Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

Minerals Yearbook Copyright Office, Library of Congress

The objective of the conference was to provide a forum for engineers, architects and scientists to discuss a broad range of research and design methods for various problems related to snow engineering. Specialists in building and civil engineering, environmental engineering, energy engineering, urban planning, and regional development as well as snow scientists were brought together for the conference. The technical sessions were in five thematic areas as follows: Snow technology and science; Building and construction engineering; Infrastructure and transportation; Housing and residential planning; Development strategy in snow countries. The 115 papers provide keys to realize more comfortable living conditions in snow countries and to overcome many problems in heavy snow regions.

New York Times Bestseller Rosie may seem quiet during the day, but at night she's a brilliant inventor of gizmos and gadgets who dreams of becoming a great engineer. When her great-great-aunt Rose (Rosie the Riveter) comes for a visit and mentions her one unfinished goal—to fly—Rosie sets to work building a contraption to make her aunt's dream come true. But when her contraption doesn't fly but rather hovers for a moment and then crashes, Rosie deems the invention a failure. On the contrary, Aunt Rose insists that Rosie's contraption was a raging success: you can only truly fail, she explains, if you quit. From the powerhouse author-illustrator team of Iggy Peck, Architect comes Rosie Revere, Engineer, another charming, witty picture book about believing in yourself and pursuing your passion. Ada Twist, Scientist, the companion picture book featuring the next kid from Iggy Peck's class, is available in September 2016.!--?xml:namespace prefix = o ns = "urn:schemas-microsoft-com:office:office" /-- Praise for Rosie Revere, Engineer"Comically detailed mixed-media illustrations that keep the mood light and emphasize Rosie's creativity at every turn."—Publishers Weekly "The detritus of Rosie's collections is fascinating, from broken dolls and stuffed animals to nails, tools, pencils, old lamps and possibly an erector set. And cheddar-cheese spray."—Kirkus Reviews "This celebration of creativity and perseverance is told through rhyming text, which gives momentum and steady pacing to a story, consistent with the celebration of its heroine, Rosie. She's an imaginative thinker who hides her light under a bushel (well, really, the bed) after being laughed at for one of her inventions." —Booklist Award 2013 Parents'

Iron and Steel Trades Journal and Colliery Engineer Pickle Partners Publishing
The Claremont Hotel Club & Spa is a hidden gem in Northern California's East Bay. The full stories of this special place have remained largely untold. Complete historical pictures of this distinctive estate (currently hanging in the hotel lobby) have never been made available or widely disseminated, until now. For the first time, a collector's volume and historical narrative for the general public of The Claremont Hotel Club & Spa Centennial Commemoration - The First 100 Years (1915-2015) of an Oakland-Berkeley Landmark High Atop The Hill is now being made available. This book is a charitable calling by the author, as one of The Claremont Hotel Club & Spa's most appreciative patrons and self-described "closet historian and lover of great historic hotels." Inside this fascinating book are exclusive archives, fabulous photographs, extraordinary stories of residential and transient dwellers spanning over decades, previously untold until now. This book is the culmination of extensive research, several interviews, and numerous photographs, images, and hotel archives, being made available here to the general public, as a brief reference offering.

American Engineer and Railroad Journal CRC Press

This newly updated dictionary provides a comprehensive reference for hundreds of environmental engineering terms used throughout the field. Author Frank Spellman draws on his years of experience and many government documents and legal and regulatory sources to update this edition with many new terms and definitions.

The Sanitary Record and Journal of Sanitary and Municipal Engineering
Rowman & Littlefield

