Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Cincinnati Magazine Artisan Books

Orange Coast Magazine is the oldest continuously published lifestyle magazine in the region, bringing together Orange County's most affluent coastal communities through smart, fun, and timely editorial content, as well as compelling photographs and design. Each issue features an award-winning blend of celebrity and newsmaker profiles, service journalism, and authoritative articles on dining, fashion, home design, and travel. As Orange County's only paid subscription lifestyle magazine with circulation figures guaranteed by the Audit Bureau of Circulation, Orange Coast is the definitive guidebook into the county's luxe lifestyle.

Home CRC Press

National architectural magazine now in its fifteenth year, covering period-inspired design 1700 – 1950. Commissioned photographs show real homes, inspired by the past but livable.

Historical and interpretive rooms are included; new construction, additions, and new kitchens and baths take their place along with restoration work. A feature on furniture appears in every issue. Product coverage is extensive. Experts offer advice for homeowners and designers on finishing, decorating, and furnishing period homes of every era. A garden feature, essays, archival material, events and exhibitions, and book reviews round out the editorial. Many readers claim the beautiful advertising—all of it design-related, no “lifestyle” ads—is as important to them as the articles.

10-Minute Home Improvement CRC Press

There are hundreds of ways to increase the value of your home in just 10 minutes, from trimming the shrubs to painting the front door to replacing the mailbox. This book gives you

inspiration for quick, budget-friendly home improvement strategies.

Popular Mechanics Prentice Hall

Log Home Design is the preferred, trusted partner with readers in simplifying the process of becoming a log home owner. With its exclusive focus on planning and design, the magazine's friendly tone, practical content and targeted advertising provide the essential tools consumers need – from the crucial preliminary stages through the finishing touches of their dream log home.

Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region.

Remodelista: The A-Z Guide to Remodeling Your Home John Wiley & Sons

Every day we interact with thousands of consumer products. We not only expect them to perform their functions safely, reliably, and efficiently, but also to do it so seamlessly that we don't even think about it. However, with the many factors involved in consumer product design, from the application of human factors and ergonomics principles to reducing risks of malfunction and the total life cycle cost, well, the process just seems to get more complex. Edited by well-known and well-respected experts, the two-volumes of Handbook of Human Factors and Ergonomics in Consumer Product Design simplify this process. The first volume, Human Factors and Ergonomics in Consumer Product Design: Methods and Techniques, outlines the how to incorporate Human Factors and Ergonomics (HF/E) principles and knowledge into the design of consumer products in a variety of applications. It discusses the user-centered design process, starting with how mental workload affects every day interactions with consumer products and what lessons may be applied to product design. The book then highlights the ever-increasing role of information technology, including digital imaging, video and other media, and virtual reality applications in consumer product design. It also explores user-centered aspect of consumer product development with discussions of user-centered vs. task-based approach, articulation and assessment of user requirements and needs, interaction with design models, and eco design. With contributions from a team of researchers from 21 countries, the book covers the current state of the art methods and techniques of product ergonomics. It provides an increased knowledge of how to apply the HF/E principles that ultimately leads to better product design.

Tampa Bay Magazine is the area's lifestyle magazine. For over 25 years it has been featuring the places, people and pleasures of Tampa Bay Florida, that includes Tampa, Clearwater and St. Petersburg. You won't know Tampa Bay until you read Tampa Bay Magazine.

