## Series

This book traces the development of higher education in Canada, through a detailed description and analysis of what was being taught and of the research opportunities available to professors in the years from 1860 to 1960.

Background is provided in the opening chapters of Part I, which outline the origins of post-secondary education in both French and English Canada from 1635 to 1860, and in the parallel chapters of Parts II to V

which describe the establishment of new and the growth of existing institutions during the period 1861-90, 1891-1920, 1921-40, and 1941-60. The remaining chapters of each of the book's main divisions present an examination of the curricula in arts and science, professional education, and graduate studies in 1860, 1890, 1920, 1940, and 1960, as well as the conditions pertaining to scholarship and research in these years. The concluding chapter identifies

the characteristics which differentiate Canadian higher education from that of other countries. The book includes a full bibliography, an extensive index, and statistical appendices providing data on enrolment and degrees granted. *A History of Higher Education in Canada 1663-1960* will be the definitive work in its field, valuable both for the wealth of information and the historical insights it contains. Third Five Year Plan, Assam 1961-1966

---

Routledge Post-secondary education is one of the fastest growing segments of the educational system. In this volume the development and activities of universities, colleges of applied arts and technology, and other institutions of post-secondary education are described in detail. The public and private training activities of business and industry are outlined, and government programs for adult retraining described. Dr

Fleming traces the origins of the institutes of technology and the college of applied art and technology, and he provides capsule histories of every university in Ontario.

[A History of Higher Education in Canada 1663-1960](#)

University of Toronto Press  
College students planning to go on to law school will find the most up-to-date information available on nearly 200 ABA-approved law schools across the United States. Profiles include details on admission requirements, academic programs,

the school calendar, a capsule description of the faculty, library facilities, tuition and fees, available financial aid, graduation requirements, professional organizations, and student body composition. Several non-ABA schools get brief profiles in a section of their own. The book also offers advice on choosing a law school, getting career counseling, taking the Law School Admission Test (LSAT), and applying to a law school. A sample LSAT with answers and explanations is a bonus feature in this directory.

The Admission and Placement of Students from Bahrain, Oman, Qatar, United Arab Emirates, Yemen Arab Republic provides answers to all the practical questions one should ask when applying to law school. *Geotechnical Engineering Education and Training* Taylor & Francis

Sapna Book House (P) Ltd. First published in 1982, *Education in Africa* offers a comprehensive treatment of the development of education in Africa. Until now only scattered documents on educational growth in individual countries have been available; works devoted to Africa as a whole have tended towards the general and have, by and large, been written by outside observers. This book is a collection of illuminating syntheses of major trends in educational development in Africa, by renowned African educationists, and is the first attempt to supply the need for a comprehensive book on African education written from an African viewpoint. All but one of the chapters were written specially for the book by leading African educators each of whom has had a distinguished career and wide experience in education in his or her own country; they represent eleven nations in all. The volume is designed for African students, teachers and administrators and will also be welcomed by educational planners and by scholars working in the fields of

---

comparative education and the history of education. It will be of special interest to departments, institutions and faculties of education in all the universities and colleges of education in Africa, and to educators and students worldwide who are concerned with comparative African education.

*Higher Education in France*

**MATERIALS OF CONSTRUCTION - I**

Published in association with the Commonwealth of Learning Open and distance learning has expanded dramatically in recent years across

the world, across the spectrum of subject areas, and across educational levels. This book takes a detailed look at the state of the art of open and distance learning in higher education, and presents a fascinating picture of a world and its educational culture in transition. This edited collection contains authoritative analyses of key issues together with current accounts of practice in each region of the world. It includes \*open and distance learning in relation

to internationalisation, lifelong learning and flexible learning \*costs of distance education \*the impact of telecommunications \*applications of open and distance learning in Africa, the Americas, Asia, Europe and Oceania. It draws together experts in the field from all over the world, and has a truly international perspective on the phenomenon of open and distance learning. Its unparalleled breadth of coverage makes it an indispensable work of reference

---

for experts and newcomers alike. *Post-secondary and Adult Education* “Materials Of Construction-I” is intended to be used as a text book for First Semester Diploma in Civil Engineering and is designed for comprehensively covering all topics relevant the subject as per the Syllabus Prescribed by the Board of Technical Education, Karnataka. At the end of each chapter, Points to remember, Fill up the blanks &

Descriptive type questions is given. To enhance the utility of book, Multiple Choice Questions are given towards the end of the book along with answers. This should benefit the students preparing for Common Entrance Test. It is hoped that this book will be immense use to teachers and students of Polytechnics. I wish to express my gratitude to MEI Polytechnic, Bangalore for providing me an opportunity to bring out this text book. I am grateful

to Sri Nitin S.Shah, M/s Spana Book House (P) Ltd., Bangalore for publishing this book within a reasonable time. I am thankful to M/s Datalink, Bangalore for neatly typing the manuscript of this book. I also express my sincere thanks to Sri C.Chandrashekar, HOD (Civil) and colleagues for their encouragement. The readers are welcome to send their valuable comments and suggestions for further improvement of this book. The Best 173 Law