The Importance Of Environmental Studies Cannot Be Disputed Since The Need For Sustainable Development Is A Key To The Future Of Mankind. Recognising This, The Honourable Supreme Court Of India Directed The Ugc To Introduce A Basic Course On Environmental Education For Undergraduate Courses In All Disciplines, To Be Implemented By Every University In The Country. Accordingly, The Ugc Constituted An Expert Committee To Formulate A Six-Month Core Module Syllabus For Environmental Studies. This Textbook Is The Outcome Of The Ugc S Efforts And Has Been Prepared As Per The Syllabus. It Is Designed To Bring About An Awareness On A Variety Of Environmental Concerns. It Attempts To Create A Pro-Environmental Attitude And A Behavioural Pattern In Society That Is Based On Creating Sustainable Lifestyles And A New Ethic Towards Conservation. This Textbook Stresses On A Balanced View Of Issues That Affect Our Daily Lives. These Issues Are Related To The Conflict Between Existing `Development Strategies And The Need For `Conservation . It Not Only Makes The Student Better Informed On These Concerns, But Is Expected To Lead The Student Towards Positive Action To Improve The Environment. Based On A Multidisciplinary Approach That Brings About An Appreciation Of The Natural World And Human Impact On Its Integrity, This Textbook Seeks Practical Answers To Make Human Civilization Sustainable On The Earth S Finite Resources. Attractively Priced At Rupees One Hundred And Fifteen Only, This Textbook Covers The Syllabus As Structured By The Ugc, Divided Into 8 Units And 50 Lectures. The First 7 Units, Which Cover 45 Lectures Are Classroom Teaching-Based, And Enhance Knowledge Skills And Attitude To Environment. Unit 8 Is Based On Field Activities To Be Covered In 5 Lecture Hours And Would Provide Students With First Hand Knowledge On Various Local Environmental Issues.

Bulletin of Prosthetics Research

This study examines the role of U.S. Army Engineers fighting as infantry in The Electrical Engineer

AirLand Battle by analyzing the actions of the 1111th Engineer Combat Group during the Battle of the Bulge in Dec. 1944. By manning hasty defensive positions at Malmedy, Stavelot, and Trois Ponts, the 291st Engineers and C Company, 51st Engineers delayed the German advance long enough for 30th Infantry and 82d Airborne Divisions to reach the area and wrestle the initiative from Sixth Panzer Army. The defense of the Ourthe River line by elements of the 51st Engineers was instrumental in delaying 116th Panzer Division long enough for 3rd Armored and 84th Infantry Divisions to reach defensive positions in front of the Meuse River. Engineers were successful as infantry against mechanized forces for several reasons: 1) Infantry missions were limited in scope; 2) They were augmented with additional fire power; 3) They occupied good defensible terrain; 4) World War II engineer units received extensive combat training before deploying overseas. The Battle of the Bulge displays many of the characteristics of a Soviet attack on NATO. Like the Ardennes in Dec. 1944, NATO's Central Front is held by units which are overextended, untested in combat, and locked into a rigid forward defense with limited tactical reserves and no operational reserves. Under these circumstances, if Soviet forces do penetrate the Main Battle Area, engineer units are likely to be committed as infantry to block or contain the penetration. Like the Battle of the Bulge, we can expect a non-linear battlefield with fragmented, isolated units—a battlefield dominated by confusion and uncertainty. It is in exactly this type of situation that the actions of a few brave, determined men can make the difference between victory and defeat. By manning small, isolated defensive positions, the men of the 1111th Engineer Group provided the extra measure of combat power that tipped the scales of victory in favor of the Allies in Dec. 1944.

Agricultural Appropriations for 1951

This is the first edition of a unique new plastics industry resource: Who's Who in Plastics & Polymers. It is the only biographical directory of its kind and includes contact, affiliation and background information on more than 3300 individuals who are active leaders in this industry and related organizations. The biographical directory is in alphabetical order by individual name. After each individual name, current affiliation and contact information is provided. This includes job title, full name of affiliation (e.g., business, university, association, research institute), business address, and electronic contacts—telephone, fax, e-mail and Web site. Home addresses and contacts are also provided for most of the entries. In the biographical summary section for each individual, the following information is provided: date and place of birth, education and educational achievements, work experience including company or other organization names, positions held and time periods. Also included in this section are the number of patents awarded, articles, and book chapters authored, and conference sessions chaired. Other information includes titles of books edited or written by the individual, listing of conferences where the person had a leadership position, and listing of memberships and positions held in professional organizations. Finally, professional and civic awards are listed. Indexes provide listings of individuals by company or other organization name, and also by geographical location. Who's Who in Plastics & Polymers is now published in a limited edition of 1,000 copies. This edition will not be reprinted. To be sure of receiving your copy, please act now. Information on ordering follows sample pages on the reverse.
