By New Yorker and Atlantic writer Carl Elliott, a readable and even funny account of the serious business of medicine. A tongue-in-cheek account of the changes that have transformed medicine into big business. Physician and medical ethicist Carl Elliott tracks the new world of commercialized medicine from start to finish, introducing the professional guinea

pigs, ghostwriters, thought leaders, drug reps, public relations pros, and even medical ethicists who use medicine for (sometimes huge) financial gain. Along the way, he uncovers the cost to patients lost in a health-care universe centered around consumerism. **Computerworld** Guilford Publications

The unique story of Wall Street legend Joe Grano—six defining moments in courage, leadership, and determination that will inspire readers of every age, and at every stage in life From Vietnam to 9/11, from the market crash of '87 to today's financial crisis, Wall Street legend Joe Grano has weathered the most defining

crises of the last forty years. Whether leading draftees through combat as a Green Beret in Vietnam, regrouping a team of brokers during the market crash of 1987, or working tirelessly to reopen Wall Street after the attacks on 9/11, Joe has served at the front lines of our nation's most defining moments, leading and even inspiring others when things seem at their darkest. Structured around six specific crises he faced in his life and career, *You Can't Predict a Hero* will describe how Grano was able to triumph over challenges both personal and professional. Whether teaching himself to walk again after sustaining crippling battle wounds, rising from his hardscrabble beginnings to become a top broker at Merrill Lynch, or shepherding the merger of PaineWebber and UBS, his experience has been hard-won and his perspective like no one else's. Through it all, Grano has learned to find the opportunity in any crisis, how to calm and inspire those

he leads, and how to find the real solution to what can appear as an insurmountable problem. This dynamic book will inspire anyone looking to make sense of our rapidly changing world, and how to grow and even thrive through any challenge. Problems require solutions, and crisis creates true leaders.

Joseph J. Grano, Jr. is Chairman and CEO of Centurion Holdings LLC, a company that advises private and public companies. From 2001-2004, Grano was Chairman of UBS Financial

Services Inc. (formerly UBS PaineWebber). Having joined the company in 1988, Grano is credited for turning PaineWebber around and shepherding its merger with Swiss banking giant UBS. Grano began his career as a stock broker at Merrill Lynch, where he rose to various senior management positions over 16 years. A decorated war hero, Grano was chosen by the White House to be chairman of the President's Homeland Security Advisory Council after 9/11, a position he held

from 2002-2005. The recipient of countless awards for leadership, civic contributions, as well as honorary degrees, he is involved in a wide range of educational and philanthropic endeavors. He and his wife, Kathy, live in New Jersey. Mark Levine has written and collaborated on more than 30 books, including the best sellers *Second Acts*, *Die Broke*, and *Lifescrpts*, as well as hundreds of magazine articles. From home mortgages to i-phones, basic elements of our daily lives depend on international economic markets. The astonishing complexity of these exchanges may seem ungoverned. Yet the global economy remains deeply bound by rules. Far from the staid world of treaties and state-to-state diplomacy, economic governance increasingly relies on a different class of international market regulation - soft law - comprised of voluntary standards, best practices, and recommended guidance created by a motley assortment of international

organizations.
Voluntary Disruptions argues that international soft law is deeply political, shaping the winners and losers of globalization. Some observers focus on soft law's potential to solve problems and coordinate market participants. Voluntary Disruptions widens the discussion, shifting attention to the ways soft law provides new political resources to some groups while not to others and alters the sites of contestation and the actors who participate in them. Highlighting two mechanisms - legitimacy claims and arena expansion - the

book explains how soft law, typically viewed as limited by its voluntary nature, disrupts and transforms the politics of economic governance. Using financial regulation as its laboratory, Voluntary Disruptions explains the remarkable pre-crisis alignment of US and European approaches to governing markets, the rise and prominence of transnational industry associations in the 1990s and 2000s, and the ambivalence of US reforms towards international market cooperation in the wake of the 2008 financial crisis. Rethinking scholarly and policy approaches to international soft law, this volume answers enduring and pressing questions about global finance, International Relations, and power. Transformations in Governance is a major new academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions, subnational governments, and

public-private networks. It brings together work that advances our understanding of the organization, causes, and consequences of multilevel and complex governance. The series is selective, containing annually a small number of books of exceptionally high quality by leading and emerging scholars. The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina, Chapel Hill, and Walter Mattli of the University of Oxford.

THE EVALUATION OF FINANCIAL RISK PROFILE OF THE COMPANIES AND THE MANDATORY DISCLOSURE ON LIQUIDITY AND CREDIT RISK is a work born from a careful study of the evolution of the Italian and European legislation

on the subject of financial risk communication and in particular of IFRS 7, Financial Instruments: Disclosure. Thanks to this international accounting standard, Italian listed companies have included a greater number of disclosures on financial risks in their financial statements, but while there is no doubt the quantitative increase in information, the qualitative value of this communication is doubtful. In this regard, the study analyzes the usefulness of the disclosure introduced by IFRS 7 for financial analysts. The choice of analysts is a natural choice due to the importance they hold as intermediaries in the communication channel

between companies and the market.
