knew and valued them. They were studied in the sixteenth and seventeenth centuries, and in modern times have again been diligently examined by many scholars. G. R. S. Mead has issued a translation of the whole body of extant literature, with extended prolegomena, commentary, etc. There is a wide difference of opinion as to the date at which this literature was produced. Mead believes that some of the extant portions of it are at least as early as the earliest Christian writings, while von Christ assigns them to the third Christian century, and thinks that they show the influence of neo-Platonism. To affirm

that they influenced New Testament usage would be hazardous, but they perhaps throw some light on the direction in which thought was moving in New Testament times. Evagrius of Pontus Springer This masterpiece: It is about the Mysteries of the Universe Regarding God, Nature, Man, the Macrocosm and Microcosm, Eternity and Time Explained According to the Religion of Christ by Means of the Secret Symbols of the Rosicrucians of the Sixteenth and Seventeenth Centuries. Copied

and translated from an old German manuscript, and provided with a Dictionary of Occult terms. About the author: Franz Hartmann (1838 - 1912) was a German physician, theosophist, occultist, geomancer, astrologer, and author of esoteric works. He wrote esoteric studies and a biography of Jakob Böhme and of Paracelsus. He translated the Bhagavad Gita into German and was the editor of the journal Lotusblüten. He was at one time a co-

worker of Helena Blavatsky at Adyar. In 1896 he founded a German Theosophical Society. He also supported the Guido-von-List-Society (Guido-von-List-Gesellschaft). He cofounded the Ordo Templi Orientis with Carl Kellner and Theodor Reuss.

The Gnostic Trilogy is the best-known and most important work by the ascetic philosopher and teacher Evagrius of Pontus. For the first time

since antiquity, this volume presents the work in its entirety, providing a fresh and comprehensive English translation of all three parts, in all their known ancient versions, both Greek and Syriac. Detailed explanatory notes, cross-references to Scripture, to ancient literature, and to Evagrius's other writings, as well as commentary on the translation techniques of the Syriac translators, provide the

necessary resources for understanding this ancient and puzzling text.

Diamond Pocket Books (P) Ltd. Hard evidence has existed since 1945

for the actual recovery of unidentified flying craft in the United States, according to a new research book, "TRINITY: The Best-Kept Secret" written by two seasoned analysts of the global patterns behind the UFO phenomenon. Italian investigative journalist Paola Leopizzi Harris and French-born information scientist Dr. Jacques F. Vallée have teamed up to uncover the details of a New Mexico crash in 1945, fully two years before the well-known incident at Roswell and the famous sighting by pilot Kenneth

Arnold in 1947. Over several site investigation surveys Harris and Vallée reconstructed the historic observations by three witnesses, two of whom are still living, who described to them the circumstances of the crash, with details of the recovery of a nearly-intact flying vehicle and its occupants by an Army detachment. Combining their long experience in field research around the world, the authors have documented the step-by-step efforts by the military to remove the object, an avocado-shaped craft weighting

---

several tons, from the property where it crash-landed during a storm. Surprisingly, the literature of the field only includes a few passing mentions about the case, and only one (foreign) TV documentary has mentioned it, but the correlation between the crash of the extraordinary object and the explosion of the first atom bomb at White Sands, less than 20 miles away, has been missed. Harris and Vallée suggest that the correlation is significant for physical, geographic and biological reasons, quite apart from the obvious strategic implications. The

witnesses were able to observe not only the actual crash of the object on their property but every step of the military efforts to lift it and take it away. Fearing retaliation, they remained silent for some 60 years about what they had seen and done over those nine days at the site while the recovery was proceeding. When placed in the context of the history of chemical and physical analysis of retrieved UFO debris--an area where Harris and Vallée have long collaborated--the devices observed by the witnesses raise a number of very important scientific

questions. The Honorable Paul Hellyer, former Minister of National Defence of Canada, has stated: "Paola Harris and Jacques Vallée have spent much effort doing field research on location (...) It is now time that their discovery be revealed to the world."

Evelyn Underhill explores the profound and often elusive realms of mystical experience, weaving an intricate tapestry of historical context, personal insight, and spiritual inquiry. Underhill's literary style is both eloquent and scholarly, drawing on a plethora of religious texts, philosophical works, and her own contemplative practices. She situates her analysis within the broader traditions of Christian mysticism while deftly including insights from various faiths, making this treatise both a historical overview and an invitation to deeper exploration of the divine. Evelyn Underhill (1875-1941) was a distinguished English writer and theologian, known for her deep commitment to spirituality and her extensive knowledge of mysticism. Her own experiences and studies in various mystical traditions have profoundly informed her writing. Underhill's background as a convert to Anglicanism and her engagement with diverse religious practices positioned her uniquely to articulate the nuances and shared threads of mystical thought across cultures. Readers seeking a thoughtful and scholarly examination of mystical traditions will find Underhill's "Mysticism" an invaluable resource. This work not only illuminates the nature of mystical experiences but also invites readers to embark on their own spiritual journeys, making it essential reading for anyone interested in spirituality, theology, or the intersection of faith and experience. *Storm and Fury* New York : Basic Books

Many world legends suggest that at any given time, seven sages walk the Earth, tasked with the responsibility to anchor wisdom on behalf of humanity. Each one stands as the personification of a different rung of human consciousness. Together, they represent humanity's innate ability to save itself for doom itself. Earthwhisperer knows the secrets of the Earth, its pleasures, and its

pains. Lila understands shifts in perception, the nature and workings of sacred pleasure. Solomon has learned how to wield both moral and ethical power. Philomel has captured the art of immaculate loving and heartfelt joy. Dattatreya lives out his version of crazy wisdom with his innovative family. Marianina is fey, with a vast and accurate perspective on the human soul and its cosmic context. Horus is a human sun, the indicator of human destiny, well above normal human consciousness. At this time, the sages have the profound challenge to help humanity reclaim balance, compassion, and hope when these qualities seem lost forever. Through a whirling cascade of

can the sages inspire each person to embrace his or her unique brand of wisdom in time?

