Don't you love those moments in your course when students are fully engaged?

When the Aha! revelations are bursting like fireworks? The Financial

Accounting author team has developed a concise and well-organized learning framework to show students that accounting consists of three major processes:

measuring, communicating, and decision-making. By consistently tying each lesson into this framework, instructors can significantly improve student

engagement and outcomes. For the fifth edition, the authors have retained popular digital features such as General Ledger Problems, Excel Simulations,

and algorithmic end-of-chapter questions, while also including new content based on skills today's students need. New features in the fifth edition include

Applying Excel problems, enhancing decision maker's content by developing auto-graded cases, and expanding video content with new Concept Overview

Videos. Building on the success of the first four editions of Financial

Accounting, this new edition will motivate, engage, and challenge students.

Paired with the market-leading power of the Connect platform, Spiceland,

Thomas, Herrmann, Financial Accounting will truly illuminate the financial accounting course for each student.

Accounting may be challenging, but with training and practice students

can come out of a financial accounting course having achieved success!

With David Weiner 's Financial Accounting as a Second Language,

students will get the practice and training they need to better understand

fundamental principles, build confidence, and solve problems. The goal of

this title is to: introduce the language of accounting, explain the core

concepts of accounting, and learn how to apply these core concepts to

solve accounting problems. Developed by David Weiner through his forty

year teaching career, this text is filled with study skills, techniques, and

strategies used help students learn the core concepts of accounting and get

the grades they deserve.

Financial and Managerial Accounting for Decision Makers McGraw-Hill/Irwin

Producers and users of management accounting information are confronted

with crucial behavioral phenomena--factors that can affect the communication

of this information and its use. Riahi-Belkaoui shows how producers and users

together can improve the efficiency of management accounting itself. He

explains the judgment process in management accounting, identifies and

explains the major behavioral phenomena, and then provides ways to use them

for the firm's benefit.

Noted for its practical, accessible approach to senior and graduate-level

engineering mechanics, Plates and Shells: Theory and Analysis is a long-time

bestselling text on the subjects of elasticity and stress analysis. Many new

examples and applications are included to review and support key foundational

concepts. Advanced methods are discussed and analyzed, accompanied by

illustrations. Problems are carefully arranged from the basic to the more

challenging level. Computer/numerical approaches (Finite Difference, Finite

Element, MATLAB) are introduced, and MATLAB code for selected illustrative

problems and a case study is included.

Financial Accounting Theory Elsevier

Brealey, Principles of Corporate Finance 13e describes the theory and practice of

corporate finance. We hardly need to explain why financial managers must

master the practical aspects of their job, but we should spell out why down-to-

earth managers need to bother with theory. Throughout this edition, the authors

demonstrate how managers use financial theory to solve practical problems.

They also explore what financial managers should do to increase company

value. Some of the biggest changes in this edition were prompted by the tax

changes enacted in the U.S. Tax Cuts and Jobs Act passed in December 2017.

Studyguide for Financial Accounting by Dyckman, Thomas R. CRC Press

Scott reveals vast amounts of financial accounting information drawn

from recent research that has until now been hidden in academic journals.

He provides a clear, easy-to-use framework for students to (1) place this

information in a financial accounting context, (2) explain and analyze the

information intuitively and (3) to reveal the information's relevance in understanding the practice of accounting.

Valuation is a topic that is extensively covered in business degree programs throughout the country. Damodaran's revisions to "Investment Valuation" are an addition to the needs of these programs.

A Critical Analysis Wiley

Reliability of Structures enables both students and practising engineers to appreciate how to value and handle reliability as an important dimension of structural design. It discusses the concepts of limit states and limit state functions, and presents methodologies for calculating reliability indices and calibrating partial safety factors. It also supplies information on the probability distributions and parameters used to characterize both applied loads and member resistances. This revised and extended second edition contains more discussions of US and international codes and the issues underlying their development. There is significant revision and expansion of the discussion on Monte Carlo simulation, along with more examples. The book serves as a textbook for a one-semester course for advanced undergraduates or graduate students, or as a reference and guide to consulting structural engineers. Its emphasis is on the practical applications of structural reliability theory rather than the theory itself. Consequently, probability theory is treated as a tool, and enough is given to show the novice reader how to calculate reliability. Some background in structural engineering and structural mechanics is assumed. A solutions manual is available upon qualifying course adoption.

Outlines and Highlights for Financial Accounting by Thomas R Dyckman

Houghton Mifflin School

The mission of this text is to present critical concepts in a clear, concise way that is most helpful to learning and enhancing the student's interest. Rather than emphasizing rote learning of rules and regulations, the authors underscore how important it is for users and preparers of financial statements to understand accounting principles and how they are applied in financial reporting decisions. The text presents GAAP as the current solution to a continually evolving host of

financial reporting questions. By acquainting students with the political nature of standard setting, the reader becomes aware that both users and preparers are affected by the outcome of the standard setting process.

For intermediate and financial accounting courses at the MBA and undergraduate level, or a supplement to financial statement analysis texts. This collection of financial accounting cases is designed to help students become financial statement users. Each case utilizes financial statement information (balance sheet, income statement, statement of cash flow and/or footnotes) and a number of topical questions. Students use the financial statement information to infer and interpret the economic events underlying the numbers. Related articles taken from business publications accompany some cases, and information from the articles is incorporated into the case question material. Also available the Pearson Custom Case Program.
