Many fire chiefs have been overwhelmed by the sudden appearance of satellite trucks, news helicopters, and media personnel when an incident in their jurisdiction attracts the media's attention. If reporters cannot get fast, accurate information from fire officials, they'll get it from whomever they can. This book is intended to help fire departments master the basics of the game and begins with an overview of public relations and the role of reporters. The middle of the book provides insight into how to choose a PIO and the role of that person. This is followed by a brief discussion of skills and preparations as well as policies for providing information and statements and concludes with a listing of sources for additional training. Working with the media should be an ongoing process not just at fires or emergencies but throughout the year to help you get your message across to the community that you serve. This book is not for public relations professional or advertising agencies, but is intended for fire service personnel and managers and those who want to know more about public and media relations. If you want to become a firefighter you need to first find out the kind of service you are interested to join - federal, state, rural, regional, or city. Some jobs at the fire department may apply to a high school student

whereas some may require an emergency medical technician (EMT) certification. Find out which path applies to you before prepare or apply for the job. There are around 300,000 firefighter positions in the U.S. You will find most of these positions in the metropolitans where they have more sources of funding due to larger tax base. Smaller towns or communities may rely more on the volunteer firefighting services. Sometimes if there is expansion in the area, more funds can be provided for expanding the fire departments too. Attrition rate is pretty low and so is the hiring rate. The exams are held yearly most of the time. You may find public announcements in the local media several weeks ahead of the test. If you are serious about joining the fire service, it is better you fill up the application form now itself so that once the exam dates are finalized, you will be notified immediately by mail. Some departments also have better shifts like 8-10 hour daily shifts. Under any circumstances you will typically spend 45 to 50 hours every week at work. In case you are on 24 hours shifts, you will be provided accommodation inside the fire department facility. So you will have access to kitchen, study, locker rooms, sleeping areas, bathrooms, etc. Amidst the shift you will also have access to games, technical reading and other fun activities. Just make sure you are ready to leave at the sound of an emergency. New hires typically engage after 1 to 3 months of intense study and training. During this period they learn about how to use all the firefighting equipment and about fire technology. They may be allowed to demonstrate their skills but under the close supervis....

Brannigan's Building Construction for the Fire Service Jones & Bartlett Learning

Fire Service Ethics is the first textbook specifically developed to help fire service personnel deal with ethical dilemmas. Firefighters and fire service leaders will find benefit from this important tool to aid them in dealing with complex issues. No other profession places such discretionary burden on its practitioners as the fire service. The military, law enforcement, the medical profession, and legal profession all provide a robust set of ethical policies and guidelines to their members. Fire Service Ethics provides the foundation for creating ethical boundaries. Fire Service Ethics meets and exceeds the course outcomes and course objectives for the National Fire Academy FESHE Model Curriculum Bachelor's (Non-Core) course called Fire Service Ethics (C0303). It is also well suited for fire officer and administration development programs. Section 1 of the book is entitled Foundations. Its four chapters are intended to provide the reader with the basic understanding of ethics necessary to master the material in the succeeding three sections. Chapter 1 is recommended for all readers, as it addresses the important questions of ethical relevance to the fire service. Chapters 2, 3 & 4 are grounded in academic approaches to ethics and are specifically intended to be used in college courses. The material within the sections encourages critical analysis of ethical systems, and understanding of the basics of human behavior. Section 2 of the book is entitled Ethics on The Line. Its chapters address issues directly related to rank-and-file firefighters, and company officers. The section also deals with diversity; first as an abstract concept, and then as it applies specifically to the fire service. Section 2 is intended to serve dual purposes. First, it is designed to be included in an academic curriculum aimed at future firefighters. Secondly, Section 2 - combined with Section 4 - encompasses the majority of material appropriate for inclusion in fire service training programs. Section 3 of the text is dedicated to Administrative Ethics. The chapters within the section explore ethics issues faced by fire chiefs and senior administrative personnel. Included within the section are chapters on the building and maintenance of an ethical work culture, the ethical responsibilities associated with administration, and finally, ethics laws. Section 3 - combined with Sections 1 and 4 - is especially appropriate for officer development programs and collegiate programs in fire administration. Section 4 of the book is entitled Applied Ethics. The three chapters within the section deal with the application of ethics on the personal and department level. Included within the section are chapters on ethical decision-making, mechanisms by which unethical behavior is engaged, and a review of current ethical issues affecting local fire departments. Section 4 is universal in its application and should be used in all collegiate programs, as well as in firefighter and fire
