This well-respected
text gives an
introduction to the
theory and application
of modern numerical
approximation
techniques for
students taking a one-
or two-semester course
in numerical analysis.

With an accessible
treatment that only
requires a calculus
prerequisite, Burden
and Faires explain how,
why, and when
approximation
techniques can be
expected to work, and
why, in some
situations, they fail.
A wealth of examples
and exercises develop
students' intuition,
and demonstrate the
subject's practical
applications to
important everyday
problems in math,
computing, engineering,
and physical science
disciplines. The first
book of its kind built
from the ground up to
serve a diverse
undergraduate audience,
three decades later
Burden and Faires
remains the definitive
introduction to a vital
and practical subject.

exam.

Merck Veterinary Manual
McGraw-Hill Education /
Medical

This new book provides
evidence based guidelines for
the immediate clinical
management of major
trauma. It has been written by
clinicians with many years of
trauma experience, and
endorsed as authoritative by
Trauma Care (UK). The UK
now has highly effective
trauma systems. Clinical
developments include the
introduction of damage control
resuscitation, tranexamic acid,
blood product resuscitation,
novel hybrid resuscitation and
an emphasis on the control of
major external haemorrhage as
part of a new ABCDE
approach. Consequently, more
individuals with major trauma
are surviving than ever before.
Optimal pre-hospital care is

essential for improved survival rates and reduced morbidity. PHTLS: Prehospital Trauma Life Support, Military Edition consists of the PHTLS core content and features thirteen chapters written by military prehospital trauma care experts for practitioners in the military environment. PHTLS: Prehospital Trauma Life Support, Military Edition is created in partnership between the National Association of Emergency Medical Technicians (NAEMT) and the Committee on Tactical Combat Casualty Care (C-TCCC). Since 1996, TCCC has improved the care rendered in combat prehospital environments. TCCC is the battlefield prehospital component of the Joint Trauma System, an organization within the United States Department of Defense that projects combat trauma care out to the point of injury and continues that care seamlessly while bringing the casualty home for recuperation and rehabilitation. TCCC guidelines are continuously revised and updated by C-TCCC, an all-volunteer group of military medicine and trauma care specialists. The membership of C-TCCC includes combat medics, corpsmen, and pararescuemen as well as physicians and physician assistants. U.S. Navy Diving Manual Syracuse University Press The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions,

grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

First Aid for the USMLE Step 1 Da Capo Lifelong Books

Fully revised and updated 9th edition for Ireland: includes changes to resuscitation techniques From first-aid essentials to life-saving procedures, it's worth having someone who knows what they are doing to cope with life's little (and big) emergencies.

The latest edition of the best-selling First Aid Manual, published in association with the Irish Red Cross, gives you the knowledge you need instantly if someone falls ill or gets hurt. Live-action step-by-step photographs show you how to treat casualties and over 100 medical conditions and injuries, from minor burns to heart attacks. Find information on the latest life-saving procedures and resuscitation guidelines as well as basic first aid techniques, like bandaging and applying dressings. Plus, chapters explain what it's like being a first aider, what to do in an emergency situation and how to look after a casualty. Keep the First Aid Manual handy - for home, for work and for leisure.

McGraw Hill Professional
A revised edition of the classic self-care guide, with

new research on aging.

"Every family should have this book" (Annals of Internal Medicine). Continuing to break new ground after forty years in print, Take Care of Yourself is the go-to guide for at home self-care. Simple to use, even in a crisis, the easy-to-navigate flowcharts help you quickly look up your symptoms and find an explanation of likely causes and possible home remedies, as well as advice on when you should go see a doctor. This comprehensive guide covers emergencies, over 175 healthcare concerns, the twenty things you should keep in a home pharmacy, and how to work best with your doctor. This new edition explains the latest research on how to postpone aging and what you can do to prevent chronic illness and stay in your best shape as you age. With new information on the Zika virus, prescription pain relievers, and other pertinent updates throughout, Take Care of Yourself remains your path to the most comprehensive and dependable self-care.

Revelation McGraw Hill Professional

Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility. Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are not designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities
