"As our eyes are drawn upward to the skyline of great cities, it's important to remember that these impressive constructions are able to reach such heights only because their foundations are strong. In much the same way, being successful in the business world begins with fundamental courses like financial and managerial accounting. It is only when students have a firm grasp of concepts like the accounting cycle and managerial decision making that they have a base on which to stand, a strong foundation on which to grow. In this edition, as before, the Williams team has revised the text with a keen eye toward the principle of helping students establish the foundation they will need for future success in business.

However, through new coverage of International Financial Reporting Standards and a revised globalization chapter, the Williams book also introduces students to larger themes and evolving concerns. This dual emphasis allows students to keep their eyes trained upward even as they become solidly grounded in accounting fundamentals"--

This book describes recent improvements in governmental accounting, auditing, and financial reporting for school business officials. Applications of financial accounting and reporting principles in typical transactions

of school systems are illustrated by questions, cases, and problems at the end of each chapter. The first of the two sections, "Basic Principles of Accounting for Elementary and Secondary School Systems," concerns accounting problems of school systems. Financial accounting and reporting principles are demonstrated by the fund and account group structure as recommended by school business organizations. Attention is focused on problems of cash flow, working capital, and causes of change in financial position of the general fund. This section develops budgetary accounting controls and financial reporting principles. The second section, "Accounting Principles as Applied to the Various Funds Used in Financial Administration of School Systems," addresses each fund and account group individually, showing how a school's financial structure can be divided into manageable, effective segments. The section includes the general fund, special revenue funds, capital project funds, and debt service funds. Financial transactions typical of those used in each fund and account group of a school system are illustrated. Interim and annual financial statements are given for formal budgetary type funds, and include balance sheets and statements comparing estimated or budgeted revenue with revenue realized. A glossary contains accounting terminology for school systems. (CJH)
