The first course in finance for finance and business majors has traditionally focused solely on managerial (or corporate) finance. Now, many schools are indicating a need to introduce these students -- particularly the non-finance business majors -- to the other two major components of finance -- institutions and investments -- in this first course but at the same level of rigot as traditional financial management texts. The Dryden

Press has answered this call with Principles of Finance. This text begins with a discussion of the principles of financial systems and business organizations, moves on to valuation concepts, and then corporate decision making (managerial finance). It concludes with coverage of investment fundamentals. Key chapters may be covered in a one-term course or supplemented with cases and outside readings for a two-term course. Chapters are written in a flexible, modular format, allowing instructors to cover the material in a different sequence if desired.

The third Canadian edition of Brigham's Financial Management: Theory and Practice delivers solid financial theory and practical applications, preparing students for future careers in business and finance in an engaging manner that makes the content come alive. This resource emphasizes the actions that a manager

should take to increase the value of the firm. Structuring the book around valuation and cash flows enhances continuity and helps students see how topics relate to one another. The hallmark of this resource is "The Corporate Valuation Framework", a pedagogical feature presented early in each chapter. By highlighting specific parts of the framework, the model explicitly shows how each chapter relates to corporate valuation. The book begins with fundamental concepts, including background on the economic and financial environment, financial statements (with an emphasis on cash flows), the time value of money, financial forecasting, bond valuation, risk analysis, and stock valuation. With this background, students then learn specific techniques and decision rules that can be used to help maximize the value of the firm. MindTap raises the bar with multimedia, Concept Clips and Aplia problem sets: providing the ideal solution for keeping students on track and prepared for tests and exams. Highly customizable, instructors can add RSS feeds, YouTube videos, Google docs and more to further increase student engagement and achieve deeper learning.
