Post-secondary education is one of the fastest growing segments of the educational system. In this volume the development and activities of universities, colleges of applied arts and technology, and other institutions of post-secondary education are described in detail. The public and private training activities of business and industry are outlined, and government programs for adult retraining described. Dr Fleming traces the origins of the institutes of technology and the college of applied art and technology, and he provides capsule histories of every university in Ontario.

First published in 1982, Education in Africa offers a comprehensive treatment of the development of education in Africa. Until now only scattered documents on

educational growth in individual countries have been available; works devoted to Africa as a whole have tended towards the general and have, by and large, been written by outside observers. This book is a collection of illuminating syntheses of major trends in educational development in Africa, by renowned African educationists, and is the first attempt to supply the need for a comprehensive book on African education written from an African viewpoint. All but one of the chapters were written specially for the book by leading African educators each of whom has had a distinguished career and wide experience in education in his or her own country; they represent eleven nations in all. The volume is designed for African students, teachers and administrators and will also be welcomed by educational planners and by scholars working in the fields of comparative education and the history of education. It will be of special interest to departments, institutions and faculties of education in all the universities and colleges of education in Africa, and to educators and students worldwide who are concerned with comparative African education.

was being taught and of the research opportunities available to professors in the years from 1860 to 1960. Background is provided in the opening chapters of Part I, which outline the origins of post-secondary education in both French and English Canada from 1635 to 1860, and in the parallel chapters of Parts II to V which describe the establishment of new and the growth of existing institutions during the period 1861-90, 1891-1920, 1921-40, and 1941-60. The remaining chapters of each of the book's main divisions present an examination of the curricula in arts and science, professional education, and graduate studies in 1860, 1890, 1920, 1940, and 1960, as well as the conditions pertaining to scholarship and research in these years. The concluding chapter identifies the characteristics which differentiate Canadian higher education from that of other countries. The book includes a full bibliography, an extensive index, and statistical appendices providing data on enrolment and degrees granted. *A History of Higher Education in Canada 1663-1960* will be the definitive work in its field, valuable both for the wealth of information and the historical insights it contains.

This volume contains papers and reports from the Conference held in Romania, June 2000. The book covers many topics, for example, place, role and content of geotechnical engineering in civil, environmental and earthquake engineering.

College students planning to go on to law school will find the most up-to-date information available on nearly 200 ABA-approved law schools across the United States. Profiles include details on admission requirements, academic programs, the school calendar, a capsule description of the faculty, library facilities, tuition and fees, available financial aid, graduation requirements, professional organizations, and student body composition. Several non-ABA schools get brief profiles in a section of their own. The book also offers advice on choosing a law school, getting career counseling, taking the Law School Admission Test (LSAT), and applying to a law school. A sample LSAT with answers and explanations is a bonus feature in this directory.
