Whether you are a prosecutor or a defense attorney, a thorough understanding of the many procedural issues in a case can mean the difference between a conviction and an acquittal or an affirmance or reversal on appeal. This guide by Brent Newton comprehensively examines the major topics in constitutional criminal procedure with a pragmatic view that gets to the heart of each matter quickly and cogently. It includes a summary to every significant decision of the United States Supreme Court that impacts constitutional criminal procedure. This text also highlights many of constitutional procedural issues that the United States Supreme Court has not yet addressed and reviews the extensive treatment these issues have received in the lower federal and state courts. The Reference Realist in Library Academia CRC Press

This practical and holistic approach to offering library resources and services to online patrons addresses multiple areas of service to online patrons, including reference, instruction, access, and marketing. Academic libraries are wonderful resources for university students and faculty on campus, and public libraries thrive on providing targeted in-person services such as storytime, makerspaces, and adult programming. It can be easy, however, to forget about the large population of students, faculty, and community members who access library resources and use library services remotely. Library Services for Online Patrons reaches out to patrons who are not—or not always—located on campus or who seldom—if ever—visit libraries' physical facilities and who may not be aware of or able to equitably use library services. The authors focus on ways to organize library resources using principles of design and to cater library services to the specific needs of online students, faculty, and community members. They also address how to effectively target marketing to the online population and how to collaborate with campus and community stakeholders who work directly with them.

This book explores early new critical debates about intention, tracing how and why intention was dismissed across much humanities scholarship, and how it can be revisited and made relevant as a key formative, evaluative, and ethical concept. The author argues that the academic disinterest in intention occurred simultaneously as genre criticism and later the rhetorical interest in genre came into its own. Genre became a way to simultaneously elide and naturalize intention. The book elaborates on the pedagogical, ethical, and empirical consequences naturalizing intention through genre has had for rhetorical studies and it offers a new term, “curations” to identify discursive forms, actions, and intentions working simultaneously. Finally, he also examines the gap between the humanities and STEM fields and shows specific ways scientists and engineers have called for the humanities to become more invested in intention as both a critical and an operational concept. This book will be of interest to students and scholars of discourse studies and critical discourse analysis, rhetoric and professional communication, including those in fields such as medicine, engineering, STS and business studies.
