Managerial Accounting for Managers, 2nd
Edition by Noreen/Brewer/Garrison is based
on the market-leading text, Managerial
Accounting, by Garrison, Noreen and
Brewer. The Noreen book was created to
serve customers who do not wish to teach the
financial accounting-oriented content that is
included in the Garrison book. Of our three
books (the Brewer book, the Garrison book,
and the Noreen book), the Noreen book is
the most pure management accounting
textbook. The other two books have greater
amounts of financial accounting content.
Managerial Accounting for Managers, 2nd
Edition is geared towards professors who love
Garrison's market-leading managerial
accounting content, but have been bothered
by the debits and credits included in the
book. It includes the same coverage of
managerial accounting topics such as
Relevant Costs for Decision Making, Capital
Budgeting Decisions, and Segment Reporting
and Decentralization without the journal
entries. The job-order costing chapter has
been extensively rewritten to remove all
journal entries. Furthermore, the chapters
dealing with process costing, the statement of
cash flows, and financial statement analysis
have been dropped to enable professors to
focus their attention on the bedrocks of
managerial accounting--planning, control,
and decision making.

An Introduction to Financial and Managerial
Accounting Academic Internet Pub Incorporated
There are linkages, ramifications, conditions, and
demands made by the global economy on
domestic as well as multinational firms--and
executives must be aware of all of them. One way
is through the medium of accounting
information and the special way it reflects the
realities of international business. Providing this
crucial information is the task of accounting

executives and their staffs worldwide. Dr. Riahi-Belkaoui sees it as a distinctly new type of information that applies to external and international users of all kinds, operating in different nations and cultures. He identifies the various issues and problems that are most critical to the efficient management of multinational firms, provides practical solutions to international accounting problems, and with his focus on normative as well as descriptive solutions, helps confer on international accounting the status of a legitimate multidisciplinary inquiry. Dr. Riahi-Belkaoui begins by outlining environmental factors in the global economy and their affect on the definition, dimensions, and conduct of international accounting. He deals next with the international issues of taxation philosophies, types, systems, treaties, havens, and other relevant matters, before moving to the problems of determining and estimating exchange rates and the management of economic exposure. He elaborates on this in Chapter 4 with discussions of international arbitrage, then moves to the problems facing multinational firms when they decide on a choice of organizational structure and attempt to evaluate decisional performance. Chapter 6 addresses the use and misuse of accounting information for various purposes, Chapter 7, the specifics of capital budgeting. He then looks at the accounting and tax issues involved in the determination of transfer prices by multinational firms, and next at the accounting treatments associated with foreign currency translation, transactions, and futures contracts. Chapter 10 concludes the book with an examination of the various asset valuation and income determination models available for dealing with international inflation.
