This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that

match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from

IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

Corporate Financial Accounting and Reporting is a comprehensive accounting textbook directed at those using financial reports. Its aim is to help current and future managers gain a thorough

understanding of companies' published reports and is unique in the fact that it covers all three years of a traditional financial accounting course. The text is divided into 3 parts: the first covers the foundations of accounting, the second part considers the components of financial statements in more depth and the third part explores how investors analyse financial statements. Recognising the increasingly international nature of accounting, this book provides full coverage of international accounting

standards with the European Union's Company Law Directives providing its legal framework Corporate Financial Accounting and Reporting is designed for international MBA programmes and specialist postgraduate programmes in international business/finance in Europe. It can also be used in international business programmes at the undergraduate level. Financial Accounting Cengage Learning
