*Accounting, Fifth Edition*  
McGraw-Hill/Irwin

This book contains the solutions to problems in the main Introduction to Financial Accounting Textbook. This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in

amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach (vs. beginning with a sole proprietorship emphasis and then

converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory student. Financial Accounting John Wiley & Sons An Instructor's Manual is the perfect complement to Using Financial Accounting. The Instructor's Manual provides instructors with tools to enhance lectures and create lively discussion. The manual helps instructors become familiar with Using Financial Accounting, by providing an

---

overview of learning objectives covered throughout the text. A solutions manual is a great complement to Using Financial Accounting. The manual provides instructors with detailed explanations to problems presented in the text. Answers are presented in an easy- to- follow, logical order that will help to increase comprehension and understanding of topic.
