In the music industry, the days of deals in smoke-filled back rooms are all but over. Artist development happens on the streets, not at major labels. And the old-school "professional" managers are stepping down, one by one, to cozy retirements funded by decades of commissions from successful clients. With fewer and fewer "lifers" available to take on new clients, what's an emerging artist to do? Likewise, how does an aspiring artist manager get a start without the connections and influence required of their predecessors? Music business manager and consultant Joe Taylor Jr. set out to answer these questions for a member of his staff. The result? Over 160 pages of nuts-and-bolts advice for the novice music manager, or for any musician looking to boost their success team by adding homegrown management to the mix.

Upon its publication in 1963, Corley's Legal Environment of Business was the first and only business law textbook to emphasize public rather than private law, government regulation of business rather than contracts, and legal relationships rather than business transactions. A major innovation, it established a new course that the authors termed the legal environment of business. Over the years others have attempted to attain the success and stature of The Legal and Regulatory Environment of Business, but none has been able to match its timely, innovative coverage. Substantially updated, the 10th edition continues the text's reputation for ethics, authority and coverage of current areas of importance to business.
