About Financial Accounting Vikas Publishing House  
Business Models for Transforming Customer Relationships What if there were a way to turn occasional, sporadic transactions with customers into long-term, continuous relationships--while simultaneously driving dramatic improvements in operational efficiency? What if you could break your existing trade-offs between superior customer experience and low cost? This is the promise of a connected strategy. New forms of connectivity--involving frequent, low-friction, customized interactions--mean that companies can now anticipate customer needs as they arise, or even before. Simultaneously, enabled by these technologies, companies can create new business models that deliver more value to customers.

Connected strategies are win-win: Customers get a dramatically improved experience, while companies boost operational efficiency. In this book, strategy and operations experts Nicolaj Siggelkow and Christian Terwiesch reveal the emergence of connected strategies as a new source of competitive advantage. With in-depth examples from companies operating in industries such as healthcare, financial services, mobility, retail, entertainment, nonprofit, and education, Connected Strategy identifies the four pathways--respond-to-desire, curated offering, coach behavior, and automatic execution--for turning episodic interactions into continuous relationships. The authors show how each pathway creates a competitive advantage, then guide you through the critical decisions for creating and implementing your own

---

connected strategies. Whether you're trying to revitalize strategy in an established company or disrupt an industry as a startup, this book will help you: Reshape your connections with your customers Find new ways to connect with existing suppliers while also activating new sources of capacity Create the right revenue model Make the best technology choices to support your strategy Integrating rich examples, how-to advice, and practical tools in the form of "workshop chapters" throughout, this book is the ultimate resource for creating competitive advantage through connected relationships with your customers and redefined connections in your industry.

A Financial Times Book of the Year 2020!

Should companies be run for profit or purpose? In this ground-breaking book, acclaimed finance professor and TED speaker Alex Edmans shows it's not an either-or choice. Drawing from real-life examples spanning industries and countries, Edmans demonstrates that purpose-driven businesses are consistently more successful in the long-term. But a purposeful company must navigate difficult trade-offs and take tough decisions. Edmans provides a roadmap for company leaders to put purpose into practice, and overcome the hurdles that hold many back. He explains how investors can discern which companies are truly purposeful and how to engage with them to unleash value for both shareholders and society. And he highlights

the role that citizens can play in reshaping business to improve our world. This edition has been thoroughly updated to include the pandemic, the latest research, and new insights on how to make purpose a reality.

Routledge

The New York Times bestselling, groundbreaking investigation of how the global elite's efforts to "change the world" preserve the status quo and obscure their role in causing the

problems they later seek to solve. An essential read for understanding some of the egregious abuses of power that dominate today's news. Former New York Times columnist Anand Giridharadas takes us into the inner sanctums of a new gilded age, where the rich and powerful fight for equality and justice any way they can--except ways that threaten the social order and their position atop it. We see how they rebrand themselves as saviors of the poor; how they lavishly reward "thought leaders" who redefine "change" in winner-friendly ways; and how they constantly seek to do more good, but never less harm. We hear the limousine confessions of a celebrated foundation

---

boss; witness an American president hem and haw about his plutocratic benefactors; and attend a cruise-ship conference where entrepreneurs celebrate their own self-interested magnanimity. Giridharadas asks hard questions: Why, for example, should our gravest problems be solved by the unelected upper crust instead of the public institutions it erodes by lobbying and dodging taxes? He also points toward an answer: Rather than rely on scraps from the winners, we must take on the grueling democratic work of building more robust, egalitarian institutions and truly changing the world. A call to action for elites and everyday citizens alike.
