Color Confidence Lulu.com
This vintage book contains Alexander D'Agapeyeff's famous 1939 work, Codes and Ciphers - A History of Cryptography. Cryptography is the employment of codes and ciphers to protect secrets, and it has a long and interesting history. This fantastic volume offers a detailed history of cryptography from ancient times to modernity, written by the Russian-born English cryptographer, Alexander D'Agapeyeff. The contents include:
- The beginnings of Cryptography - From the Middle Ages Onwards - Signals, Signs, and Secret Languages - Commercial Codes -

Military Codes and Ciphers - Types of Codes and Ciphers - Methods of Deciphering Many antiquarian texts such as this, especially those dating back to the 1900s and before, are increasingly hard to come by and expensive, and it is with this in mind that we are republishing this book now in an affordable, modern, high quality edition. It comes complete with a specially commissioned new biography of the author.

PC Mag Que Publishing

Today serious photographers shoot raw images only. Real World Camera Raw with Adobe Photoshop was the first book devoted exclusively to the topic, explaining the advantages and challenges of using Adobe Camera Raw to produce magnificent images. Real World Camera Raw in Adobe Photoshop CS5 keeps pace with new directions in digital photography and raw image processing. Jeff Schewe, a contributor to the development of Adobe Camera Raw from its beginnings, updates Bruce Fraser's bestselling book with insider knowledge of how new features let photographers optimize and convert images for the best results in Adobe Photoshop CS5. Hands-on techniques show readers how to expose and shoot for raw image capture as well as use features

such as the Adjustment Brush and the Graduated Filter and the new and improved Noise Reduction, Perspective Crop, and automatic Lens Correction. Readers will also learn how to use the latest version of Adobe Bridge to manage the thousands of images--and gigabytes of data--that result from shooting in raw. This edition: Builds on the latest version of Camera Raw to extend control over your digital camera's raw file format to produce the best quality images. Shows you how to take advantage of new features in Adobe Bridge CS5 to select, sort, annotate, and edit thousands of raw images quickly and efficiently. Guides you in developing an efficient raw workflow incorporating Adobe Photoshop CS5, Camera Raw 6, and Bridge CS5
Digit Read Books Ltd

"Color Confidence is one book that no photographer, especially me, can afford to be without!" Art Morris, Photographer (www.birdsasart.com) Establishing a successful color management workflow that produces predictable results is an important -- yet tricky -- undertaking. Most photographers are all too familiar with the frustration of a print not matching the image on the monitor. In Color Confidence, digital imaging expert Tim Grey provides the crucial information you need to get the color you want, every time. His results-oriented guide shows you how to manage color effectively across all devices. He demystifies complicated topics and takes you through each component of a color-managed workflow step-by-step. Designed for busy photographers, this full-color guide cuts through the theory, focusing on the practical information you need to make the best color decisions from capture to output.
The British Journal of Photography Pearson Education

Presenting a practical, problem-based approach to colour physics, this title describes the key issues encountered in modern colour

engineering, including efficient representation of building blocks of using the FUJIFILM X-T30 colour information, fourier analysis of reflectance spectra and advanced colorimetric computation. Emphasis is placed on the practical applications rather than the techniques themselves, with material structured around key topics, such as colour calibration of visual displays, computer recipe prediction and models for colour-appearance prediction. Each topic is carefully introduced at three levels to enhance student understanding. Firstly, theoretical ideas and background information are discussed, explanations of mathematical solutions then follow and finally practical solutions are presented using MATLAB. Includes a compendium of equations and numerical data required by the modern colour and imaging scientist. Numerous examples of solutions and algorithms for a wide-range of computational problems in colour science. Provides example scripts using the MATLAB programming language. This text is a must-have for students taking courses in colour science, colour chemistry and colour physics as well as technicians and researchers working in the area.

Macworld

FUJIFILM X-T30 is one of the best cameras you can ever find out there, but how do you use it?The FUJIFILM X-T30 USERS GUIDE is the complete guide to using the FUJIFILM X-T30. This book is written with the beginner in mind and is excellent for seniors and first-time FUJIFILM X-T30 users.Getting a new Canon digital camera is impressive; it can practically feel like getting a new toy. Nobody cherishes a toy that makes you read a long guidebook just to figure out how the darn thing works!That is why I have put this book together for both beginners and expert, to teach you them the

mirrorless digital camera. It starts out by going over the feature and modes in the device, followed by defining some key terms that canon camera user needs to know. This book will explain all the basics settings, Dials, Modes, Buttons, Shooting Tips and much more.It covers only what most users want to know so you don't have to comb through hundreds of pages of technical jargon just to find out how to do a common feature.This book is written in a little more casual and fun than what you expect from most canon manuals.Click the BUY button now!!!

Real World Camera Raw with Adobe Photoshop CS4

Many have tried to convey the true spirit of Africa's animals in words, photography, or in music. There may be no challenge greater; Africa's fauna are vast in number and rich in diversity. In this finely crafted collection, French photographer Laurent Baheux uses the medium of black-and-white photography to capture the intricate details of both the wondrous beasts and the magnificent settings in which they dwell. This wide-ranging volume lays particular emphasis on his subjects' individual spirits-revealing all of their vulnerability while losing nothing of their raw vitality. Every photograph is so carefully composed and well lit that the details equal the evocative precision of an Old Masters portrait. Through Baheux's eyes we get close to creatures that will both inspire and humble us all. AUTHOR: Laurent Baheux, an award-winning, French, self-taught photographer born in Poitiers in 1970, was at first attracted to journalism and editing. He covered the main international sport competitions for the top press photography agencies and channeled his energy towards conditions of speed and extreme demand.Always fascinated by nature and wildlife, Laurent Baheux embarked on a trip to Tanzania in 2002, a journey that launched a lifetime love affair with Africa's wildlife. He immediately chose black-and-white, with its play on shadow, light, and contrast, to immortalize rare and ephemeral scenes of nature and to sublimate the animal

personality. His artistic interpretation is characterized by deep blacks, forming a random and subtle alchemy that combines beauty and emotion, always striving to detach his subjects from the representation of reality in order to present a personal, poetic, and sensitive vision. With his work, Baheux wishes to pay homage to the wildlife, all the while questioning viewers about the relationship between animals and humans, and about the role the latter play in the delicate equilibrium of species on earth. In the continuity of his photographic commitment, Baheux accompanies and supports the deeds of organizations, which work for the protection of nature and the preservation of biodiversity including World Wildlife Fund and GoodPlanet Foundation. Since 2013, he supports actions of The United Nations Environmental Program (UNEP) as Goodwill Ambassador for the Wild & Precious awareness campaign. 175 duotone photographs

Peep at the Pictures (Classic Reprint)

Exquisite photographic portraits of flowers and magical depictions of their life cycle are presented by world-renowned photographer Tenneson. Full color.
