FINANCIAL STATEMENT FRAUD

Strategies for Detection and Investigation
Although financial statement fraud is the least frequently encountered fraud, it is by far the most costly, at a median loss of \$1 million per case. Yet, the indirect losses from financial statement fraud—jobs, support, morale, and loyalty—are also significant and almost impossible to measure. Learn how to spot the warning signs before the damage is done. Financial Statement Fraud explores the many different methods of perpetrating financial statement fraud, the accounting principles that are exploited, and the methods to detect

and prevent fraud in any organization. Assuming an understanding of basic financial statements and the purpose each serves, as well as basic accounting concepts, author Gerard Zack highlights the many different types of fraud schemes. Financial Statement Fraud provides auditors, fraud investigators, government agencies, and investment analysts with detailed descriptions of the most common or emerging schemes involving the preparation and issuance of fraudulent financial statements. Filling the need for practical guidance on financial statement fraud and the roles and responsibilities within companies, Financial Statement Fraud features: References to pertinent U.S. and international accounting standards violated in the preparation of fraudulent financial statements A wide range of detection tools, from the simplest of ratios to complex analyses and tests, as well as fraud indicators A comprehensive, global approach that includes U.S. GAAP and IFRS Red flags and ratios to help you detect financial statement fraud schemes Coverage of auditor liability: when is an auditor liable for failing to detect fraud? Mergers and acquisitions (M&As) reshape the corporate landscape helping companies expand market share and gain a strategic advantage. The ability to understand and analyze these transactions is a crucial skill. The first step in acquiring that skill is being able to gather and analyse information on M&As from public sources, such as financial statements. This textbook helps its readers better analyze M&A transactions using information provided in financial statements. Covering accounting and reporting of consolidations,

goodwill, non-controlling interests, step acquisitions, spin-offs, equity carve-outs, joint ventures, leveraged buyouts, disposal of subsidiaries, special purpose entities, and taxes, it focuses on the link between underlying economic events and the information in financial statements and how this link affects the assessment of corporate performance. The first part of the book provides description of the accounting rules governing M&A transactions, while the second part includes cases of M&A transactions. Each case focuses on a different element of an M&A transaction, and it is followed by a detailed solution with a complete analysis. Unlike other books in this field, this textbook focuses exclusively on accounting and financial analysis for graduate and upper undergraduate level courses in financial analysis, corporate finance, and financial accounting.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health

inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.