**A Lotus Of Emptiness (Sufis : The People Of The Path, Vol-1, Ch 9-16)** Library of Alexandria

IN the popular books of to-day, dealing with the origin of religion, we find it stated that they originated from fear. It is described how our ancestors, while in a savage state, and being unacquainted with the revelations made by modern science, saw the lightning flash, and heard the noise of thunder and watched other

natural phenomena, whose origin they could not explain, and how they came to the logical conclusion that such things must be produced by some extra cosmic supernatural and intellectual power, which might some day take a notion to destroy their possessions; and which must, therefore, be flattered and propitiated so that it might be kept in a good humour. Such a scientific explanation of the origin of religion and the belief in God may satisfy the speculating brain of the rationalist and thinker, who, living entirely in the

---

moonshine of his own imagination has no perception for the light of that knowledge which belongs to the spirit of man; but such a theory will not satisfy the heart in which there is still a spark of the divine life, and which, therefore, feels the presence of a universal and higher power that is not a product of nature, but superior to her. A religion having such a merely logical origin would be truly the religion of the devil, because it would be thoroughly false. It would be merely a system teaching how God may be cheated and eternal justice be made to

come to naught. True religion has nothing to do with fear nor with logical speculation, and its true origin rests in the fundamental relation which the human soul bears to the divine origin of the spiritual power by which she is inhabited. It is the divine spirit in man itself, recognising and through the instrumentality of man the presence of the universal spirit in nature. This divine power is truly "occult," because it cannot be perceived by any external means, neither can its existence be logically proved to those who are not capable to feel it; it will for ever remain

a mystery to the "Adam" of earth; because it is divine and can therefore be intellectually known to man only when he has entered into a state of divinity. Nevertheless, it is a quality inherent in the nature of man that he wishes to know intellectually that whose presence he intuitively feels, and there have, therefore, at all times been men curious to know the nature of God, and attempted to break by their intellectual efforts a hole through the veil that covers the sanctuary of the great mystery, so that they may peep through it, and gratify their curiosity. From the

---

vagaries of such speculators, visionaries and pseudo-philosophers has originated a false system of theology, mysticism, and superstition, which is even to-day often regarded as being Occultism and Theosophy. The soul of man stands in the same relation to that spiritual power that fills the universe, as the flowers of the field to the light of the terrestrial sun. A plant deprived of life will sicken and die, and a soul in which the spirit of holiness does not exist will become degraded lower than the soul of the animals; because

animals are not given to arguing; they act according to the laws of their nature, while the possession of an intellect enables man to act unnaturally, and in opposition to divine law. But there have also been other men, who, by remaining natural and obedient to divine law, have grown into a state of spirituality superior to the merely intellectual state, and in the course of their interior enfoldment, their inner senses have become opened, so that they could not only intuitively feel, but also spiritually perceive this light of the spirit. Such men are the true Mystics,

Rosicrucians, and Adepts, and with them the historian and antiquarian has nothing to do; because they are beyond his reach of investigation. A "History of Rosicrucians" could, at best, be a history of certain persons who "were supposed to have been spiritually enlightened." It would have to remain for ever uncertain whether a person mentioned in such a "history" had really been a Rosicrucian or not; because that which constitutes a man a saint and a sage does not belong to this earth and cannot be examined by mortal men; it is that

part of man of which the Bible speaks when it is written, "We live upon the earth; but our soul is in heaven."

For over a decade it has been out of print with only expensive used copies available; now it is available at an affordable price and in a more accessible

format. On First Principles is the most important surviving text written by third-century Church father, Origen. Origen wrote in a time when fundamental doctrines had not yet been fully articulated by the Church, and contributed to the very formation of Christianity. Readers see Origen grappling with the mysteries of salvation and brainstorming how they can be understood. This edition presents G. W. Butterworth's trusted translation in a new, more readable format, retains the introduction by Henri de Lubac, and includes a new foreword by John C. Cavadini. As St. Gregory of Nazianzus, Doctor of the Church, wrote:

"Origen is the stone on which all of us were sharpened."

In a radical reinterpretation of

how the mind works, an eminent behavioral scientist reveals the illusion of mental depth. Psychologists and neuroscientists struggle with how best to interpret human motivation and decision making. The assumption is that below a mental “surface” of conscious awareness lies a deep and complex set of inner beliefs, values, and desires that govern our thoughts, ideas, and actions, and that to know this depth is to know ourselves. In this profoundly original book,

behavioral scientist Nick Chater contends just the opposite: rather than being the plaything of unconscious currents, the brain generates behaviors in the moment based entirely on our past experiences. Engaging the reader with eye-opening experiments and visual examples, the author first demolishes our intuitive sense of how our mind works, then argues for a positive interpretation of the brain as a ceaseless and creative
