Biochemistry Oswaal Books

Fiction Book in English The year is 1985. A brilliant young girl, full of promise, has just begun classes at her local college. Rema is excited about this new phase in her life, when all hell breaks loose. She begins to be harassed by a young man from the law college, during the bus journeys from home to college and back. Her confidence is shattered, her sense of self destroyed. Although things take a turn for the better when she makes a new friend in college, her troubles are far from over. Eventually, she gets married to a young lawyer but her marriage is a trap from which there is no escape. To make matters worse, one day the man who abused her when she was in college re-enters her life. He leaves no chance to subject her to further abuse and violence. Rema is at a loss about how to deal with this impossible situation. What will Rema do? How will she turn the situation around? How will she face the demon who has taken it upon himself to take away everything she holds dear? This is the moving and uplifting story of a woman who refuses to let the hostile conditions of her life bring her down. She fights through everything to emerge stronger and better.

Unfortunately, she has to take extreme measures to fight her abuser. This is an important commentary on women's place in contemporary Indian society and the conditions of their existence. Rema's story brings with it a slice of life in Calicut, a city located in north Kerala. To watch the book trailer video click

Inderbir Singh's Human Embryology Oswaal Books

This is one of the best selling titles in the Anshan mini atlas series. It is an excellent revision guide to the broad subject of biochemistry that gives concise clear information in a pictorial easy to read format. The book contains 30 chapters across 8 sections: the chemical basis of life, carbohydrate metabolism, lipid metabolism, amino acid metabolism, the integration of metabolism, proteins, nutrition and molecular biology. Each chapter is lavishly illustrated with full colour images and diagrams, which are clearly explained in a short, punchy way for greater ease of understanding. The book also contains a free photo CD Rom so that the images can be seen in larger format on screen. In brief, this is an outstanding value for money pocket revision guide to biochemistry that will be highly valued and frequently read by students throughout their period of graduation.

Selective Anatomy Vol 1, 2nd Edition-E-book Jaypee Brothers,Medical Publishers Pvt. Limited

The compartmentation of genetic information is a fundamental feature of the eukaryotic cell. The metabolic capacity of a eukaryotic (plant) cell and the steps leading to it are overwhelmingly an endeavour of a joint genetic cooperation between nucleus/cytosol, plastids, and mitochondria. Alter ation of the genetic material in anyone of these compartments or exchange of organelles between species can seriously affect harmoniously balanced growth of an organism. Although the biological significance of this genetic design has been vividly evident since the discovery of non-Mendelian inheritance by Baur and Correns at the beginning of this century, and became indisputable in principle after Renner's work on interspecific nuclear/plastid hybrids (summarized in his classical article in 1934), studies on the genetics of organelles have long suffered from the lack of respectabil ity. Non-Mendelian inheritance was considered a research sideline~ifnot a freak~by most geneticists, which becomes evident when one consults common textbooks. For instance, these have usually impeccable accounts of photosynthetic and respiratory energy conversion in chloroplasts and mitochondria, of metabolism and global circulation of the biological key elements C, N, and S, as well as of the organization, maintenance, and function of nuclear genetic information. In contrast, the heredity and molecular biology of organelles are generally treated as an adjunct, and neither goes as far as to describe the impact of the integrated genetic system.
