Accounting, Student Practice and Solutions Manual Wiley