Metropolis

People tend to think of creativity and strategy as opposites. This book argues that they are far more similar than we might expect. More than this, actively aligning creative and strategic thinking in any enterprise can enable more effective innovation, entrepreneurship, leadership and organizing for the future. By considering strategy as a creative process (and vice versa), the authors define 'creative strategy' as a mindset which switches between opposing processes and characteristics, and which drives every aspect of the business. The authors draw experiences and cases from across this false divide – from the music industry, sports, fashion, Shakespearean theatre companies, creative and media organizations and dance, as well as what we might regard as more mundane providers of mainstream products and services – to uncover the creative connections behind successful strategy. “Creative Strategy is a talisman for those looking to take a new path” Matt Hardisty, Strategy Director, Mother Advertising “It has been said that business is a hybrid of dancing and calculation – the former incorporating the creative within a firm, the latter the strategic. Bilton and Cummings show how these apparently contradictory processes can be integrated. Their insights about how firms can ‘create to strategize’ and ‘strategize to create’ are informative for managers and management scholars alike.” Jay Barney, Professor and Chase Chair of Strategic Management, Fisher College of Business, The Ohio State University “In today’s world, new thinking – creativity – is required to tackle long-standing problems or address new opportunities. The trouble is few organizations understand how to foster and apply creativity, at least in any consistent manner. This book provides new insights into just how that can be done. It moves creativity from being just the occasional, and fortuitous, flash of inspiration, to being an embedded feature of the way the organization is run.” Sir George Cox, Author of the Cox Review of Creativity in Business for HM Govt., Past Chair of the Design Council

Orange Coast Magazine

Accessory dwelling units (ADUs) are good for people and communities. An inside look at 25 charming, ultra-functional, extra living spaces will inspire you to build one of your own! An Accessory Dwelling Unit (ADU) is a smaller housing unit built on the same lot as a primary dwelling (also known as Additional or Auxiliary Dwelling Units) — think granny flat, in-law unit, laneway house). It has an arrangement for sleeping, cooking, and lavatory. An ADU can be detached, attached, a garage conversion, or a basement conversion. The uses are myriad—for family members, guest spaces, rental income, or more. These attractive, well-designed ADUs are located from coast to coast across the US and Canada. Each house includes information about the type of construction, the major green features, and how it is used. A variety of styles (e.g., laneway houses, garage conversions, and stand-alone independent structures, and ones connected to the primary house) show versatility and ways to blend new ADUS into the architecture of the primary house and neighborhood. Each featured ADU shows how to make the most of the small space for comfortable living without the burden of a big house to care for.

Green Building Products

Interest in sustainable, green building practices is greater than ever. Whether concerned about allergies, energy costs, old-growth forests, or durability and long-term value, homeowners and builders are looking for ways to ensure that their homes are healthy, safe, beautiful and efficient. In these pages are descriptions and manufacturer contact information for more than 1,400 environmentally preferable products and materials. All phases of residential construction, from sitework to flooring to renewable energy, are covered. Products are grouped by function, and each chapter begins with a discussion of key

environmental considerations, and what to look for in a green product. Over 40% revised, this updated edition includes over 120 new products. Categories of products include: Sitework and landscaping Outdoor structures Decking Foundations, footers and slabs Structural systems and components Sheathing Exterior finish and trim Roofing Doors and windows Insulation Flooring and floor coverings Interior finish and trim Caulks and adhesives Paints and coatings Mechanical systems/HVAC Plumbing, electrical and lighting Appliances Furniture and furnishings Renewable energy Distributors and retailers An index of products and manufacturers makes for easy navigation. There is no more comprehensive resource for both the engaged homeowner and those who design and build homes.

Remodelista: The A-Z Guide to Remodeling Your Home is a quick and useful guide to remodeling basics, excerpted from Remodelista. Remodelista.com is the go-to, undisputed authority for home design enthusiasts, remodelers, architects, and designers. Unlike sites that cater to all tastes, Remodelista has a singular and clearly defined aesthetic: classic pieces trump designs that are trendy and transient, and well-edited spaces take precedence over cluttered environments. High and low mix seamlessly here, and getting the look need not be expensive (think Design Within Reach meets Ikea). Remodelista decodes the secrets to achieving this aesthetic, with in-depth tours and lessons from 12 enviable homes; a recipe-like breakdown of the hardest-working kitchens and baths; dozens of do-it-yourself projects; “The Remodelista 100,” a guide to the best everyday household objects; and an in-depth look at the ins and outs of the remodeling process. In a world of design confusion, Remodelista takes the guesswork out of the process.
