Testing the alarm should involve activation of a different manual alarm call point each time until they 've all been tested. You can use our Fire Alarm Call Point Register to allocate a unique number to each one, making it much easier to record the tests. Keep the record sheets in the record book section of your fire file.

Every actuation of the fire alarm should be

recorded in the logbook, including false alarms. The cause of the alarm should be recorded together with any action taken to avoid a repeat occurrence. This will enable the alarm system to be managed in accordance with BS5839, these records will also assist a service engineer to maintain the system.
