While attention has been paid to various aspects of music education in China, to date no single publication has systematically addressed the complex interplay of sociopolitical transformations underlying the development of popular music and music education in the multilevel culture of China. Before the implementation of the new curriculum reforms in China at the beginning of the twenty-first century, there was neither Chinese nor Western popular music in textbook materials. Popular culture had long been prohibited in school music education by China's strong revolutionary orientation, which feared 'spiritual pollution' by Western cultures. However, since the early twenty-first century, education reform has attempted to help students deal with experiences in their daily lives and has officially included learning the canon of popular music in the music curriculum. In relation to this topic, this book analyses how social transformation and cultural politics have affected community relations and the transmission of popular music through school music education. Ho presents music and music education as sociopolitical constructions of nationalism and globalization. Moreover, how popular music is received in national and global contexts and how it affects the construction of social and musical meanings in school music education, as well as the reformation of music education in mainland China, is discussed. Based on the perspectives of school music teachers and students, the findings of the empirical studies in this book address the power and potential use of popular music in school music education as a producer and reproducer of cultural politics in the music curriculum in the mainland.

This book demonstrates, in contrast to statistics that show declining consumption of physical formats, that there has not been a mass shift towards purely digital media. Physical releases such as special editions, DVD box-sets and Blu-Rays are frequently promoted and sought out by consumers. And that past formats such as VHS, Laserdisc and HD-DVD make for sought-after collectible items. These trends are also found within particular genres and niche categories, such as

documentary, education and independent film distribution settings.

Through its case studies, this collection makes a distinctive and significant intervention in highlighting the ways in which the film industry has responded to rapidly changing markets. This volume, global in scope, will prove useful to those studying the distribution and exhibition of films, and the economics of the film industry around the world.

27 Essential Principles of Story Walter Foster Jr

The essays in this collection make a contribution to the greening of film studies and expand the scope of ecocriticism as a discipline traditionally rooted in literary studies. In addition to highlighting particular films as productive tools for raising awareness and educating us about environmental issues, Framing the World: Explorations in Ecocriticism and Film encourages its readers to become more ecologically minded viewers, sensitive to the ways in which films reflect, shape, reinforce, and challenge our perceptions of nature, of human/nature relations, and of environmental issues.

The contributors to this volume offer in-depth analyses of a broad range of films, including fictional and documentary, Hollywood and independent, domestic and foreign, experimental and indigenous. Drawing from disciplines including film theory, ecocriticism, philosophy, rhetoric, environmental justice, and American and Indigenous studies, Framing the World offers new and original approaches to the ecocritical study of cinema. The twelve essays are gathered in four parts, focusing on ecocinema as activist cinema; the representation of environmental justice issues in Hollywood, independent, and foreign films; the representation of animals, ecosystems, and natural and human-made landscapes in live action and animation; and ecological themes in the films of two eco-auteurs, Kiyoshi Kurosawa and Peter Greenaway. Willoquet-Maricondi's introduction provides an overview of the field of ecocriticism and offers both philosophical and theoretical foundations for the ecocritical study of films. Disney/Pixar: Finding Nemo Walter Foster Jr

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.
