Terrorism and the Olympics Que Publishing "Grounded in the field of adult education, this international compilation offers a range of critical perspectives on popular culture as a form of pedagogy. Its fundamental premise is that adults learn in multiple ways, including through their consumption of fiction. As scholars have asserted for decades, people are not passive consumers of media; rather, we (re)make our own meanings as we accept, resist, and challenge cultural representations. At a time when attention often turns to new media, the contributors to this collection continue to find "old" forms of popular culture important and worthy

of study. Television and movies – the emphases in this book – reflect aspects of consumers' lives, and can be powerful vehicles for helping adults see, experience, and inhabit the world in new and different ways. This volume moves beyond conceptually oriented scholarship, taking a decidedly research-oriented focus. It offers examples of textual and discursive analyses of television shows and films that portray varied contexts of adult learning, and suggests how participants can be brought into adult education research in this area. In so doing, it provides compelling evidence about the complexity, politics, and multidimensionality of adult teaching and learning. Using a range of television shows and movies as exemplars, chapters relate popular culture to globalization, identity, health and health care, and education. The book will be of great use to instructors, students, and researchers located in adult education, cultural studies, women's and gender studies, cultural sociology, and other fields who are looking for innovative ways to explore social life as experienced and imagined." *WordPress Absolute Beginner's Guide* John Wiley & Sons Provides healthcare students and professionals with the foundational knowledge to integrate informatics principles into clinical practice. `fields of linguistic study.` *Social Policy* Routledge Every year around three-quarters of a million people die (directly or indirectly) as a result of gun violence, with most deaths occurring in the poorest, yet also most highly weaponized parts of the world. Firearm proliferation -- 875 million global firearms -- is a direct contributor to both regional conflicts and to crime. This book attempts to understand the inter-related dynamics of supply and demand which are weaponizing the

world. Now over ten years after Peter Squires's Gun Culture or Gun Control?, the issues pertaining to gun violence and gun control have developed dramatically. With Gun Crime in Global Contexts, Peter Squires offers a cutting-edge account of contemporary developments in the politics of gun crime and the social and theoretical issues that surround the problem. This book contains: an innovative political analysis of neo-liberal globalization and weapon proliferation; an overview of recent gun control debates

and gang strategies in the UK; an updated analysis of US gun politics: self-defence, race and the 'culture war'; a critical analysis of US school and rampage shootings, how they have impacted the gun debate and how different societies have responded to mass shootings; an examination of the UN's development of an Arms Trade Treaty (2001--13); a discussion of weapon trafficking; discussions about youth gangs around the world, including those in Brazil, Kenya, West Africa, Mexico and South Africa. With its interdisciplinary perspective and global reach, this book will be important reading for academics and students interested in youth and gang crime, violent crime and comparative criminal justice, as well as peace and security studies and international relations.

Rand Corporation Since the end of the Cold War, the United States, NATO, the United Nations, and a range of other states and nongovernmental organizations have become increasingly involved in nation-building operations. Nation-building involves the use of armed force as part of a broader effort to promote political and economic reforms, with the objective of transforming a society emerging from conflict into one at peace with itself and its neighbors. This guidebook is a practical ?how-to? manual on the conduct of effective nation-building. It is organized around the constituent elements that make up any nation-building mission: military, police, rule of law, humanitarian relief, governance, economic stabilization, democratization, and development. The chapters describe how each of these components should be organized and employed, how much of each is likely to be needed, and the likely cost. The lessons are drawn principally from 16 U.S.- and UN-led nation-building operations since World War II and from a forthcoming study on European-led missions. In short, this guidebook presents a comprehensive history of best practices in nation-building and serves as an indispensable reference for the preplanning of future interventions and for contingency planning on the ground.

Innovations in Deaf Studies Routledge What does it mean to engage in Deaf Studies and who gets to define the field? What would a truly deaf-led Deaf Studies research

program look like? What are the research practices of deaf scholars in Deaf Studies, and how do they relate to deaf research participants and communities? What innovations do deaf scholars deem necessary in the field of Deaf Studies? In Innovations in Deaf Studies: The Role of Deaf Scholars, volume editors Annelies Kusters, Maartje De Meulder, and Dai O'Brien and

their contributing authors tackle these questions and more. Spurred by a gradual increase in the number of Deaf Studies scholars who are deaf, and by new theoretical trends in Deaf Studies, this book creates an important space for contributions from deaf researchers, to see what happens when they enter into the conversation. Innovations in Deaf Studies expertly foregrounds deaf ontologies (defined as "deaf ways of being") and how the experience of being deaf is central not only to deaf research participants' own ontologies, but also to the positionality and framework of the study as a whole. Further, this book demonstrates that the research and methodology built around those ontologies offer suggestions for new ways for the discipline to meet the challenges of the present, which includes productive and ongoing collaboration with hearing researchers. Providing fascinating perspective and insight, Kusters, De Meulder, O'Brien, and their contributors all focus on the underdeveloped strands within Deaf Studies, particularly on areas around

deaf people's communities, ideologies, literature, religion, language practices, and political aspirations.

The book aims to outline the progress, problems and challenges of delivering a safe and secure Olympics in the context of the contemporary serious and enduring terrorist threat. The enormous media profile and symbolic significance of the Olympic Games, the history of terrorists aiming to use such high-profile events to advance their cause, and Al Qaeda's aim to cause mass casualties, all have major implications for the security of London 2012. Drawing on contributions from leading academics and practitioners in the field the book will assess the current terrorist threat, particularly focusing on terrorist targeting and how the Olympics might feature in this, before addressing particular response themes such as transport security, the role of surveillance, resilient designing of Olympic sites, the role of private security, and the challenge of inter-agency coordination. The book will conclude by providing an assessment of the legacy of Olympic security to date and will discuss the anticipated issues and dilemmas of the future. This book will be of interest to students of terrorism studies, security studies, counter-terrorism and sports studies. *The Sociolinguistics of Sign Languages*
